## **Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q229-Q234):**

**NEW QUESTION # 229**

A company has a cloud-based installation of Dynamics 365 Finance. The company also has Dynamics 365 Sales and Customer Service systems.

The company implements an analytical reports solution.

You need to select the applicable storage feature for each requirement.

Which storage feature should you use to meet each requirement? To answer, drag the appropriate storage options to the correct requirements. Each storage option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Answer:**

Explanation:

Explanation:

**NEW QUESTION # 230**

You create a Power Apps app to display customer feedback.

You need to submit and display customer feedback for each sales order.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

**Actions**

**Answer area**

- 1 Navigate to the Sales order form.
- 2 Personalize tile page.
- 3 Configure and embed the app.
- 4 Refresh the browser.

**NEW QUESTION # 231**

A company uses Dynamics 365 Finance.

The company plans to send banking information by using Electronic reporting (ER).

You need to create an ER data model.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Design a domain-specific data model**

- ☰ Create the data model.
- ☰ Define the structure of a party participating in a payment process.
- ☰ Define the bank structure for the model.
- ☰ Create the data model configuration.

**Answer Area**

**Answer:**

**Explanation:**

**Design a domain-specific data model**

- ☰ Create the data model.
- ☰ Define the structure of a party participating in a payment process.
- ☰ Define the bank structure for the model.
- ☰ Create the data model configuration.

**Answer Area**

- ☰ Create the data model.
- ☰ Define the structure of a party participating in a payment process.
- ☰ Define the bank structure for the model.
- ☰ Create the data model configuration.

**Explanation:**

Design a domain-specific data model

**Answer Area**

- 1 ☰ Create the data model.
  - 2 ☰ Define the structure of a party participating in a payment process.
  - 3 ☰ Define the bank structure for the model.
  - 4 ☰ Create the data model configuration.
- 

**NEW QUESTION # 232**

You are a Dynamics 365 Finance developer for a company that sells pre-owned vehicles. When the company acquires a new vehicle, vehicle identification (VIN) numbers are added to the VIN field in the CustTable.

You need to create an event handler to validate that new VIN values are at least 10 characters long. Validation must occur when records are saved.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer Area**

Actions	Answer Area
Copy the validatingWrite event handler on the CustTable table object.	
Copy the validateWrite event handler on the CustTable object.	
Add code to perform the validation.	
Copy the onModified event handler on the CustTable object.	
Add the event handler method to a class.	

**Answer:**

Explanation:

Actions	Answer Area
Copy the validatingWrite event handler on the CustTable table object.	Copy the validatingWrite event handler on the CustTable table object.
Copy the validateWrite event handler on the CustTable object.	Add the event handler method to a class.
Add code to perform the validation.	Add code to perform the validation.
Copy the onModified event handler on the CustTable object.	
Add the event handler method to a class.	

Explanation

Step 1: Copy the validatingWrite event handler on the CustTable object (it is either validatingWrite or validatedWrite, there is no such option as validateWrite).

Step 2: Add the event handler method to a class.

Step 3: Add code to perform the validation.

**NEW QUESTION # 233**

You are Dynamics 365 Finance developer.

You need to initialize an embedded Microsoft Power BI report.

Which code segment should you add to the form initialization method?

- A. addReportControl(formGroupControl)
- **B. initializeReportControlInternal(powerBIConfiguration, reportParameters, reportControl, showError)**
- C. deployOrUpdateReport(powerBIConfiguration, reportName, resourceName)
- D. InitializeReportControl(workspaceName, Formgroup)

**Answer: B**

Explanation:

Explanation

PBIReportHelper.initializeReportControl method is used to embed a Power BI report (.pbix resource) in a form group control.
