You will notice the above features in the ServiceNow CAD Web-based format too. But the difference is that it is suitable for all operating systems: Macs, Linux, iOS, Androids, and Windows. There is no need to go through time-taking installations or activating plugins to use this format. It will lead to your convenience while preparing for the ServiceNow CAD Certification test. Above all, it operates on all browsers: Mozilla, Safari, Opera, Google Chrome, and Internet Explorer.

ServiceNow is a highly popular cloud-based platform that helps organizations manage their IT services, operations, and business processes. The platform is highly customizable and allows businesses to create their custom workflows and applications to meet their specific requirements. ServiceNow Certified Application Developer (CAD) is a professional certification that validates the skills and expertise of developers in designing, building, and deploying applications on the ServiceNow platform. The CAD exam is a highly sought-after certification exam that provides developers with an opportunity to enhance their knowledge and skills in ServiceNow application development.

To prepare for the ServiceNow CAD Certification Exam, you should have a solid understanding of software development principles, such as object-oriented programming, data structures, and algorithms. You should also have a good grasp of ServiceNow's development tools, such as the ServiceNow Studio, ServiceNow Developer Portal, and ServiceNow APIs. ServiceNow offers a range of training resources and courses to help you prepare for the exam, including online courses, instructor-led training, and practice exams.

2026 New CAD Test Syllabus 100% Pass | Valid ServiceNow Exam Certified Application Developer-ServiceNow Registration Pass for sure

Participation in the ServiceNow community is a helpful way to discuss CAD exam topics with other ServiceNow CAD exam applicants and experts. The official website of the CAD exam has other different learning resources. You can choose any of the courses available that are suitable to you at the official website of the ServiceNow CAD test. Find official ServiceNow books for preparation or buy training material available at the official website of the CAD certification exam.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q160-Q165):

NEW QUESTION # 160

What are the benefits of storing the majority of an Application's server-side script logic in a Script Include?

- a) This makes execution faster.
 - b) Only run when called from a script.
 - c) The script logic can be hidden when the Application is installed from the ServiceNow Store.
 - d) For some changes to application logic there is only one place to make edits.
- A. a, b, and d
 - B. a, b, c, and d
 - C. a, b, and c
 - **D. b, c, and d**

Answer: D

Explanation:

https://developer.servicenow.com/dev.do#!/learn/courses/tokyo/app_store_learnv2_scripting_tokyo_scripting_in_servicenow/app_store_learnv2_scripting_tokyo_server_side_scripting/app_store_learnv2_scripting

NEW QUESTION # 161

An application called My App has a table, MyAppTable, with the following Application Access configuration:

Accessible from: All application scopes

Can read: Selected

Can delete: Not selected

Allow configuration: Selected

Which of the following is true based on this configuration?

- A. An application developer working in another privately scoped application can write a Business Rule for the MyAppTable which successfully deletes all records
- B. Any application developer can write a Business Rule which successfully deletes all records from the MyAppTable
- C. An application developer working in the My App scope can write a Business Rule for the MyAppTable which successfully deletes all records from the MyAppTable
- **D. No Business Rule can be written which successfully deletes all records from the MyAppTable**

Answer: D

NEW QUESTION # 162

Which of the following CANNOT be debugged using the Field Watcher?

- A. Access Controls
- B. Client Scripts
- **C. Script Includes**
- D. Business Rules

Answer: C

Explanation:

The Field Watcher is a debugging tool that allows you to monitor the values of fields on a form as they change due to scripts or other actions. It can be used to debug Business Rules, Client Scripts, and Access Controls, but not Script Includes. Script Includes are server-side scripts that define reusable functions and classes. They are not associated with any specific field or form, and therefore cannot be watched by the Field Watcher.

NEW QUESTION # 163

What do you click when you have made modifications to your report, and you want to see the results without saving?

- A. Try it
- B. Test
- C. Execute
- **D. Run**
- E. Preview

Answer: D

NEW QUESTION # 164

When creating an application through the Guided Application Creator, which of the following is NOT an option for creating a table?

- A. Upload spreadsheet
- B. Extend a table
- C. Create table from template
- D. Create table from scratch

Answer: C

Explanation:

Create table from template is not an option for creating a table through the Guided Application Creator. The other options are available for creating a table in the app. Upload spreadsheet allows you to import data from an Excel file and create a table based on the spreadsheet columns and rows. Extend a table allows you to create a child table that inherits fields and behaviors from a parent table. Create table from scratch allows you to define your own fields and data types for a new table. Reference: Create tables
