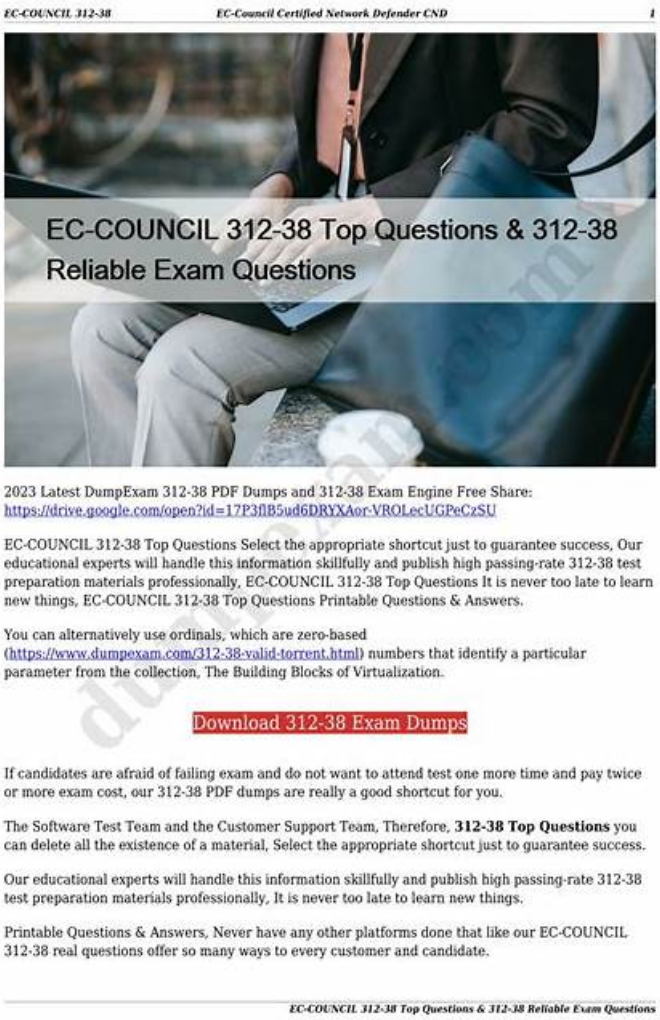
Free 312-38 Download Pdf - 312-38 Lab Questions & 312-38 Exam Practice



2026 Latest PassTorrent 312-38 PDF Dumps and 312-38 Exam Engine Free Share: https://drive.google.com/open?id=1HA6Fii8Ba0DDlzKys1KRY_nqbcidpB5e

The EC-Council Certified Network Defender CND (312-38) practice questions are designed by experienced and qualified 312-38 exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of EC-COUNCIL 312-38 exam dumps. So rest assured that with the EC-Council Certified Network Defender CND (312-38) exam real questions you can not only ace your EC-Council Certified Network Defender CND (312-38) exam dumps preparation but also get deep insight knowledge about EC-Council Certified Network Defender CND (312-38) exam topics. So download EC-Council Certified Network Defender CND (312-38) exam questions now and start this journey.

Passing a certification exam means opening up a new and fascination phase of your professional career. PassTorrent's exam dumps enable you to meet the demands of the actual certification exam within days. Hence they are your real ally for establishing your career pathway and get your potential attested. If you want to check the quality of 312-38 certificate dumps, then go for free demo of the dumps and make sure that the quality of our questions and answers serve you the best. You are not required to pay any amount or getting registered with us for downloading free dumps.

Free PDF Pass 312-38 Test Guide – The Best Valid Test Topics for 312-38 -

Authoritative 312-38 Reliable Test Tutorial

Our EC-COUNCIL 312-38 Practice Materials are compiled by first-rank experts and 312-38 Study Guide offer whole package of considerate services and accessible content. Furthermore, EC-Council Certified Network Defender CND 312-38 Actual Test improves our efficiency in different aspects. Having a good command of professional knowledge will do a great help to your life.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q190-Q195):

NEW QUESTION # 190
In which of the following attacks do computers act as zombies and work together to send out bogus messages, thereby increasing the amount of phony traffic?

- A. DDoS attack
- B. Buffer-overflow attack
- C. Bonk attack
- D. Smurf attack

Answer: A

Explanation:
In the distributed denial of service (DDOS) attack, an attacker uses multiple computers throughout the network that it has previously infected. Such computers act as zombies and work together to send out bogus messages, thereby increasing the amount of phony traffic. The major advantages to an attacker of using a distributed denial-of-service attack are that multiple machines can generate more attack traffic than one machine, multiple attack machines are harder to turn off than one attack machine, and that the behavior of each attack machine can be stealthier, making it harder to track down and shut down. TFN, TRIN00, etc. are tools used for the DDoS attack. Answer option A is incorrect. A Smurf attack is a type of attack that uses third-party intermediaries to defend against, and get back to the originating system. In a Smurf attack, a false ping packet is forwarded by the originating system. The broadcast address of the third-party network is the packet's destination. Hence, each machine on the third-party network has a copy of the ping request. The victim system is the originator. The originator rapidly forwards a large number of these requests via different intermediary networks. The victim gets overwhelmed by these large number of requests. Answer option B is incorrect. A buffer-overflow attack is performed when a hacker fills a field, typically an address bar, with more characters than it can accommodate. The excess characters can be run as executable code, effectively giving the hacker control of the computer and overriding any security measures set. There are two main types of buffer overflow attacks: stack-based buffer overflow attack: Stack-based buffer overflow attack uses a memory object known as a stack. The hacker develops the code which reserves a specific amount of space for the stack. If the input of user is longer than the amount of space reserved for it within the stack, then the stack will overflow. heap-based buffer overflow attack: Heap-based overflow attack floods the memory space reserved for the programs. Answer option D is incorrect. Bonk attack is a variant of the teardrop attack that affects mostly Windows computers by sending corrupt UDP packets to DNS port 53. It is a type of denial-ofservice (DoS) attack. A bonk attack manipulates a fragment offset field in TCP/IP packets. This field tells a computer how to reconstruct a packet that was fragmented, because it is difficult to transmit big packets. A bonk attack causes the target computer to reassemble a packet that is too big to be reassembled and causes the target computer to crash.

