Reliable Microsoft AI-900 Exam Simulations | Certification AI-900 Training

As for the AI-900 study materials themselves, they boost multiple functions to assist the learners to learn the study materials

efficiently from different angles. For example, the function to stimulate the exam can help the exam candidates be familiar with the atmosphere and the pace of the Real AI-900 Exam and avoid some unexpected problem occur. Briefly speaking, our AI-900 training guide gives priority to the quality and service and will bring the clients the brand new experiences and comfortable feelings to pass the AI-900 exam

Microsoft Azure AI Fundamentals Sample Questions (Q244-Q249):

NEW QUESTION # 244

An app that analyzes social media posts to identify their tone is an example of which type of natural language processing (NLP) workload?

- A. key phrase extraction
- B. speech recognition
- C. sentiment analysis
- D. entity recognition

Answer: C

Explanation:

According to the Microsoft Azure AI Fundamentals (AI-900) official study guide and Microsoft Learn module "Describe features of natural language processing (NLP) workloads on Azure," sentiment analysis is an NLP workload that determines the emotional tone or opinion expressed in a piece of text. This could be positive, negative, or neutral sentiment.

When an app analyzes social media posts to identify their tone, it is performing sentiment analysis, since it aims to understand the emotional context behind user-generated text such as tweets, reviews, or comments.

Azure provides this functionality through the Azure Cognitive Services - Text Analytics API, which evaluates text and returns sentiment scores.

Other options are not suitable:

- * Key phrase extraction identifies main ideas in text but not tone.
- * Entity recognition identifies names of people, organizations, or locations.
- * Speech recognition converts spoken words into text, not emotional analysis.

Therefore, analyzing social media tone is an example of sentiment analysis, a key NLP workload in Microsoft's AI-900 syllabus.

NEW QUESTION # 245

To complete the sentence, select the appropriate option in the answer area.

Answer:

Explanation:

Explanation:

In the most basic sense, regression refers to prediction of a numeric target.

Linear regression attempts to establish a linear relationship between one or more independent variables and a numeric outcome, or dependent variable.

You use this module to define a linear regression method, and then train a model using a labeled dataset. The trained model can then be used to make predictions.

Incorrect Answers:

Classification is a machine learning method that uses data to determine the category, type, or class of an item or row of data.

Clustering, in machine learning, is a method of grouping data points into similar clusters. It is also called segmentation.

Over the years, many clustering algorithms have been developed. Almost all clustering algorithms use the features of individual items to find similar items. For example, you might apply clustering to find similar people by demographics. You might use clustering with text analysis to group sentences with similar topics or sentiment.

NEW QUESTION # 246

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 247

Match the Microsoft guiding principles for responsible AI to the appropriate descriptions.

To answer, drag the appropriate principle from the column on the left to its description on the right. Each principle may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Reliability and safety

To build trust, it's critical that AI systems operate reliably, safely, and consistently under normal circumstances and in unexpected conditions. These systems should be able to operate as they were originally designed, respond safely to unanticipated conditions, and resist harmful manipulation.

Box 2: Fairness

Fairness: AI systems should treat everyone fairly and avoid affecting similarly situated groups of people in different ways. For example, when AI systems provide guidance on medical treatment, loan applications, or employment, they should make the same recommendations to everyone with similar symptoms, financial circumstances, or professional qualifications.

We believe that mitigating bias starts with people understanding the implications and limitations of AI predictions and recommendations. Ultimately, people should supplement AI decisions with sound human judgment and be held accountable for consequential decisions that affect others.

Box 3: Privacy and security

As AI becomes more prevalent, protecting privacy and securing important personal and business information is becoming more critical and complex. With AI, privacy and data security issues require especially close attention because access to data is essential for AI systems to make accurate and informed predictions and decisions about people. AI systems must comply with privacy laws that require transparency about the collection, use, and storage of data and mandate that consumers have appropriate controls to choose how their data is used Reference:

NEW QUESTION # 248

Match the tool to the Azure Machine Learning task.

To answer, drag the appropriate tool from the column on the left to its tasks on the right. Each tool may be used once, more than once, or not at all NOTE: Each correct match is worth one point.

Answer:

Explanation:

NEW QUESTION # 249

.....

The certificate is of significance in our daily life. At present we will provide all candidates who want to pass the AI-900 exam with three different versions for your choice. APP version of our AI-900 exam questions can work in an offline state. If you use the quiz prep, you can use our latest AI-900 exam torrent in anywhere and anytime. How can you have the chance to enjoy the study with our AI-900 Practice Guide in an offline state? You just need to download the version that can work in an offline state, and the first time you need to use the version of our AI-900 quiz torrent online.

Reliable AI-900 Exam Simulations: <https://www.actual4dumps.com/AI-900-study-material.html>

If you find you are extra taxed please tell us in time before purchasing our AI-900 reliable Study Guide materials, The Actual4Dumps Microsoft AI-900 exam dumps are being offered in three different formats, Here you will find technical information

and professional networking technology about Microsoft AI-900 actual exam dumps, which will help advance your certification goals, The AI-900 would assist applicants in preparing for the Microsoft AI-900 exam successfully in one go AI-900 would provide AI-900 candidates with accurate and real AI-900 Dumps which are necessary to clear the Microsoft AI-900 test quickly.

Accessing Individual String Characters, Next Gen AI-900 Farms Technology that enables farming in locations and settings that cannot support traditional farming, If you find you are extra taxed please tell us in time before purchasing our AI-900 Reliable Study Guide materials.

Pass Guaranteed Microsoft - AI-900 –Efficient Valid Braindumps Free

The Actual4Dumps Microsoft AI-900 exam dumps are being offered in three different formats, Here you will find technical information and professional networking technology about Microsoft AI-900 actual exam dumps, which will help advance your certification goals.

The AI-900 would assist applicants in preparing for the Microsoft AI-900 exam successfully in one go AI-900 would provide AI-900 candidates with accurate and real AI-900 Dumps which are necessary to clear the Microsoft AI-900 test quickly.

I believe you will have a good experience when you use the AI-900 study materials, and you can get a good grade in the test Microsoft certification.
