In the other words, passing the exam once will no longer be a dream.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q92-Q97):

NEW QUESTION # 92

If a lens has four entities, which entity within the lens structure would not have a parent reference?

- A. Bottom entity
- B. Second-level entity
- C. Third-level entity
- **D. Top-level entity**

Answer: D

Explanation:

Explanation

According to the ServiceNow documentation¹, a lens is a hierarchical structure that consists of entities and relationships. An entity is a data object that represents a business concept, such as a project, a demand, or a resource. A relationship is a link between two entities that defines how they are connected. A lens can have up to four levels of entities, each with a parent reference to the entity above it, except for the top-level entity, which has no parent reference. The top-level entity is the root of the lens and defines its scope and type. For example, a project lens has a project as the top-level entity, and a demand lens has a demand as the top-level entity.

NEW QUESTION # 93

How can cost plans be generated from resource assignments?

Choose 2 answers

- **A. Run a scheduled job to automatically generate labor costs from resource assignments**
- B. Update the appropriate Resource Management property
- **C. Select the 'Generate labor costs' button on Project Workspace**
- D. Select the 'Generate cost' button in Resource Management Workspace

Answer: A,C

NEW QUESTION # 94

As a demand manager, you can view an artifact from a demand. What artifacts are part of a demand?

- A. Stories, Vulnerability Tasks, Enhancements.
- B. Incidents, Problems, Change.
- C. Project, Defect, Requests.
- **D. Decision, Risk, Requirements.**

Answer: D

Explanation:

Explanation

According to the ServiceNow documentation¹, a demand manager can view and edit the following artifacts from a demand:

Decision: A decision that affects the demand or its outcome².

Risk: A risk that could impact the demand or its outcome³.

Requirement: A requirement that defines the scope or functionality of the demand⁴.

The other options are not artifacts of a demand, but rather related entities that can be created from a demand or linked to a demand.

NEW QUESTION # 95

Which role is needed to group related projects and demands?

- A. `it_project_manager`
- **B. `it_program_manager`**
- C. `it_project_user`
- D. `it_demand_manager`

Answer: B

Explanation:

Explanation

According to the ServiceNow documentation¹, the `it_program_manager` role is needed to group related projects and demands. This role can create and manage programs, which are containers for projects and demands that share a common goal or objective. The other options are incorrect because:

B: `it_project_manager`: The `it_project_manager` role can create and manage projects, but not group them into programs².

C: `it_demand_manager`: The `it_demand_manager` role can create and manage demands, but not group them into programs³.

D: `it_project_user`: The `it_project_user` role can view and edit project tasks, but not create or manage projects, demands, or programs⁴.
