PSM-I Exam is designed to test your ability to think critically and apply your knowledge of Scrum in real-world scenarios.

Scrum Professional Scrum Master I Sample Questions (Q91-Q96):

NEW QUESTION # 91
A Scrum Master is introducing Scrum to a new Team. The Team has decided that a Sprint Retrospective is unnecessary. What action should the Scrum Master take?
(choose the best answer)

- A. Comply with the decision of the self-managing team.
- B. Consult with the Product Owner to see how they feel about the situation.
- C. Call a meeting between the Scrum Team and senior management
- D. Begin facilitating productive and useful Sprint Retrospectives.

Answer: D

Explanation:
According to the Scrum Guide, the action that the Scrum Master should take when the Team decides that a Sprint Retrospective is unnecessary is to begin facilitating productive and useful Sprint Retrospectives. The Sprint Retrospective is an essential event for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. The Scrum Master is responsible for ensuring that this event takes place and that positive outcomes are achieved. The other options are not valid actions, as they either imply that the Scrum Master complies with or ignores the decision of the Team (such as complying with it, calling a meeting with senior management, or consulting with the Product Owner), which is not consistent with Scrum values and principles.

NEW QUESTION # 92
Marian is the Product Owner envisioning a project for a new release of her product. She made a projection of a release date based upon a sustained velocity of 17 completed units of work per Sprint. Over the first 3 Sprints, the average velocity was 13 for work that the Development Team estimated as 90% done. The Development Teams, feeling the need to meet the plan, figured that a velocity of 17 was within their reach.
A good way to continue is:

- A. The opportunity to inspect and adapt is lost. Opaqueness has replaced transparency. Predictability has dropped below zero. Theproduced software is not usable. As the rules of Scrum have not been respected, it is the Scrum Master's duty to assess whether repair is possible, or a restart with a more reliable team.
  If not, the Scrum Master should cancel the project.
- B. The Development Team makes sure that all of the selected scope per Sprint is as "Done" as possible.
  The undone work is estimated and added to the Sprint Backlog of the next Sprint, so itdoesn't mess up the Product Backlog.
- C. Add enough people to the Development Team for the deadline to be made.
- D. The Development Team should remind Marian to find funding for enough Release Sprints in which the remaining work can be done.

Answer: B

NEW QUESTION # 93
If burndown charts are used to visualize progress, what does a trend line through a release burndown chart indicate?

- A. When all work will be completed to the Scrum Team can be released for other work.
- B. When the project will be over if the Product Owner removes work that is equal in effort to any new work that is added.
- C. The evolution of the cost spent on the project.
- D. When the work remaining will likely be completed if nothing changes on the Product Backlog or the Development Team.

Answer: D

NEW QUESTION # 94

Cross-functional teams are optimized to work on one technical layer of a system only (e.g. GUI, database, middle tier, interfaces).

- A. False
- B. True

Answer: A

NEW QUESTION # 95
When might a Sprint be abnormally cancelled?

- A. When the Development Team feels that the work is too hard.
- B. When the Sprint Goal becomes obsolete.
- C. When the sales department has an important new opportunity.
- D. When it becomes clear that not everything will be finished by the end of the Sprint.

Answer: B

NEW QUESTION # 96
......