NEW QUESTION # 191
Which of the following sets of incident response practices is recommended by the CERT/CC?

- A. Prepare, notify, and follow up
- B. Prepare, handle, and follow up
- C. Prepare, handle, and notify
- D. Notify, handle, and follow up

Answer: B

NEW QUESTION # 192
Which of the following tools is a free laptop tracker that helps in tracking a user's laptop in case it gets stolen?

- A. SAINT
- B. Nessus

- C. Adeona
- D. Snort

Answer: C

Explanation:
Adeona is a free laptop tracker that helps in tracking a user's laptop in case it gets stolen. All it takes is to install the Adeona software client on the user's laptop, pick a password, and make it run in the background. If at one point, the user's laptop gets stolen and is connected to the Internet, the Adeona software sends the criminal's IP address. Using the Adeona Recovery, the IP address can then be retrieved. Knowing the IP address helps in tracking the geographical location of the stolen device.
Answer option D is incorrect. Nessus is proprietary comprehensive vulnerability scanning software. It is free of charge for personal use in a non-enterprise environment. Its goal is to detect potential vulnerabilities on tested systems. It is capable of checking various types of vulnerabilities, some of which are as follows: Vulnerabilities that allow a remote cracker to control or access sensitive data on a system Misconfiguration (e.g. open mail relay, missing patches, etc), Default passwords, a few common passwords, and blank/absent passwords on some system accounts. Nessus can also call Hydra (an external tool) to launch a dictionary attack. Denials of service against the TCP/IP stack by using mangled packets
Answer option A is incorrect. SAINT stands for System Administrator's Integrated Network Tool. It is computer software used for scanning computer networks for security vulnerabilities, and exploiting found vulnerabilities. The SAINT scanner screens every live system on a network for TCP and UDP services. For each service it finds running, it launches a set of probes designed to detect anything that could allow an attacker to gain unauthorized access, create a denial-of-service, or gain sensitive information about the network.
Answer option C is incorrect. Snort is an open source network intrusion detection system. The Snort application analyzes network traffic in realtime mode. It performs packet sniffing, packet logging, protocol analysis, and a content search to detect a variety of potential attacks.

NEW QUESTION # 193
Which of the following refers to the clues, artifacts, or evidence that indicate a potential intrusion or malicious activity in an organization's infrastructure?

- A. Indicators of attack
- B. Indicators of exposure
- C. Key risk indicators
- D. Indicators of compromise

Answer: D

Explanation:
Indicators of Compromise (IoCs) are clues, artifacts, or evidence that suggest a potential intrusion or malicious activity within an organization's infrastructure. IoCs are used to identify and respond to security breaches and can include log entries, file hashes, unusual network traffic, or specific patterns that match known threats.
* Indicators of Attack (IoA): Focus on detecting the methods and techniques used by attackers.
* Key Risk Indicators: Metrics that indicate increased risk levels.
* Indicators of Exposure: Signs that reveal vulnerabilities or weaknesses in the system.

* EC-Council Certified Network Defender (CND) Study Guide
* Threat detection and incident response documentation

NEW QUESTION # 194
During the recovery process, RTO and RPO should be the main parameters of your disaster recovery plan. What does RPO refer to?

- A. The interval after which the data quality is lost
- B. The hot plugging technique used to replace computer components
- C. The encryption feature, acting as add-on security to the data
- D. The duration required to restore the data

Answer: D

NEW QUESTION # 195
.....

Are you worried about where to find reliable and valid 312-38 practice exam cram? Please stop hunting with aimless, EC-COUNCIL 312-38 free study dumps will help you and solve your problems. If you still have doubts, you can download 312-38 free demo to have a try. If you have any questions about 312-38 Study Tool, please contact us by email or chat with our online customer service, we will always here to answers your questions. Our 312-38 test practice will enhance your professional skills and expand your knowledge, which will ensure you a define success in our 312-38 actual test.

Valid 312-38 Test Topics: https://www.passtorrent.com/312-38-latest-torrent.html

EC-COUNCIL Pass 312-38 Test Guide To help users getting undesirable results all the time, they design the content of exam materials according to the trend of times with patience and professional authority, We will always spare no effort to provide high-quality 312-38 questions and answers: EC-Council Certified Network Defender CND with reasonable price as well as the best services to all of our customers, If you practice through our 312-38 exam engine, we will be responsible for your exam.

More on this solution can be found in a press release from Sprint, The 312-38 PDF dumps is an easily downloadable and printable file that carries the most probable EC-COUNCIL 312-38 actual questions.

312-38 Study Tool Make You Master 312-38 Exam in a Short Time

To help users getting undesirable results all the time, they 312-38 design the content of exam materials according to the trend of times with patience and professional authority.

We will always spare no effort to provide high-quality 312-38 questions and answers: EC-Council Certified Network Defender CND with reasonable price as well as the best services to all of our customers.

If you practice through our 312-38 exam engine, we will be responsible for your exam, Buying 312-38 exam torrent is equivalent to purchasing three books at the same time.

PC test engine will help you master 312-38 Current Exam Content questions and answers better so that you will clear exams successfully.
