## HP Aruba Certified Network Security Professional - HPE7-A02 Free Exam Questions

### QUESTION NO: 26

A company has a variety of HPE Aruba Networking solutions, including an HPE Aruba Networking infrastructure and HPE Aruba Networking ClearPass Policy Manager (CPPM). The company passes traffic from the corporate LAN destined to the data center through a third-party SXX firewall. The company would like to further protect itself from internal threats.

What is one solution that you can recommend?

- ☐ A. Have the third-party firewall send Syslog to CPPM, which can work with network devices to lock internal attackers out of the network.
- ☐ B. Use tunnel mode SSIDs and user-based tunneling (UBT) on AOS-CX switches to pass all internal traffic directly through the third-party firewall.
- ☐ C. Add ClearPass Device Insight (CPDI) to the solution; integrate it with the third-party firewall to develop more complete device profiles.
- ☐ D. Configure CPPM to poll the third-party firewall for a broad array of information about internal clients, such as profile and posture.

Hide answers/explanation

Discussion 0

Correct Answer: A

To further protect the company from internal threats, you can recommend having the third-party SXX firewall send Syslog to HPE Aruba Networking ClearPass Policy Manager (CPPM). ClearPass can analyze these logs to detect potential security incidents and coordinate with network devices to respond to threats. By integrating Syslog data from the firewall, CPPM can identify malicious activities and take actions such as locking internal attackers out of the network or triggering specific security policies. This approach enhances the company's internal threat detection and response capabilities.

### QUESTION NO: 27

A company wants HPE Aruba Networking ClearPass Policy Manager (CPPM) to respond to Syslog messages from its Check Point firewall. You have added the firewall as an event source and set up an event service. However, test Syslog messages are not triggering the expected actions.

What is one CPPM setting that you should check?

- ☐ A. ClearPass Device Insight integration is disabled.
- ☐ B. The Check Point Extension is installed through ClearPass Guest.
- ☐ C. The CoA delay value is set to 0 on the server.
- ☐ D. Ingress Event Dictionaries for Check Point messages are enabled.

Hide answers/explanation

Discussion 0

Correct Answer: D

To ensure that HPE Aruba Networking ClearPass Policy Manager (CPPM) responds correctly to Syslog messages from a Check Point firewall, you need to check that the Ingress Event Dictionaries for Check Point messages are enabled. These dictionaries are necessary for CPPM to properly interpret and respond to the Syslog messages received from the firewall.

1. Event Dictionaries: Ingress Event Dictionaries allow CPPM to understand the specific format and content of Syslog messages from various sources, such as Check Point firewalls.

2. Message Interpretation: Without these dictionaries enabled, CPPM may not correctly interpret the Syslog messages, leading to a failure in triggering the expected actions.

3. Configuration Check: Ensuring that the dictionaries are enabled is crucial for the proper functioning of the event service and accurate response to security events.

BTW, DOWNLOAD part of GuideTorrent HPE7-A02 dumps from Cloud Storage: <https://drive.google.com/open?id=1c18Wmh7e50FkvvcpuLApINzJfUWf6s2>

If you have registered HP HPE7-A02 test, you can enter our GuideTorrent HP HPE7-A02. You may try our GuideTorrent HP HPE7-A02 free demo to decide whether to buy or not. You can also download pdf real questions and answers. GuideTorrent HP HPE7-A02 certification training must help you to pass the exam easily. Its practice test is the most effective. We promise to help you to get the certification. Without the certification, we will give you FULL REFUND of your purchase fees. On request we can provide you with another exam of your choice absolutely free of cost.

The clients can use the shortest time to prepare the exam and the learning only costs 20-30 hours. The questions and answers of our HPE7-A02 study materials are refined and have simplified the most important information so as to let the clients use little time to learn. The clients only need to spare 1-2 hours to learn our HPE7-A02 Study Materials each day or learn them in the weekends. Commonly speaking, people like the in-service staff or the students are busy and don't have enough time to prepare the exam. Learning our HPE7-A02 study materials can help them save the time and focus their attentions on their major things.

## HPE7-A02 Valid Learning Materials, HPE7-A02 PDF Questions

The web-based HPE7-A02 practice test is accessible via any browser. This HPE7-A02 mock exam simulates the actual HP HPE7-A02 exam and does not require any software or plugins. Compatible with iOS, Mac, Android, and Windows operating systems, it provides all the features of the desktop-based HPE7-A02 Practice Exam software.

