GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which of the following best describes an Increment of working software? (Choose the best answer)

- **A. Additional features in a usable state that complement those delivered in previous iterations.**
- B. UML diagrams that describe how to deliver functionality in future iterations.
- C. A new user interface design for functionality delivered in previous iterations.
- D. An automated test suite to verify functionality delivered in previous iterations.
- E. A decomposition of all Product Backlog items into tasks for future Sprint Backlog lists.

Answer: A

Explanation:

The Scrum Guide defines an Increment as "a concrete stepping stone toward the Product Goal" that is usable and meets the Definition of "Done": "Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together." Option E captures this-new, usable features that build on previous work. Option A (test suite) is a tool, not an Increment. Option B (UML diagrams) is documentation, not working software. Option C (task decomposition) is planning, not a product. Option D (UI design) isn't necessarily usable software. Thus, E best describes an Increment.

NEW QUESTION # 39

What is the Product Owner accountable for in Scrum? (Choose the best answer)

- A. Refining the top-level Product Backlog items until they are ready to be handed over to the Developers
- **B. Creating and sustaining a Product Backlog that maximizes value and represents the needs of the stakeholders**
- C. Writing the User Stories so they are understandable to stakeholders
- D. Describing an Increment at the Sprint Planning and making sure that the Developers deliver it by the end of the Sprint

Answer: B

Explanation:

The Product Owner's core accountability is maximizing value through the Product Backlog. The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team." Option B encapsulates this fully.

* A: The Developers deliver the Increment; the Product Owner doesn't ensure it.

* C: Refinement is part of management, but not the sole accountability.

NEW QUESTION # 40

There are five teams working on a product. How many Product Owners would there be? (Choose the best answer)

- A. It depends
- **B. 0**

- C. Let the team decide
- D. 1

Answer: B

Explanation:

A single product has one Product Owner, regardless of the number of teams. The Scrum Guide states: "The Product Owner is one person, not a committee... Multiple Scrum Teams often work together on the same product. One Product Backlog is used to describe the upcoming work on the product."

* A: Multiple Product Owners fragment accountability.

* B: Correct—one Product Owner for one product.

NEW QUESTION # 41

What variables should a Product Owner consider when ordering the Product Backlog? (Choose the best answer)

- A. Development cohesion as indicated by the Developers
- B. The availability of resources and skills for implementation
- C. Lowest development cost in order to maximize ROI
- **D. Whatever is most appropriate for the Product Owner to achieve the product's goals and to optimize the value received**
- E. Effort first, then value
- F. The availability of resources and skills for implementation

Answer: D

Explanation:

The Product Owner's primary duty is to maximize value, with flexibility in how they order the Product Backlog. The Scrum Guide states: "The Product Owner is accountable for effective Product Backlog management, which includes... Ordering Product Backlog items." Option E gives the Product Owner latitude to consider value, effort, risk, dependencies, or other factors relevant to the Product Goal.

* A, C: Prioritizing effort or cost over value is too narrow.

* B: Cohesion is a Developer concern, not the Product Owner's primary focus.

NEW QUESTION # 42

What are the purposes of the Definition of "Done"? (Choose the best two answers)

- A. Document the Sprint Goal
- **B. Provide transparency**
- C. Ensure unit testing occurs
- **D. Help ensure the Increment is releasable**

Answer: B,D

Explanation:

The Definition of "Done" ensures quality and clarity. The Scrum Guide states: "The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product."

* A: It ensures the Increment is usable/releasable: "In order to provide value, the Increment must be usable."

* B: It provides transparency by setting a shared standard: "The Definition of Done creates transparency by providing everyone a shared understanding of what work was completed."

* C: The Sprint Goal is separate, defined in Sprint Planning.
