### Knowledge WGU Web-Development-Applications Points - Pdf Web-Development-Applications Free

You will receive Web-Development-Applications exam materials immediately after your payment is successful, and then, you can use Web-Development-Applications test guide to learn. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. Once they discover Web-Development-Applications study braindumps, they will definitely want to seize the time to learn. At the same time, regardless of which mode you use, Web-Development-Applications Test Guide will never limit your download times and the number of concurrent users. For the same information, you can use it as many times as you want, and even use together with your friends.

### WGU Web Development Applications Sample Questions (Q19-Q24):

#### NEW QUESTION # 19

Which line of code creates a field that is displayed as a text box with up-and-down arrows and accepts a numeric value of less than 100?

- A. `<input type="range" name="experience" max="100">`
- B. `<input type="range" name="experience" maxlength="100">`
- C. `<input type="number" name="experience" maxlength="100">`
- D. `<input type="number" name="experience" max="100">`

**Answer: D**

Explanation:

> "`<input type="number">`" renders a numeric text box with spinner (up/down arrows). The `max="100"` attribute sets the upper limit for the value that can be entered." Example:

```
```html
```

```
<input type="number" max="100">
```

```
```
```

> `maxlength` only limits string length, not numeric value.

References:

\* MDN Web Docs: `<input type="number">`

\* HTML Specification: number input constraints

---

#### NEW QUESTION # 20

Which HTML5 input type allows users to enter a value from 1 to 100 using a slider control?

- A. text
- B. range
- C. search
- D. number

**Answer: B**

Explanation:

> "The `input` type `range` displays a slider control for selecting numeric values within a specified range."

>

> Example:

```
```html
<input type="range" min="1" max="100">
```
```

\* `number` allows numeric input via keyboard, but not a slider.

\* `text` and `search` are for string input.

References:

\* MDN Web Docs: `<input type="range">`

\* HTML Living Standard: Forms Module

---

Which markup renders a drop-down calendar for selecting dates in most browsers?

Q `<input class="date">` 0 `<input type="*,date">` Q `<input name="date">` 0 `<input id="date">` Here are the corrected and fully formatted answers for Questions 54 through 57, using your requested structure:

---

### NEW QUESTION # 21

What is an example of a logical expression?

- A.  $z \geq 6$
- B.  $6 + 7$
- C.  $z = 7$
- D. `"6" + "7"`

**Answer: A**

Explanation:

> "A logical expression is any expression that returns a Boolean value (true or false). For example, `z >= 6` compares two values and returns `true` if `z` is greater than or equal to 6, and `false` otherwise."

>

> "Expressions like `z = 7` perform assignment, not logic; `"6" + "7"` performs string concatenation; `6 + 7` is arithmetic."

References:

\* MDN Web Docs: Logical operators

\* JavaScript Guide: Expressions and operators

---

### NEW QUESTION # 22

What does a form field default to if the type attribute is omitted from a form?

- A. Range
- B. Date
- C. number
- D. Text

**Answer: D**

Explanation:

If the type attribute is omitted from an `<input>` element, it defaults to text.

\* HTML Input Default Type:

\* Default Type: The default value for the type attribute in an `<input>` element is text.

\* Example:

\* Given the HTML:

```
<input>
```

\* This will render as a text input field.

\* References:

\* MDN Web Docs - `<input>`

\* W3Schools - HTML Input Types

### NEW QUESTION # 23

Given the following CSS code:

Which portion is the rule?

- A. ☐
- **B.** ☒
- C. ☐
- D. ☐

**Answer: B**

Explanation:

In CSS, a rule is composed of a selector and a declaration block. The rule is the entire part that defines how styles should be applied to elements matching the selector.

\* CSS Rule Components:

\* Selector: Identifies the HTML elements to be styled (e.g., body, .name, #item).

\* Declaration Block: Contains one or more declarations, each consisting of a property and a value, enclosed in curly braces {}.

\* Example Analysis:

\* Option A:

```
body {  
background-color: white;  
}
```

This is the full rule, consisting of the selector body and the declaration block { background-color: white; }.

\* Option B:

```
background-color: white;
```

This is just a declaration, not a complete rule.

```
background-color: white,
```

This is an incorrect declaration due to the comma, and not a complete rule.

\* Option D:

```
color: black
```

This is just a declaration, not a complete rule.

\* References:

\* W3C CSS Syntax and Basic Data Types Module Level 3

\* MDN Web Docs - CSS Syntax

### NEW QUESTION # 24

.....

The WGU Web-Development-Applications certification differentiates you from other professionals in the market. Success in the WGU Web-Development-Applications exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the WGU Web-Development-Applications test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for WGU Web Development Applications Web-Development-Applications Exam Preparation. TestKingIT real WGU Web-Development-Applications exam dumps are enough to clear the Web-Development-Applications certification test easily on the first attempt. This is because TestKingIT WGU Web-Development-Applications PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.
