

Reliable HPE7-A08 Exam Testking - Real HPE7-A08 Questions

Answer: D

Question: 4

You need to run a packet capture on a CX switch and be able to view the full output on a remote device in real-time. What is the best way to do this?

- A. Configure a mirror session using ERSPAN to a computer running Wireshark
- B. Inspect the summary of the packets in real time on the switch using tcpdump
- C. Configure a mirror session with another port on the switch as the destination
- D. Configure a mirror session to the CPU, use tshark to capture it to a PCAP file

Answer: A

Question: 5

When configuring a multicast solution on HPE Aruba Networking CX switches, what needs to be configured on the access switch to enable efficient traffic flow?

- A. PIM on VLAN
- B. IGMP-snooping on VLAN
- C. IGMP on VLAN
- D. IGMP-snooping on SVI

Answer: B

If you are on the bus, you can choose the APP version of HPE7-A08 training engine. On one hand, after being used for the first time in a network environment, you can use it in any environment. The APP version of HPE7-A08 Study Materials can save you traffic. And on the other hand, the APP version of HPE7-A08 exam questions can be applied to all kinds of electronic devices, so that you can practice on the IPAD or phone.

HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.

Topic 2	Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.
Topic 3	Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.
Topic 4	Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.

Real HP HPE7-A08 Questions | HPE7-A08 Latest Braindumps Book

With HPE7-A08 study engine, you will get rid of the dilemma that you work hard but cannot improve. With our HPE7-A08 learning materials, you can spend less time but learn more knowledge than others. HPE7-A08 exam questions will help you reach the peak of your career. Just think of that after you get the HPE7-A08 Certification, you will have a lot of opportunities of going to bigger and better company and getting higher incomes! what a brighter future!

HPE Aruba Networking Switching Professional Exam Sample Questions (Q149-Q154):

NEW QUESTION # 149

Refer to the exhibit:

SW-A is the Layer 3 gateway for:

- * Server-A in VLAN 100, subnet 10.100.100.0/24
- * Client-A in VLAN 20, subnet 10.100.20.0/24
- * Client-B in VLAN 30, subnet 10.100.30.0/24

What must be done to prevent rogue DHCP servers in VLAN 30 on SW-B?

- A. Enable dhcpv4-snooping trust 10.100.100.10 on VLAN 30
- **B. Enable dhcpv4-snooping authorized-server 10.100.100.10 on VLAN 30**
- C. Enable dhcpv4-snooping globally and on interface VLAN 30
- D. Enable snooping globally and on VLAN 30

Answer: B

Explanation:

To prevent rogue DHCP servers in a VLAN, DHCP snooping authorized-server commands are used to specify trusted DHCP servers allowed to respond.

Option A (dhcpv4-snooping trust 10.100.100.10) configures a trusted port, but it is not VLAN specific and not precise enough for this purpose.

Enabling DHCP snooping globally and on VLAN or interface (Options C and D) are prerequisites but do not prevent rogue servers unless authorized servers are defined.

Option B correctly enables an authorized DHCP server IP on VLAN 30, blocking unauthorized DHCP responses.

NEW QUESTION # 150

An administrator wants to leverage the Network Analysis Engine (NAE) feature on AOS-CX switches to perform root cause analysis and to assist in quickly identifying problems. Which two AOS-CX databases does the administrator have access to when implementing scripts? (Select two.)

