

# Neueste Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Prüfung pdf & NSE7\_SSE\_AD-25 Prüfung Torrent

Laden Sie die neuesten PrüfungFrage NSE7\_SSE\_AD-25 PDF-Versionen von Prüfungsfragen kostenlos von Google Drive herunter: <https://drive.google.com/open?id=1nsnknBEluTxbhmEoaV4eOmFiVdQ-qagi>

Eine geeignete Ausbildung zu wählen stellt eine Garantie für den Erfolg dar. Aber die Wahl ist von großer Bedeutung. PrüfungFrage hat einen guten Ruf und breite Beliebtheit. Man hat keine Gründe, den PrüfungFrage einfach zu weigern. Dennoch ist es nicht wirksam, wenn die vollständigen Schulungsunterlagen zur Fortinet NSE7\_SSE\_AD-25 Prüfung Ihnen nicht passen. So können Sie vor dem Kauf die Demo als Probe herunterladen. Auf diese Weise können Sie sich gut auf die Prüfung vorbereiten und die Fortinet NSE7\_SSE\_AD-25 Prüfung ohne Schwierigkeit bestehen. Das ist ein wichtiger Grund dafür, warum viele Kandidaten uns wählen. Wir bieten die besten, kostengünstigsten und vollständigsten Schulungsunterlagen, um den Kandidaten beim Bestehen der Fortinet NSE7\_SSE\_AD-25 Prüfung helfen.

Das Vertrauen von den Kunden zu gewinnen ist uns große Ehre. Die Fortinet NSE7\_SSE\_AD-25 Prüfungssoftware ist schon von zahlreichen Kunden anerkannt worden. Mit Hilfe dieser Software haben fast alle Benutzer die Fortinet NSE7\_SSE\_AD-25 Prüfung bestanden. Falls Sie sich jetzt auf Fortinet NSE7\_SSE\_AD-25 vorbereiten, dann können Sie die Demo unserer Prüfungsunterlagen probieren. Wir hoffen, dass unsere Software auch Ihre Anerkennung erlangen kann.

## Fortinet NSE7\_SSE\_AD-25 Antworten - NSE7\_SSE\_AD-25 Deutsche Prüfungsfragen

IT-Fachleute sind sehr beliebt. Aber die Konkurrenz ist zugleich auch sehr heftig. So beteiligen sich viele IT-Fachleute an der autoritären Fortinet NSE7\_SSE\_AD-25 IT-Zertifizierungsprüfung, um Ihre Position zu konsolidieren. Und unser PrüfungFrage bietet speziell Bequemlichkeiten für den Fortinet NSE7\_SSE\_AD-25 Kandidaten.

## Fortinet NSE7\_SSE\_AD-25 Prüfungsplan:

---

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>SASE deployment and management: This section focuses on deploying and managing FortiSASE for branch and remote users, configuring advanced inspection features, and managing endpoint profiles and compliance rules.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Analytics: This section covers troubleshooting connectivity and endpoint issues, analyzing dashboards and logs, and reviewing reports related to user traffic and security events.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>SASE architecture and integration: This domain covers integrating FortiSASE into existing networks, identifying core SASE components, and evaluating their roles in advanced deployment scenarios.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>Secure Private Access (SPA): This domain includes designing SPA use cases, deploying SPA with SD-WAN, and implementing ZTNA with tagging rules and access proxy configurations.</li> </ul>

## Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator NSE7\_SSE\_AD-25 Prüfungsfragen mit Lösungen (Q49-Q54):

### 49. Frage

Refer to the exhibit.

The screenshot displays the IPAM Configuration page in Fortinet's management console. It is divided into two tabs: 'Public IP' and 'IPAM', with 'IPAM' being the active tab. Under the 'IPAM CONFIGURATION' heading, there are two main sections: 'IP pools for tunnel and edge devices' and 'Excluded subnets'. The 'IP pools' section shows a single pool configured as '172.16.0.0/12'. The 'Excluded subnets' section lists eight subnets: 172.16.0.0/15, 172.18.0.0/15, 172.20.0.0/15, 172.22.0.0/15, 172.24.0.0/15, 172.26.0.0/15, 172.28.0.0/15, and 172.30.0.0/15. Each subnet entry has a plus sign on the left and a minus sign on the right. A large watermark 'pruefungfrage.de' is overlaid on the image.

A customer wants to fine-tune network assignments on FortiSASE, so they modified the IPAM configuration as shown in the exhibit. After this configuration, the customer started having connectivity problems and noticed that devices are using excluded ranges. What could be causing the unexpected behavior and connectivity problems? (Choose two answers)

- A. The pool must include at least one /20 per Instance for the IPAM to work correctly.
- B. The pool must include at least one /16 per Instance for the IPAM to work correctly.
- C. The customer excluded too many networks from the pool.
- D. The pool must include at least one /20 per security POP for the IPAM to work correctly.

**Antwort: C,D**

Begründung:

IP Address Management (IPAM) in FortiSASE is responsible for automatically allocating subnets to various services, including VPN tunnels and Edge devices. When an administrator modifies the default IPAM configuration, they must adhere to specific architectural scaling requirements.

