NEW QUESTION # 23
Which two operating systems are supported for a Tableau Server installation? (Choose two.)

- A. Windows Server 2019
- B. Windows 10
- C. Windows Server 2016
- D. Windows 7

Answer: A,C

Explanation:
Tableau Server is designed for production environments and is supported only on server-class operating systems, not desktop

operating systems. As of the latest documentation (aligned with knowledge up to March
21, 2025), the supported operating systems for Tableau Server on Windows are:
Windows Server 2016
Windows Server 2019
Windows Server 2022 (added in later versions, but relevant as of 2025).
Desktop operating systems like Windows 7 or Windows 10 are not supported for production installations due to stability, security,
and performance requirements.
Option A (Windows 7): Incorrect. Windows 7 is a desktop OS and is not supported for Tableau Server. It's also end-of-life as of
January 2020.
Option B (Windows 10): Incorrect. Windows 10 is a desktop OS and not supported for production Tableau Server deployments,
though it may be used for testing in non-production scenarios.
Option C (Windows Server 2019): Correct. This is a supported server OS for Tableau Server.
Option D (Windows Server 2016): Correct. This is also a supported server OS for Tableau Server.

NEW QUESTION # 24

It is common knowledge that users granted the Explorer (Can Publish) site role with an Explorer license can publish workbooks
using existing data sources, but cannot connect to external data and create new data sources. What happens if a user with an
Explorer license is granted the Server Administrator site role?

- A. This site role isn't allowed to be assigned to the Explorer license to begin with
- B. A Server Administrator with an Explorer license still cannot connect to external data and create new data sources
- C. A Server Administrator with an Explorer license can now connect to external data and create new data sources

Answer: B

Explanation:
