Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q16-Q21):

NEW QUESTION # 16

Your-company.com recently started using Google Workspace. The CIO is happy with the deployment, but received notifications that some employees have issues with consumer Google accounts (conflict accounts). You want to put a plan in place to address this concern. What should you do?

- A. Use the Transfer tool for unmanaged users to find the conflict accounts.
- B. Use the conflict account remove tool to remove the accounts from Google Workspace.
- C. Rename the accounts to temp@your-company.com, and recreate the accounts.
- D. Ask users to request a new Google Workspace account from your local admin.

Answer: A

Explanation:

Access the Transfer Tool:

In the Google Workspace Admin console, navigate to "Users" > "Transfer tool for unmanaged users".

Identify Conflict Accounts:

Use the tool to search for unmanaged users (conflict accounts) that have email addresses matching your company domain.

Send Transfer Requests:

Send transfer requests to the identified unmanaged users, asking them to transfer their accounts to your Google Workspace domain.

Complete the Transfer:

Guide the users through the transfer process to ensure their accounts are moved to the managed Google Workspace environment.

Verify the transfer completion and resolve any remaining conflicts.

NEW QUESTION # 17

An employee has left your organization and their Drive data must be retained for three years. The retention rule has been set for three years. You must ensure the employee's data is visible in Vault and accessible to the Vault Administrator in the most cost-effective way. What should you do?

- A. Change ownership of the Drive data to the user's Manager, then delete the user.
- **B. Assign an Archive User (AU) license to the user.**
- C. Suspend the user until the end of the three-year period.
- D. Export the user's Drive data from Vault, then delete the user.

Answer: B

NEW QUESTION # 18

Your organization is on Google Workspace Enterprise and allows for external sharing of Google Drive files to facilitate collaboration with other Google Workspace customers. Recently you have had several incidents of files and folders being broadly shared with external users and groups. Your chief security officer needs data on the scope of external sharing and ongoing alerting so that external access does not have to be disabled.

What two actions should you take to support the chief security officer's request? (Choose two.)

- **A. Create a custom Dashboard for external sharing in the Security Investigation Tool.**
- B. Review total external sharing in the Aggregate Reports section.
- C. Automatically block external sharing using DLP rules.
- D. Review who has viewed files using the Google Drive Activity Dashboard.
- **E. Create an alert from Drive Audit reports to notify of external file sharing.**

Answer: A,E

Explanation:

Create an Alert for External Sharing:

Access Google Admin Console: Go to admin.google.com and sign in with your administrator account.

Navigate to Rules: Go to "Security" > "Alert Center" > "Manage Rules".

Create a New Rule: Select "Create Rule" and choose "Drive Audit" as the event source.

Configure Rule Settings: Set the conditions to trigger alerts when files or folders are shared externally.

Set Notification Preferences: Configure who should receive the alerts and how they should be notified.

Save the Rule: Save and activate the rule to start receiving alerts on external sharing activities.

Create a Custom Dashboard for External Sharing:

Access Security Investigation Tool: In the Admin console, go to "Security" > "Investigation Tool".

Create a New Investigation: Click "Create" and select "Drive" as the data source.

Set Up Investigation Parameters: Define the parameters to track external sharing activities (e.g., file shared externally, users involved).

Create Dashboard: Save the investigation as a custom dashboard to continuously monitor external sharing activities.

Review and Monitor: Regularly review the dashboard and set up automated reports if necessary.

NEW QUESTION # 19

The CEO of your company has indicated that messages from trusted contacts are being delivered to spam, and it is significantly affecting their work. The messages from these contacts have not always been classified as spam. Additionally, you recently configured SPF, DKIM, and DMARC for your domain. You have been tasked with troubleshooting the issue.

What two actions should you take? (Choose two.)

- **A. Obtain the message header and analyze using Google Workspace Toolbox.**
- B. Conduct an Email log search to trace the message route.
- C. Review the contents of the messages in Google Vault.
- **D. Set up a Gmail routing rule to whitelist the sender.**
- E. Validate that your domain is not on the Spamhaus blacklist.

Answer: A,D

Explanation:

* Obtain the Message Header: Ask the CEO to provide the full email header of the affected messages.

* In Gmail, this can be done by opening the email, clicking on the three dots in the top right corner, and selecting "Show original".

* Analyze the Header Using Google Workspace Toolbox:

* Go to the Google Workspace Toolbox.

* Paste the email header into the toolbox and analyze it to identify where the email might be flagged as spam and why.

* Email Log Search:

* Log into the Google Admin console at admin.google.com.

* Navigate to Reports > Email Log Search.

* Conduct a search using the sender's email address, date, and other relevant details to trace the message route.

* Analyze the logs to see where and why the message might have been marked as spam.

NEW QUESTION # 20

The credentials of several individuals within your organization have recently been stolen. Using the Google Workspace login logs, you have determined that in several cases, the stolen credentials have been used in countries other than the ones your organization works in. What else can you do to increase your organization's defense-in-depth strategy?

- A. Enforce higher complexity passwords by rolling it out to the affected users.
- **B. Use Context-Aware Access to deny access to Google services from geo locations other than the ones your organization operates in.**
- C. Use Mobile device management geo-fencing to prevent malicious actors from using these stolen credentials.
- D. Implement an IP block on the malicious user's IPs under Security Settings in the Admin Console.

Answer: B