\* Subnet Requirements per PoP: FortiSASE architecture requires a minimum amount of address space to be available for each provisioned Security Point of Presence (PoP) to handle internal routing and endpoint assignments. For the IPAM engine to function correctly and distribute unique subnets across the global infrastructure, the pool must provide at least one /20 subnet per security PoP. If the available space is smaller than this per-PoP requirement, the allocation logic may fail or produce unpredictable routing behavior.

\* Impact of Excessive Exclusions: In the exhibit (image\_578940.png), the customer has defined a large summary pool of 172.16.0.0/12. However, they have configured eight separate /15 excluded subnets: 172.16.0.0/15, 172.18.0.0/15, 172.20.0.0/15, 172.22.0.0/15, 172.24.0.0/15, 172.26.0.0/15, 172.28.0.0/15, and 172.30.0.0/15.

\* Calculating the Exhaustion: A /12 network contains exactly eight /15 blocks. By excluding all eight /15 ranges listed in the exhibit, the customer has effectively excluded 100% of the available addresses from the primary 172.16.0.0/12 pool.

\* Connectivity Problems: When the IPAM pool is exhausted or overly restricted, FortiSASE cannot assign valid, non-overlapping subnets to the PoPs. This leads to connectivity problems for remote users and can cause the system to "fall back" to ranges it believes are available, even if they were intended to be excluded, or simply fail to establish tunnels entirely.

To resolve this, the administrator must ensure that the excluded subnets do not consume the entire pool and that the remaining unexcluded space is large enough to provide a /20 block for every active PoP in their subscription.

## 50. Frage

Which two advantages does FortiSASE bring to businesses with microbranch offices that have FortiAP deployed for unmanaged devices? (Choose two.)

- A. It simplifies management and provisioning.
- B. It secures internet access both on and off the network.
- C. It eliminates the requirement for an on-premises firewall.
- D. It uses zero trust network access (ZTNA) tags to perform device compliance checks.

**Antwort: A,B**

Begründung:

FortiSASE extends secure internet access to users regardless of their location and streamlines the management and provisioning of security policies and services for microbranch offices with unmanaged devices.

## 51. Frage

Which statement best describes the Digital Experience Monitor (DEM) feature on FortiSASE?

- A. It is used for performing device compliance checks on endpoints.
- B. It gathers all the vulnerability information from all the FortiClient endpoints.
- C. It monitors the FortiSASE POP health based on ping probes.
- D. It provides end-to-end network visibility from all the FortiSASE security PoPs to a specific SaaS application.

**Antwort: D**

Begründung:

The Digital Experience Monitor (DEM) in FortiSASE measures and monitors network performance from the FortiSASE Points of Presence (PoPs) to specific SaaS or cloud applications, helping identify and troubleshoot performance issues across the service path.

## 52. Frage

Your FortiSASE customer has a small branch office in which ten users will be using their personal laptops and mobile devices to access the internet.

Which deployment should they use to secure their internet access with minimal configuration?

- A. Deploy SD-WAN on-ramp to secure internet access.
- B. Deploy FortiClient endpoint agent to secure internet access.
- **C. Deploy FortiAP to secure internet access.**
- D. Deploy FortiGate as a LAN extension to secure internet access.

**Antwort: C**

Begründung:

Deploying FortiAP enables secure internet access for unmanaged personal devices in small branch offices with minimal configuration by automatically directing traffic through FortiSASE, eliminating the need for endpoint installation or complex setup.

## 53. Frage

Which FortiSASE feature ensures least-privileged user access to all applications?

- A. secure web gateway (SWG)
- **B. zero trust network access (ZTNA)**
- C. SD-WAN
- D. thin branch SASE extension

**Antwort: B**

Begründung:

Zero Trust Network Access (ZTNA) is the FortiSASE feature that ensures least-privileged user access to all applications. ZTNA operates on the principle of "never trust, always verify," providing secure access based on the identity of users and devices, regardless of their location.

\* Zero Trust Network Access (ZTNA):

\* ZTNA ensures that only authenticated and authorized users and devices can access applications.

\* It applies the principle of least privilege by granting access only to the resources required by the user, minimizing the potential for unauthorized access.

\* Implementation:

\* ZTNA continuously verifies user and device trustworthiness and enforces granular access control policies.

\* This approach enhances security by reducing the attack surface and limiting lateral movement within the network.

## 54. Frage

.....

Wie weit ist der Anstand zwischen Worten und Taten? Es hängt von der Person ab. Wenn man einen starken Willen haben, ist Erfolg ganz leicht zu erlangen. Wenn Sie Fortinet NSE7\_SSE\_AD-25 Zertifizierungsprüfung wählen, sollen Sie die Prüfung bestehen. Die Prüfungsmaterialien zur Fortinet NSE7\_SSE\_AD-25 Zertifizierungsprüfung von PrüfungFrage ist die optimale Wahl, Ihnen zu helfen, die Prüfung zu bestehen. Die Qualität der Prüfungsmaterialien von PrüfungFrage ist sehr gut. Wenn Sie die Fortinet NSE7\_SSE\_AD-25 Zertifizierungsprüfung bestehen wollen, wählen Sie doch Lernhilfe von PrüfungFrage.
