

PECB NIS-2-Directive-Lead-Implementer Questions & Guaranteed NIS-2-Directive-Lead-Implementer Passing

P.S. Free 2026 PECB NIS-2-Directive-Lead-Implementer dumps are available on Google Drive shared by DumpsValid: <https://drive.google.com/open?id=1hul6D8C2VOVbMD1xY5Xr-RC3DF-zNGhB>

No doubt the PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) certification exam is a challenging exam that always gives a tough time to their candidates. However, with the help of DumpsValid PECB Exam Questions, you can prepare yourself quickly to pass the PECB Certified NIS 2 Directive Lead Implementer exam. The DumpsValid PECB NIS-2-Directive-Lead-Implementer Exam Dumps are real, valid, and updated PECB NIS-2-Directive-Lead-Implementer practice questions that are ideal study material for quick PECB Certified NIS 2 Directive Lead Implementer exam dumps preparation.

To cope with the fast growing market, we will always keep advancing and offer our clients the most refined technical expertise and excellent services about our NIS-2-Directive-Lead-Implementer exam questions. In the meantime, all your legal rights will be guaranteed after buying our NIS-2-Directive-Lead-Implementer Study Materials. For many years, we have always put our customers in top priority. Not only we offer the best NIS-2-Directive-Lead-Implementer training prep, but also our sincere and considerate attitude is praised by numerous of our customers.

Guaranteed NIS-2-Directive-Lead-Implementer Passing & NIS-2-Directive-Lead-Implementer Cost Effective Dumps

Different from other similar education platforms, the NIS-2-Directive-Lead-Implementer study materials will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The NIS-2-Directive-Lead-Implementer study materials are absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the NIS-2-Directive-Lead-Implementer Study Materials more suitable for users of various cultural levels. If just only one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the NIS-2-Directive-Lead-Implementer study materials provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.
Topic 2	<ul style="list-style-type: none"> • Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.
Topic 3	<ul style="list-style-type: none"> • Cybersecurity controls, incident management, and crisis management: This domain focuses on Security Operations Managers and Incident Response Coordinators and involves implementing cybersecurity controls, managing incident response activities, and handling crisis situations. It ensures organizations are prepared to prevent, detect, respond to, and recover from cybersecurity incidents effectively.
Topic 4	<ul style="list-style-type: none"> • Planning of NIS 2 Directive requirements implementation: This domain targets Project Managers and Implementation Specialists focusing on how to initiate and plan the rollout of NIS 2 Directive requirements. It includes using best practices and methodologies to align organizational processes and cybersecurity programs with the directive's mandates.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q72-Q77):

NEW QUESTION # 72

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on the scenario above, answer the following question:

Is the role of the MHospital's CSIRT regarding vulnerability assessment in alignment with the requirements of Article 11 of the NIS 2 Directive?

- A. No, according to Article 11, the CSIRT should not conduct scanning of the network and information systems of the entity as this should be done during the coordinated vulnerability disclosure
- **B. Yes, the role of the CSIRT is consistent with vulnerability assessment requirements specified in Article 11**
- C. No, the CSIRT should not be involved in vulnerability management, as defined in Article 11

Answer: B

NEW QUESTION # 73

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established as asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

In terms of the NIST Framework, under which implementation tier does StellarTech fall based on the level of implementation of its risk management measures within the company? Refer to scenario 4.

- A. Tier 4: Adaptive
- B. Tier 3: Repeatable
- C. ITier 2: Risk informed

Answer: A

NEW QUESTION # 74

According to recital 77 of NIS 2 Directive, who holds the primary responsibility for ensuring the security of networks and information systems?

- A. Consumers of digital services
- B. Essential and important entities
- C. Government agencies exclusively

Answer: B

NEW QUESTION # 75

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their

network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

According to scenario 2, as a first step toward the NIS 2 Directive implementation, MHospital decided to conduct a gap analysis to assess its current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive. Is this in alignment with best practices?

- A. No, the initial step should have been a risk assessment to identify potential cybersecurity vulnerabilities
- B. No, the initial step should have been a scop assessment to determine the scope of the company's compliance
- **C. Yes, a gap analysis should be initially conducted before taking any further actions to implement the Directive**

Answer: C

NEW QUESTION # 76

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

According to scenario 2, MHospital is committed to issuing an official notification within four days of identifying an incident. Is this in compliance with the NIS 2 Directive requirements?

- A. No, the official notification should be issued within 48 hours of identifying the incident
- **B. Yes, the official notification should be issued within 96 hours of identifying the incident**
- C. No, the official notification should be issued within 72 hours of identifying the incident

Answer: B

NEW QUESTION # 77

.....

Our NIS-2-Directive-Lead-Implementer study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our NIS-2-Directive-Lead-Implementer study materials passed their exam and got their certificate successfully, it is no doubt that it means our NIS-2-Directive-Lead-Implementer study materials have a 99% pass rate. So our product will be a very good choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our NIS-2-Directive-Lead-Implementer Study

Materials as your study tool, our product will lend you a good helping hand. If you are willing to take our NIS-2-Directive-Lead-Implementer study materials into more consideration, it must be very easy for you to pass your exam in a short time.
