EUNA_2024 Questions and answers are valuable and validity, which will give you some reference for the actual test. Please prepare well for the actual test with our EUNA_2024 practice torrent, 100% pass will be an easy thing.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q23-Q28):

NEW QUESTION # 23

During data migration into a utility network, which process is used to associate related source features with target utility network features?

- A. Validation rules
- **B. Data mapping workbooks**
- C. Connectivity rules

Answer: B

Explanation:

Data mapping workbooks map relationships between source and target features to ensure proper associations.

NEW QUESTION # 24

When configuring valves or switches in ArcGIS Utility Network, are terminals necessary if both sides of the device are equal?

- A. No, terminals are only required if the device is a subnetwork controller
- B. Yes, all devices must have terminals
- C. No, terminals are only required when sides differ, multiple ports exist, or flow is directional

Answer: C

Explanation:

If both sides of a device are identical, terminals are unnecessary. Terminals are used when sides differ or multiple ports exist.

NEW QUESTION # 25

A utility engineer is modeling a power system in ArcGIS Pro and needs to attach a transformer bank to a power pole. Which type of association should be used?

- A. Containment association
- B. Structural attachment association
- C. Connectivity association

Answer: B

Explanation:

Structural attachment associations attach domain network features (e.g., transformer bank) to structure features (e.g., power pole).

NEW QUESTION # 26

In ArcGIS Utility Network, which association type should be used to represent electrical devices (such as fuses or switches) inside a junction box within a substation?

- A. Structural attachment association
- B. Connectivity association
- C. Containment association

Answer: C

Explanation:

Containment associations represent devices housed within a container feature, such as a junction box.

NEW QUESTION # 27

When creating association roles, which deletion semantic ensures that all content or attached features are deleted if the container or structure is deleted?

- A. Restricted deletion semantic
- B. Cascade deletion semantic
- C. Unspecified deletion semantic

Answer: B

Explanation:

Cascade deletion removes all associated content when the container/structure is deleted.

NEW QUESTION # 28
