Free PDF 2026 Efficient Network Appliance NS0-528 Examinations Actual Questions

A steadily rising competition has been noted in the tech field. Countless candidates around the globe aspire to be Implementation Engineer - Data Protection Exam in this field. Network Appliance NS0-528 stand out from the rest of the Network Appliance professionals. Once you become Network Appliance certified, a whole new scope opens up to you and you are immediately hired by reputed firms. Even though the Implementation Engineer - Data Protection Exam boosts your career options, you have to pass the NS0-528 Exam. This Implementation Engineer - Data Protection Exam exam serves to filter out the capable from incapable candidates.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 2	<ul style="list-style-type: none"> NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 3	<ul style="list-style-type: none"> Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 4	<ul style="list-style-type: none"> Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.
Topic 5	<ul style="list-style-type: none"> NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

A ransomware attack has compromised all files on a CIFS share. The volume had a retention policy of five daily Snapshot copies, but unfortunately, no Snapshot copies were available. It was confirmed that the cybercriminal accessed only the share and did not gain access to the NetApp ONTAP cluster.

What command should be executed to prevent the quick restore strategy from being compromised?

- A. volume snapshot -autodelete disabled
- B. volume autosize -autogrow disable
- C. volume modify -snapdir-access false**
- D. security multi-admin-verify modify -enabled true

Answer: C

Explanation:

Setting snapdir-access to false prevents users accessing the CIFS/NFS share from viewing or deleting Snapshot copies via the .snapshot directory. This secures the Snapshot restore mechanism from being exposed or tampered with in case of another attack through file shares.

NEW QUESTION # 42

When backing up on-premises NetApp ONTAP volumes to tape using NDMP, which two engines are supported by ONTAP software? (Choose two.)

- A. tar
- B. cpio
- C. SMTape**
- D. dump**

Answer: C,D

Explanation:

When using NDMP (Network Data Management Protocol) to back up ONTAP volumes to tape, ONTAP supports two backup engines:

- * SMTape: Used for block-level backups.
- * dump: Used for file-level backups.

These are the only engines supported by ONTAP for NDMP-based tape backups.

NEW QUESTION # 43

Click the Exhibit button.

You have a SnapProtect v11 environment as shown in the exhibit.

What are the two default Snapshot copies created automatically after creating a Storage Policy. (Choose two.)

- A. Primary (NetApp)
- B. Primary (Tape)
- C. primary (Snap)
- D. Primary (Classic)

Answer: C,D

NEW QUESTION # 44

Which of the following is an example of a physical data protection solution?

- A. Data encryption
- B. Firewall protection
- C. Video surveillance
- D. Access controls

Answer: C

NEW QUESTION # 45

You must create and establish schedules for NetApp Snapshot copies and NetApp SnapMirror replication mirrors, and you need to manage them from a centralized location.

Which two products would satisfy the requirements? (Choose two.)

- A. NetApp SnapCenter
- B. Commvault IntelliSnap
- C. OnCommand System Manager
- D. OnCommand Insight

Answer: A,C

NEW QUESTION # 46

Our Network Appliance NS0-528 practice test software is the most distinguished source for the Network Appliance NS0-528 exam all over the world because it facilitates your practice in the practical form of the NS0-528 Certification Exam. Moreover, you do not need an active internet connection to utilize Implementation Engineer - Data Protection Exam practice exam software.
