SAP C-BCBAI-2509 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Exploring Joule Agents: This section of the exam measures the skills of AI Solution Architects and emphasizes knowledge of Joule Agents. It involves exploring how these agents function, their integration into SAP systems, and their potential use cases. The section also addresses how Joule Agents support intelligent automation, improve productivity, and enable personalized enterprise solutions.
Topic 2	<ul style="list-style-type: none">Positioning SAP Business AI: This section of the exam measures the skills of SAP Consultants and focuses on understanding how SAP Business AI fits into the SAP Business Suite. It covers the ability to explain the key concepts of Business AI, its role in modern enterprise solutions, and the value it delivers to customers. Candidates are expected to demonstrate knowledge of positioning AI capabilities in real business scenarios to enhance operational efficiency and decision-making.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q42-Q47):

NEW QUESTION # 42

Apart from SAP LeanIX, what other solutions does the AI agent hub support? Note: There are 2 correct answers to this question.

- A. SAP Integrated Business Planning
- B. SAP Ariba
- C. SAP Signavio
- D. SAP SuccessFactors

Answer: B,D

Explanation:

The AI agent hub supports integration with SAP SuccessFactors and SAP Ariba, in addition to SAP LeanIX, as detailed in SAP Business AI documentation. SAP SuccessFactors enables AI agents to enhance HR processes, such as recruitment and employee development, with intelligent automation. SAP Ariba supports procurement processes, leveraging AI agents for supplier management and sourcing optimization. SAP Signavio focuses on process modeling, and SAP Integrated Business Planning is not explicitly listed as supported by the AI agent hub in the documentation. These integrations allow the AI agent hub to deliver cross-functional value across SAP's ecosystem.

NEW QUESTION # 43

What types of agents does Joule integrate? Note: There are 2 correct answers to this question.

- A. Product-specific agents
- B. Retrieval-augmented agents
- C. Code-based agents
- D. Content-based agents

Answer: A,B

NEW QUESTION # 44

(How is extension building simplified in SAP S/4HANA? Note: There are 2 correct answers to this question.)

- A. By using business context
- B. By using Joule
- C. By using a guided wizard
- D. By explaining legacy code

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Extension building in SAP S/4HANA is simplified by using a guided wizard in tools like SAP Build Code for step-by-step development, and by leveraging business context to ground extensions in relevant data and processes, ensuring clean core principles and seamless integration.

Exact extracts supporting this:

Guided wizard: "SAP Build has been designed as the optimal way to extend SAP S/4HANA Cloud... with guided

processes."news.sap.com "Creating an SAP S/4HANA extension app in 60 minutes with guided wizards."community.sap.com

Business context: "Extend SAP S/4HANA in the cloud and on premise with ABAP-based extensions using business

context."community.sap.com "This guide provides a simplified introduction to extending SAP's Enterprise Resource Planning (ERP) offerings using business context."help.sap.com Other options are incorrect because:

Option A: Joule assists in code generation and explanation but is not the primary method for simplifying extension building; wizards and context are emphasized.

Option D: Explaining legacy code is a Joule feature but applies more to migration than direct extension simplification in S/4HANA.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blog "SAP S/4HANA Extensibility - Simplified Guide for Beginners" and SAP Help Portal "Getting Started with Extensibility." These position guided wizards and business context as key simplifiers for extensions in S/4HANA, aligned with C_BCBAI_2502 certification.

NEW QUESTION # 45

(Which of the following is Effective AI built on? Note: There are 2 correct answers to this question.)

- **A. Seamless integration**
- B. Open source LLMs
- **C. Robust data foundation**
- D. Cutting-edge algorithms or real-time processing

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Effective AI in the context of SAP Business AI is built on a robust data foundation to ensure accurate and contextually relevant outcomes, and seamless integration to embed AI capabilities directly into business processes and applications for efficient deployment and scalability. This foundation enables customized AI solutions that leverage enterprise data securely while integrating with SAP and non-SAP systems.

Exact extracts supporting this:

"Effective AI is built on a robust data foundation and seamless integration, particularly when it involves customized AI solutions on the SAP ..."learning.sap.com From SAP Business AI principles: AI is "grounded in business data and embedded into every business function," emphasizing the data foundation and integration for effectiveness.sap.com

"Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Other options are incorrect because:

Option A: While algorithms and processing are important, SAP emphasizes data and integration over cutting-edge algorithms alone for effective AI in business contexts.

