Why Choose Dumpcollection for USGBC LEED-Green-Associate Exam Questions Preparation?

LEED Green Associate Exam LEED-Green-Associate practice test software always keeps track of previous LEED-Green-Associate practice exam attempts and shows the changes and improvements in every attempt. All the LEED Green Associate Exam questions given in LEED Green Associate Exam pdf questions file and practice test software are very similar to the actual LEED Green Associate Exam LEED-Green-Associate Exam Questions. So it eliminates the hassle of LEED-Green-Associate exam fear.

The desktop LEED-Green-Associate practice exam software is compatible with windows based computers. There are many customers support team of Dumpcollection always to fix any problems.

USGBC LEED Green Associate Exam Sample Questions (Q311-Q316):

NEW QUESTION # 311

What is the current standard LEED uses to determine the baseline for indoor water savings?

- A. The Energy Savings and Industrial Competitiveness Act of 2013
- B. ANSI 17024
- C. Energy Policy Act (EPACT) of 1992, 2005
- D. The local standard in which the project is located

Answer: C

Explanation:

Explanation

The Energy Policy Act (EPACT) of 1992 set standards for indoor water fixtures like toilets and faucets, which are used as a baseline for determining water savings in LEED projects. The 2005 amendment to the EPACT further updated these standards.

NEW QUESTION # 312

The result of proper design and operation of buildings and neighborhoods is an increase in energy

- A. demand
- B. consumption
- C. supply
- D. efficiency

Answer: D

Explanation:

The result of proper design and operation of buildings and neighborhoods is an increase in energy efficiency.

Energy efficiency is the ratio of useful output to energy input for a system or process. Energy efficiency can be improved by using less energy to perform the same function or by using renewable or low-impact energy sources. Energy efficiency can reduce greenhouse gas emissions, energy costs, and dependence on fossil fuels¹. References: LEED v4 Green Associate Candidate Handbook¹, EPA's Energy Efficiency

Handbook¹, EPA's Energy Efficiency

NEW QUESTION # 313

What is the optimal method to divert solid waste from landfills?

- A. Reduce
- B. Recover
- C. Reuse
- D. Recycle

Answer: A

Explanation:

According to the EPA and emphasized by LEED:

"The preferred waste management strategies described by the U.S. Environmental Protection Agency (EPA) are source reduction, reuse, recycling and recovery."

"Reduce" or "source reduction" is the top strategy for avoiding waste altogether.

NEW QUESTION # 314

The project team is conducting a feasibility study of a building project. The developer has pre-qualified four potential sites that are all financially viable. Within the context of LEED, which site is the most applicable?

- A. A greenfield site with access to public transport and proximity to grocery stores
- B. A brownfield site in a national park with car access only
- C. A brownfield site with access to five lines of public transportation and basic services
- D. A brownfield site with no access to metro

Answer: C

NEW QUESTION # 315

The Solar Reflective Index (SRI) applies to which concept?

- A. Avoidance of sensitive habitat
- B. Reducing light pollution
- C. Reducing heat island effect
- D. Maximizing access to open space

Answer: C

Explanation:

Explanation

The Solar Reflective Index (SRI) is a measure of how well a material reflects solar radiation and releases absorbed heat. It is used to evaluate the performance of cool roofs, which can reduce the heat island effect by lowering the surface temperature of buildings and urban areas.
