Implementing and Configuring Cisco Identity Services Engine v1.0 (300-715)

Exam Description: Implementing and Configuring Cisco Identity Services Engine v1.0 (ISE 300-715) is a 90-minute exam associated with the CCNP Security Certification. This exam tests a candidate's knowledge of Cisco Identity Services Engine, including architecture and deployment, policy enforcement, Web Auth and guest services, profiler, BYOD, endpoint compliance, and network access device administration. The course, Implementing and Configuring Cisco Identity Services Engine, helps candidates to prepare for this exam.

The following topics are general guidelines for the content likely to be included on the exam. However, other related topics may also appear on any specific delivery of the exam. To better reflect the contents of the exam and for clarity purposes, the guidelines below may change at any time without notice.

10%	1.0	Architecture and Deployment
	1.1	Configure personas
	1.2	Describe deployment options
25%	2.0	Policy Enforcement
	2.1	Configure native AD and LDAP
	2.2	Describe identity store options
	2.3.a	LDAP
	2.3.b	AD
	2.3.c	PKI
	2.3.d	OTP
	2.3.e	Smart Card
	2.3.f	Local
	2.3	Configure wired/wireless 802.1X network access
	2.4	Configure 802.1X phasing deployment
	2.5.a	Monitor mode
	2.5.b	Low impact
	2.5.c	Closed mode
	2.5	Configure network access devices
	2.6	Implement MAB
	2.7	Configure Cisco TrustSec
	2.8	Configure policies including authentication and authorization profiles

There is no need to worry about virus on buying electronic products. For PrepAwayTest have created an absolutely safe environment and our exam question are free of virus attack. We make endless efforts to assess and evaluate our 300-715 exam question' reliability for a long time and put forward a guaranteed purchasing scheme. If there is any doubt about it, professional personnel will handle this at first time, and you can also have their remotely online guidance to install and use our 300-715 Test Torrent.

Cisco 300-715 certification exam is designed for network professionals who want to specialize in the implementation and configuration of Cisco Identity Services Engine (ISE). 300-715 exam is meant to validate the skills and knowledge required to implement and manage network access security using Cisco ISE solutions. Successful completion of 300-715 exam will lead to the Cisco Certified Network Professional Security (CCNP Security) certification.

Cisco 300-715 Certification Exam is intended for network security professionals who want to enhance their knowledge and skills in the implementation and configuration of the Cisco ISE solution. Candidates who pass 300-715 exam will have demonstrated their ability to configure and manage a Cisco ISE solution in a network environment, which is a valuable skillset in today's increasingly complex and dynamic network security landscape.

Exam 300-715 Simulator Online Reliable Cisco Certifications | Detailed 300-715 Answers

We all know that 300-715 learning guide can help us solve learning problems. But if it is too complex, not only can't we get good results, but also the burden of students' learning process will increase largely. Unlike those complex and esoteric materials, our 300-715 Preparation prep is not only of high quality, but also easy to learn. For our professional experts simplified the content of the 300-715 exam questions for all our customers to be understood.

Cisco 300-715 Exam is a valuable certification for professionals who work with Cisco ISE solutions. It validates their knowledge and skills in implementing and configuring network access security using Cisco ISE, and can help them advance their careers and improve their organizations' security posture.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q62-Q67):

NEW QUESTION # 62

A Cisco ISE engineer is creating certificate authentication profile to be used with machine authentication for the network. The engineer wants to be able to compare the user-presented certificate with a certificate stored in Active Directory. What must be done to accomplish this?

- A. Add the subject alternative name and the common name to the CAP
- **B. Enable the option for performing binary comparison.**
- C. Configure the user-presented password hash and a hash stored in Active Directory for comparison.
- D. Use MS-CHAPv2 since it provides machine credentials and matches them to credentials stored in Active Directory.

Answer: B

NEW QUESTION # 63

A network engineer is configuring Cisco TrustSec and needs to ensure that the Security Group Tag is being transmitted between two devices. Where in the Layer 2 frame should this be verified?

- A. 802.1 AE header
- **B. CMD field**
- C. 802.1Q field
- D. Payload

Answer: B

Explanation:

Explanation

NEW QUESTION # 64

How is policy services node redundancy achieved in a deployment?

- **A. by utilizing RADIUS server list on the NAD**
- B. by deploying both primary and secondary node
- C. by enabling VIP
- D. by creating a node group

Answer: A

Explanation:

Node groups are optional and they enhance the profiler service mostly. The redundancy of PSN availability is dictated by the Radius Server list order on the NAD.

NEW QUESTION # 65

Which three default endpoint identity groups does cisco ISE create? (Choose three)

- A. end point
- B. Unknown
- C. profiled
- D. blacklist
- E. whitelist

Answer: B,C,D

Explanation:

Default Endpoint Identity Groups Created for Endpoints

Cisco ISE creates the following five endpoint identity groups by default: Blacklist, GuestEndpoints, Profiled, RegisteredDevices, and Unknown. In addition, it creates two more identity groups, such as Cisco-IP-Phone and Workstation, which are associated to the Profiled (parent) identity group. A parent group is the default identity group that exists in the system.

NEW QUESTION # 66

An organization is hosting a conference and must make guest accounts for several of the speakers attending. The conference ended two days early but the guest accounts are still being used to access the network. What must be configured to correct this?

- A. Navigate to the Guest Portal and delete the guest accounts.
- B. Create an authorization rule denying sponsored guest access.
- C. Navigate to the Sponsor Portal and suspend the guest accounts.
- D. Create an authorization rule denying guest access.

Answer: D