## HP Aruba Certified Network Security Professional Exam Sample Questions (Q44-Q49):

### NEW QUESTION # 44

A company wants you to create a custom device fingerprint on CPPM with rules for profiling a group of specialized devices. What is one requirement?

- A. Connecting a known device of this type and getting it discovered in CPPM's Endpoints Repository.
- B. Pre-defining the desired attributes and rules in an XML format file.
- C. Enabling HPE Aruba Networking ClearPass Device Insight integration with the correct Data Collector token.
- D. Disabling the "Automatically download Endpoint Profiler Fingerprints" feature in cluster-wide parameters.

**Answer: A**

Explanation:

\* Custom Device Fingerprinting on CPPM:

\* To create a custom fingerprint, you first need to connect a known device of that type to the network.

\* CPPM will discover the device in its Endpoints Repository, allowing you to analyze its attributes (e.g., MAC OUI, DHCP options) and create custom profiling rules.

\* Option Analysis:

\* Option A: Correct. Discovering a known device in the Endpoints Repository is a prerequisite for creating accurate custom fingerprint rules.

\* Option B: Incorrect. CPDI integration is not required for custom fingerprints on CPPM.

\* Option C: Incorrect. XML rules are not pre-defined; they are created dynamically based on observed attributes.

\* Option D: Incorrect. The "Automatically download Endpoint Profiler Fingerprints" setting is unrelated to custom profiling.

### NEW QUESTION # 45

HPE Aruba Networking ClearPass Policy Manager (CPPM) uses a service to authenticate clients. You are now adding the Endpoints Repository as an authorization source for the service, and you want to add rules to the service's policies that apply different access levels based, in part, on a client's device category. You need to ensure that CPPM can apply the new correct access level after discovering new clients' categories.

What should you enable on the service?

- A. The Use cached Roles and Posture attributes from previous sessions option in the Enforcement tab
- B. The Posture Compliance option in the Service tab
- C. The Audit End-host option in the Service tab
- D. The Profile Endpoints option in the Service tab

**Answer: D**

Explanation:

To ensure that HPE Aruba Networking ClearPass Policy Manager (CPPM) can apply the correct access levels based on a client's device category after discovering new clients, you need to enable the "Profile Endpoints" option in the Service tab. This option allows CPPM to profile and categorize endpoints dynamically, ensuring that the appropriate access levels are applied based on the device's characteristics. Enabling this feature ensures that new devices are accurately profiled and that access policies can be enforced based on the updated device information.

Reference: Aruba ClearPass documentation and profiling guides detail the configuration and use of endpoint profiling to enhance access control and policy enforcement based on device categories.

### NEW QUESTION # 46

The security team needs you to show them information about MAC spoofing attempts detected by HPE Aruba Networking ClearPass Policy Manager (CPPM).

What should you do?

- A. Show the security team the CPPM Endpoint Profiler dashboard.
- B. Integrate CPPM with ClearPass Device Insight (CPDI) and run a security report on CPDI.
- C. Export the Access Tracker records on CPPM as an XML file.
- D. Use ClearPass Insight to run an Active Endpoint Security report.

**Answer: D**

Explanation:

To show the security team information about MAC spoofing attempts detected by HPE Aruba Networking ClearPass Policy Manager (CPPM), you should use ClearPass Insight to run an Active Endpoint Security report. ClearPass Insight provides comprehensive reporting capabilities that include detailed information on security incidents, such as MAC spoofing attempts. By generating this report, you can provide the security team with a clear overview of the detected spoofing activities, including the endpoints involved and the context of the events.

Reference: The ClearPass documentation and Insight reporting guide offer detailed instructions on generating and interpreting Active Endpoint Security reports, which include data on MAC spoofing and other security incidents.

#### NEW QUESTION # 47

A company has HPE Aruba Networking APs running AOS-10 and managed by HPE Aruba Networking Central. The company also has AOS-CX switches. The security team wants you to capture traffic from a particular wireless client. You should capture this client's traffic over a 15 minute time period and then send the traffic to them in a PCAP file.

What should you do?