- A. Audit
- B. Configuration
- **C. VSX**
- D. API
- **E. Time-series**

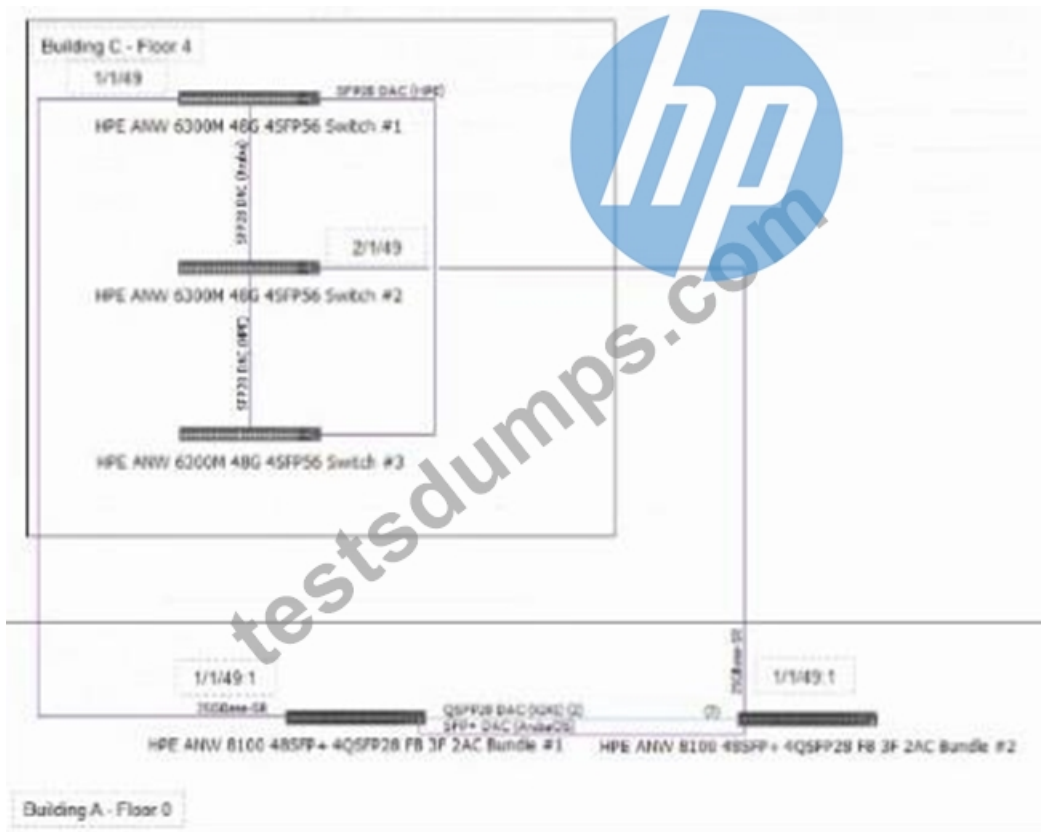

Answer: C,E

NEW QUESTION # 151

Refer to the exhibit: A senior network architect has created the configuration above. You are implementing the setup in Building A and C.

The actual fiber distance between the building locations is 200m / 656ft utilizing OM4 cabling.

What needs to be changed in the configuration based on the actual environmental conditions to complete the installation and 7 other CX 6300 VSF stack connections in the future?

- A. Replace the 25GR optics with 10SR
- B. Replace the 25GR optics with 10LR
- C. Replace the 25GR optics with 25LR
- D. Replace the 25GR optics with 25SR

Answer: D

NEW QUESTION # 152

Which CLI command displays real-time CPU and memory usage of an Aruba CX switch?

- A. show system resource-utilization
- B. show cpu-memory
- C. show clock
- D. show log

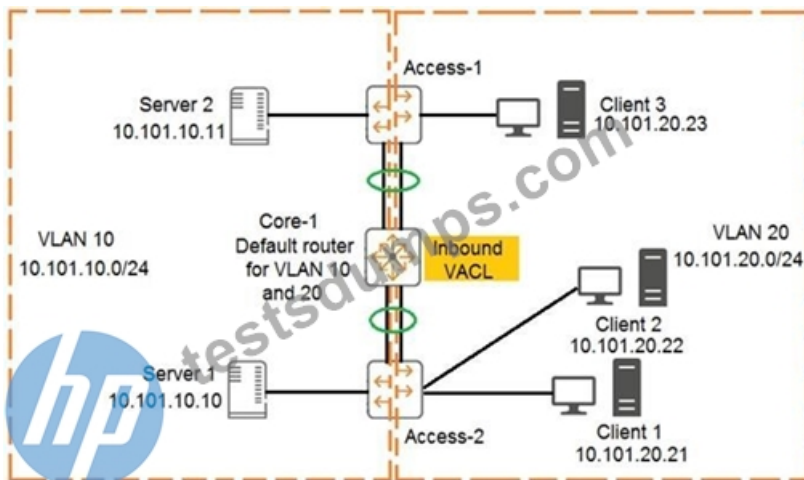

Answer: A

Explanation:

The show system resource-utilization command provides CPU and memory statistics, helping in performance monitoring and capacity planning.

NEW QUESTION # 153

Examine the network exhibit:

The ACL configuration defined on Core-1 is as follows:

```
Core-1(config)# access-list ip example
Core-1(config-acl-ip)# permit ip 10.101.20.21/32 any eq 23
Core-1(config-acl-ip)# permit ip 10.101.20.21/32 eq 23 any
Core-1(config-acl-ip)# exit
Core-1(config)# vlan 20
Core-1(config-if)# apply access-list example in
```

If telnet was being used, which device connection would be permitted and functional in both directions? (Choose two.)

- A. Client 1 to Client 3
- B. Server 1 to Client 1
- C. Client 3 to Client 2
- D. Client 1 to Client 2
- E. Server 2 to Client 2

Answer: B,D

Explanation:

B is correct because the traffic never crosses the core so the VACL is not used.

D is correct because the server is inbound to VLAN 10 so VACL is not used and return traffic is permitted by VACL.

NEW QUESTION # 154

.....

It is understandable that different people have different preference in terms of HPE7-A08 study guide. Taking this into consideration, and in order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our HPE7-A08 Preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one version of HPE7-A08 exam questions as you like.
