Verification

To verify the configuration, go to Protection > Protection Policies.

Select the HourlySnapshots policy.

You should see the configured snapshot rule ("HourlyRule") with the specified settings.

Key Considerations

Snapshot Frequency: The snapshot rule you created will take hourly snapshots of the volume every weekday (Monday to Friday).

Retention Period: The snapshots will be retained for 5 days before being automatically deleted.

Storage Space: Snapshots consume storage space. Ensure you have enough free space to accommodate the snapshots taken based on the frequency and retention period.
