## New 156-315.82 Exam Answers - Reliable 156-315.82 Exam Dumps

Because of the different habits and personal devices, requirements for the version of our 156-315.82 exam questions vary from person to person. To address this issue, our 156-315.82 actual exam offers three different versions for users to choose from. The PC version is the closest to the real test environment, which is an excellent choice for windows - equipped computers. And this version also helps establish the confidence of the candidates when they attend the 156-315.82 Exam after practicing.

## CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q61-Q66):

### NEW QUESTION # 61

Which of these commands will show the availability of a new ElasticXL Cluster member?

- A. show provision info available
- B. show elasticxl members
- C. show cluster info overview
- D. show provision members new

**Answer: A**

Explanation:

The command show provision info available displays the status of new or unprovisioned ElasticXL cluster members, indicating which nodes are available to be added to the cluster.

### NEW QUESTION # 62

What can be upgraded using Central Deployment?

- A. Gateways, Cluster Members
- B. Security Management Servers, Dedicated Log Servers, Gateways, Cluster Members
- C. Only Gateways (no Clusters)
- D. Security Management Servers, Gateways, Cluster Members

**Answer: D**

Explanation:

Central Deployment allows administrators to upgrade Security Management Servers, individual Gateways, and Cluster members in a coordinated manner, ensuring consistent software versions across the deployment.

### NEW QUESTION # 63

What is the SMO?

- A. The SMO is a Security Gateway object in SmartConsole that defines the IP address and the security features deployed on the ElasticXL Cluster.
- B. The Single Management Object (SMO) is a special object reserved for Quantum Maestro solutions.
- C. The SMO is the name given to the cluster member with the highest priority in the SmartConsole Cluster object. The SMO distributes the policy to the other cluster members defined in the Cluster object.
- D. The SMO is the only cluster member added to the cluster object and it defines the IP address for policy installation.

**Answer: C**

Explanation:

The Security Management Object (SMO) is the cluster member with the highest priority in the SmartConsole Cluster object and is responsible for distributing the compiled policy to all other members of the cluster, ensuring consistent policy deployment.

### NEW QUESTION # 64

Choose the correct object name for a third-Party (Non-Check Point) IPSec VPN device.

- A. External Device
- B. External Gateway
- C. 3rd-Party Device
- D. Interoperable Device

**Answer: D**

Explanation:

For non-Check Point IPsec peers, an Interoperable Device object is used to represent third-party VPN devices, allowing standard IPsec parameters to be configured for compatibility and tunnel establishment.

#### NEW QUESTION # 65

In Management HA the failover is:

- A. Automatic by default, but can be changed to manual
- B. Always manual
- C. Always automatic
- **D. Manual by default, can be changed to automatic**

**Answer: D**

Explanation:

In Management High Availability, failover is manual by default, meaning an administrator must promote the standby server to active, but it can be configured to operate automatically if desired.

#### NEW QUESTION # 66

.....