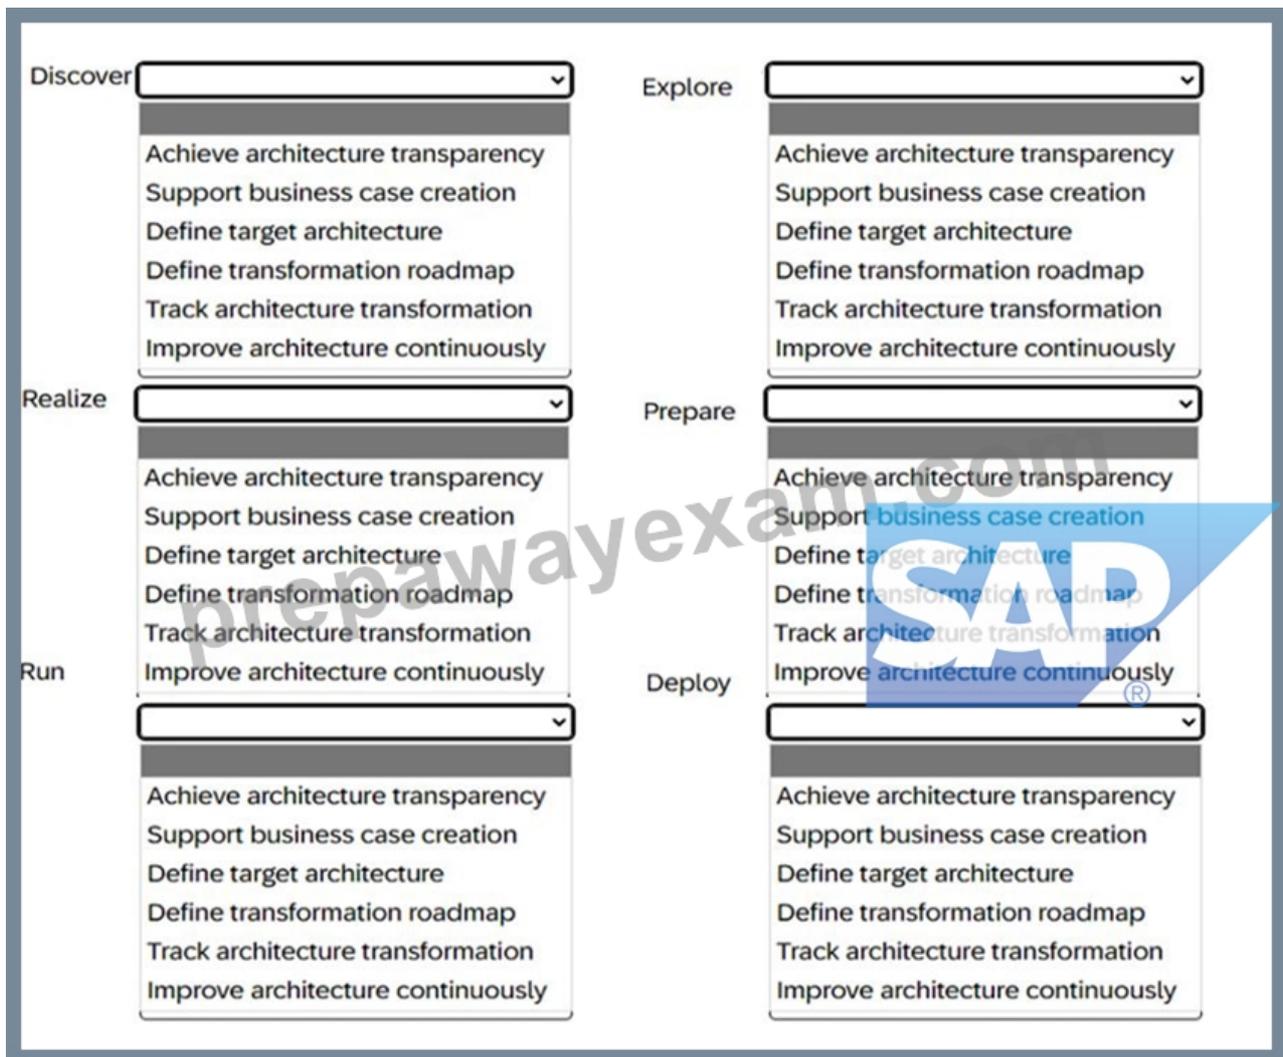

Option C: SAP supports a range of LLMs, including proprietary ones, but does not position effective AI specifically on open-source models; focus is on secure, business-grounded AI.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," specifically the unit "Building Custom SAP Business AI Solutions," which highlights effective AI's reliance on data foundations and integration.

Supported by the SAP Business AI product page, aligning with C_BCBAI_2502 certification materials for positioning AI solutions.

NEW QUESTION # 46

Match the SAP LeanIX activities in the dropdown lists to the SAP Activate phases.

Answer:

Explanation:

SAP Activate Phases and LeanIX Activities

SAP Activate Phase	LeanIX Activity
Discover	Achieve architecture transparency
Prepare	Support business case creation
Explore	Define target architecture
Realize	Define transformation roadmap
Deploy	Track architecture transformation
Run	Improve architecture continuously

NEW QUESTION # 47

.....
