# DevOps-Foundation Latest Training & Valid Test DevOps-Foundation Vce Free

P.S. Free 2026 Peoplecert DevOps-Foundation dumps are available on Google Drive shared by Prep4sureGuide: https://drive.google.com/open?id=1SNOC9GoqNHXSjXp9IvLapSGKa7cwGYv2

Although at this moment, the pass rate of our Peoplecert DevOps-Foundation exam braindumps can be said to be the best compared with that of other exam tests, our experts all are never satisfied with the current results because they know the truth that only through steady progress can our Peoplecert DevOps-Foundation Preparation materials win a place in the field of exam question making forever.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 2	• Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI • CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 3	• Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.

Topic 4	• Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 5	• Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.

Valid Test DevOps-Foundation Vce Free | Reliable DevOps-Foundation Test Tutorial

Our DevOps-Foundation learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our DevOps-Foundation learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our DevOps-Foundation learning guide is for the world and users are very extensive. In order to give users a better experience, we have been constantly improving. The high quality and efficiency of DevOps-Foundation Test Guide has been recognized by users. The high passing rate of DevOps-Foundation exam training is its biggest feature. As long as you use DevOps-Foundation test guide, you can certainly harvest what you want thing.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20
Which of the following does NOT make DevOps important now?

- A. Consumers have "app" mentalities and expectations
- B. IT must continue to operate in a silo culture
- C. Time to value must accelerate
- D. Enterprises have young, nimble start-up competitors

Answer: B

Explanation:
The urgency for DevOps adoption is driven by increasing market competition, evolving customer expectations, and the need for rapid delivery of value.
* B: Nimble start-ups often deliver faster and more innovatively, putting pressure on established enterprises.
* C: Customers expect continuous improvement and seamless digital experiences ("app mentality").
* D: Reducing time-to-value is essential for staying competitive and meeting business demands.
However,Adescribes a siloed culture-something DevOps actively works to eliminate, not a reason for its importance. In fact, remaining siloed is an obstacle to achieving DevOps benefits, not a driver for adoption.
Therefore,Ais the correct "NOT" choice.

NEW QUESTION # 21
An organization is architecting a DevOps toolchain that includes products from both open source and proprietary software providers.
Which of the following is necessary for applications within the toolchain to connect efficiently and effectively?

- A. Open source applications
- B. Containers

- C. Application Programming Interfaces
- D. Microservices

Answer: C

Explanation:
ADevOps toolchainis an integrated set of tools that supports the entire software delivery lifecycle-planning, coding, building, testing, releasing, deploying, operating, and monitoring. Regardless of whether tools are open source or proprietary, their ability to work together depends onApplication Programming Interfaces (APIs).
APIs define how different software components communicate and exchange data. In a DevOps context, APIs enable:
* Automation by allowing tools to trigger actions in other tools
* Data flow between systems (e.g., CI pipelines updating ticketing systems)
* Integration across heterogeneous environments
A(open source applications) is about licensing, not integration.B(containers) package and run applications consistently but do not inherently integrate tools.D(microservices) is an architectural style for applications, not the integration mechanism between delivery tools.
Therefore,C-APIs-are essential for efficient, effective toolchain integration.

The DevOps Handbook- APIs as Integration Enablers

NEW QUESTION # 22
The CIO of an online retailer is excited about the potential of DevOps for her organization. She tells her managers that she wants DevOps to be fully implemented by the end of the year. Last year, she mandated the same approach for agile software development. When the managers share this information with their teams, they are met with apathy and passive resignation. The staff is tired of the frequent changes in direction.
What can the managers do to encourage their teams to be more enthusiastic about DevOps?

- A. Architect a DevOps toolchain that will demonstrate the value of more automation
- B. Reorganize the department's structure to remove silos and create DevOps teams
- C. Establish and publish goals and metrics for DevOps success
- D. Empower people to participate and contribute their knowledge and ideas

Answer: D

Explanation:
When teams have experienced frequent top-down mandates without adequate involvement, they may feel change fatigue and resist new initiatives. PeopleCert DevOps Foundation v3.6 emphasizes the importance of engagement and empowermentto build buy-in and ownership for DevOps transformation.
Empowering people means involving them in decisions, encouraging contribution of their ideas, and making them active participants in shaping the DevOps adoption plan. This approach builds trust, reduces resistance, and taps into collective knowledge, leading to solutions that are practical and widely accepted.
OptionsA,B, andCcan support DevOps adoption but do not address the root cause of low enthusiasm-lack of involvement.
Empowerment fosters intrinsic motivation, which is essential for sustained cultural change.
Thus,Dis the most effective choice.

NEW QUESTION # 23
Regardless of structure, what should a DevOps teamNOT be?

- A. Flat
- B. Continuously engaged
- C. Isolated
- D. Balanced in terms of people and automation skills

Answer: C

Explanation:
A core goal of DevOps is toeliminate isolationbetween roles, teams, and departments. Isolated teams-cut off from other parts of the value stream-create bottlenecks, reduce visibility, and slow feedback.
While flat hierarchies (A), continuous engagement (C), and balanced skills (D) are positive traits,Bis the opposite of DevOps principles.
Therefore,Bis the correct "NOT" choice.

NEW QUESTION # 24
An organization wants to use experiments to improve its ITSM processes in support of DevOps practices.
Which approach could this organization use to design and implement small, incremental improvements?

- A. Value Stream Mapping
- B. All of the Above
- C. Agile Service Management
- D. Improvement Kata

Answer: D

Explanation:
TheImprovement Katais a structured, scientific approach to continuous improvement. It uses small, iterative steps to move from the current state toward a target condition, testing hypotheses along the way.
In the DevOps context, the Improvement Kata helps teams experiment with process changes, measure outcomes, and adapt quickly-reducing risk while fostering a learning culture. It is especially useful for improving ITSM processes incrementally.
AandBare valuable techniques but serve different purposes-Agile Service Management adapts ITSM to Agile principles, and Value Stream Mapping visualizes and analyzes workflow. While they can complement Improvement Kata,Cis the direct experimental framework for small, incremental improvement.
Thus, the correct answer isC.