- A. Go to that client in HPE Aruba Networking Central. Use the "Live Events" page to run a packet capture.
- B. Access the CLI for the client's AP's switch. Set up a mirroring session between the AP's port and a management station running Wireshark.
- **C. Go to the client's AP in HPE Aruba Networking Central. Use the "Security" page to run a packet capture.**
- D. Access the CLI for the client's AP. Set up a mirroring session between its radio and a management station running Wireshark.

**Answer: C**

Explanation:

To capture traffic from a particular wireless client for a 15-minute period and then send the traffic in a PCAP file, you should go to the client's AP in HPE Aruba Networking Central and use the "Security" page to run a packet capture. This method allows you to directly capture the client's traffic from the AP managing the wireless connection, ensuring that you gather the relevant traffic data for analysis.

1. Centralized Management: HPE Aruba Networking Central provides a centralized interface for managing and monitoring APs, making it easy to initiate packet captures.

2. Security Page: The "Security" page in Aruba Central includes tools for running packet captures, allowing you to specify the duration and other parameters.

3. Ease of Use: This approach simplifies the process by using the built-in features of Aruba Central, avoiding the need for complex CLI commands or additional hardware.

Reference: Aruba Central's documentation and user guides detail the steps for performing packet captures through the Central interface, including capturing traffic from specific clients and generating PCAP files for analysis.

#### NEW QUESTION # 48

A company has wired VoIP phones, which transmit tagged traffic and connect to AOS-CX switches. The company wants to tunnel the phones' traffic to an HPE Aruba Networking gateway for applying security policies.

What is part of the correct configuration on the AOS-CX switches?

- **A. A UBT reserved VLAN set to a VLAN dedicated for that purpose**
- B. VLANs assigned to the VoIP phones configured on the switch uplinks
- C. A VXLAN VNI mapped to the VLAN assigned to the VoIP phones
- D. UBT mode set to VLAN extend

**Answer: A**

Explanation:

To tunnel VoIP phone traffic from AOS-CX switches to an HPE Aruba Networking gateway, you need to configure a User-Based Tunneling (UBT) reserved VLAN on the switches. This VLAN is dedicated for tunneling purposes and ensures that the VoIP traffic is correctly identified and tunneled to the gateway where security policies can be applied.

1. UBT Configuration: Setting a UBT reserved VLAN ensures that the switch knows which VLAN to use for tunneling traffic to the gateway.

2. Traffic Tunneling: The reserved VLAN helps in segregating the VoIP traffic, ensuring it is handled securely and according to the

configured policies at the gateway.

3. Policy Application: By tunneling the traffic, the gateway can apply advanced security policies to the VoIP traffic.

## NEW QUESTION # 49

.....

For the convenience of the Exams candidates, the difficult portions of the syllabus have been explained with the help of experts to be simplified. One remarkable feature of HPE7-A02 actual dumps questions and answers is their similarity with the real exam scenario. They not only give you understanding of the HPE7-A02 Exams but also impart you an opportunity to master it. To enhance further your exam ability and strengthen your learning, you can benefit yourself getting practice HP real dumps.

**HPE7-A02 Valid Learning Materials:** <https://www.guidetorrent.com/HPE7-A02-pdf-free-download.html>

HPE7-A02 updated study material contains the best valid and comprehensive knowledge points, with which you can easily grasp the key point and know the methods to solve the problem. So before choosing our HPE7-A02 training vce pdf, please take a look briefly about HPE7-A02 free pdf training with us together. To fit in this amazing and highly accepted exam, you must prepare for it with high-rank practice materials like our Aruba Certified Network Security Professional Exam HPE7-A02 study materials.

The exam focuses on processing order, blocking HPE7-A02 inheritance enforced) delegation, loopback processing modes, and so on, Freemium business models giving goods or services away to a lot HPE7-A02 Vce Torrent of people in hopes that a subset to pay for something have also proved to be effective.

## HPE7-A02 Vce Torrent Is The Useful Key to Pass Aruba Certified Network Security Professional Exam

HPE7-A02 updated study material contains the best valid and comprehensive knowledge points, with which you can easily grasp the key point and know the methods to solve the problem.

So before choosing our HPE7-A02 training vce pdf, please take a look briefly about HPE7-A02 free pdf training with us together. To fit in this amazing and highly accepted exam, you must prepare for it with high-rank practice materials like our Aruba Certified Network Security Professional Exam HPE7-A02 study materials.

Which is why you should certainly train with the HPE7-A02 practice exams only available through GuideTorrent, The HP market has become so competitive and challenging with time.
