NEW QUESTION # 50

Your team uses a company-managed Kanban project and needs a way to categorize issues as follows:

group issues by the project phase in which work will be started

assign a fixed start date and end date to each phase

move unresolved issues to the next phase

view reports of resolved issues by phase

Which product feature should be used to categorize the issues?

- A. labels
- B. sprints
- C. versions
- D. components
- E. categories

Answer: C

Explanation:

Versions in a company-managed project are designed to represent project phases with fixed start and end dates, allow tracking of resolved and unresolved issues, and automatically move unresolved issues to the next version. They also support reporting by version, making them the best fit for this use case.

NEW QUESTION # 51
