Test H19-301_V4.0 Dumps Free - Test H19-301_V4.0 Discount Voucher

Our delivery speed is also highly praised by customers. Our H19-301_V4.0 exam dumps won't let you wait for such a long time. As long as you pay at our platform, we will deliver the relevant H19-301_V4.0 test prep to your mailbox within 5-10 minutes. Our company attaches great importance to overall services, if there is any problem about the delivery of H19-301_V4.0 Test Braindumps, please let us know, a message or an email will be available. We are pleased that you can spare some time to have a look for your reference about our H19-301_V4.0 test prep.

Our product boosts three versions which include PDF version, PC version and APP online version. The HCSA-Presales-IP Network V4.0 test guide is highly efficient and the forms of the answers and questions are the same. Different version boosts their own feature and using method, and the client can choose the most convenient method. For example, PDF format of H19-301_V4.0 guide torrent is printable and boosts instant access to download. You can learn at any time, and you can update the H19-301_V4.0 Exam Questions freely in any day of one year. It provides free PDF demo. You can learn the APP online version of H19-301_V4.0 guide torrent in your computer, cellphone, laptop or other set. Every version has their advantages so you can choose the most suitable method of HCSA-Presales-IP Network V4.0 test guide to prepare the exam.

Test H19-301_V4.0 Discount Voucher, H19-301_V4.0 Exam Answers

Our company has built the culture of integrity from our establishment. You just need to pay the relevant money for the H19-301_V4.0 practice materials. Our system will never deduct extra money from your debit cards. Also, your payment information of the H19-301_V4.0 Study Materials will be secret. No one will crack your passwords. Our payment system will automatically delete your payment information once you finish paying money for our H19-301_V4.0 exam questions.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q39-Q44):

NEW QUESTION # 39
The high-quality experience assurance card on Huawei CloudEngine S8700 is the core hardware of switches in the centralized application experience upgrade solution.

- A. False
- B. True

Answer: B

Explanation:
The CloudEngine S8700 is a modular switch designed for high-performance, high-visibility campus networks.
Huawei equips this series with an "Experience Assurance Card," which enables:
Real-time traffic identification
Application-level statistics collection

In-path traffic analysis for performance bottlenecks

This hardware is central to the centralized experience assurance solution offered in the High-Quality 10 Gbps Campus Network.

Product Overview # Experience Card Highlights

NEW QUESTION # 40

Which of the following statements are true about the underlay and overlay concepts on a data center network?
(Select all that apply)

- A. Overlay is a software-defined logical network built on the underlay network using VXLAN.
- B. An underlay network is a bearer network consisting of various physical devices, such as switches and VAS devices.
- C. After implementing overlay technology, there is no need to deploy routing protocols or static routes on the underlay network.
- D. Overlay technology is a tunneling method that encapsulates service packets and transmits them transparently over the underlay network, with the origin recovered after reaching their destination.

Answer: A,B,D

Explanation:
In Huawei's data center network architecture, an underlay network refers to the physical infrastructure comprising switches, routers, and other network equipment (e.g., VAS devices), responsible for basic IP connectivity. This supports statement B.
The overlay network is logically built on top of the underlay and uses tunneling protocols such as VXLAN (MAC-in-UDP) to encapsulate Layer 2/Layer 3 service traffic. This encapsulation ensures transparent delivery of packets across IP underlays. This supports both C and D.
Statement A is incorrect: even when using an overlay, the underlay still requires routing protocols (like OSPF, BGP) or static routes to ensure IP reachability between VXLAN Tunnel Endpoints (VTEPs). Overlay tunnels ride on top of this IP connectivity.

NEW QUESTION # 41

Which of the following factors is not related to the AI computing network?

- A. Cluster availability
- B. Single-card computing power
- C. Cluster scale
- D. Cluster efficiency

Answer: B

Explanation:
An AI computing network focuses on interconnecting large numbers of servers and AI accelerators to:
Scale the cluster size efficiently (A)
Ensure cluster-wide efficiency in data exchange and training convergence (B) Maintain high availability of the overall AI computing system (C) D: Single-card computing power refers to individual GPU/AI chip capabilities, which is a hardware-level concern, not a network-level performance factor.

NEW QUESTION # 42

Huawei's anti-DDoS solution can be deployed in multiple scenarios. Which of the following are anti-DDoS deployment scenarios?
(Select all that Apply)

- A. Flow inspection and dynamic traffic diversion

- B. In-line deployment
- C. Per-packet inspection and dynamic traffic diversion
- D. Off-path deployment and static traffic diversion

Answer: A,B,D

Explanation:
Huawei's anti-DDoS solution supports multiple deployment scenarios depending on the network design and customer needs:
A: Flow inspection and dynamic traffic diversion: Monitors traffic flows and dynamically redirects suspicious traffic to the cleaning center.
B: In-line deployment: Anti-DDoS device sits directly in the data path, filtering traffic in real time.
C: Off-path deployment and static traffic diversion: Traffic is redirected to scrubbing centers using fixed rules.
D: Per-packet inspection and dynamic traffic diversion is not a standard Huawei anti-DDoS deployment term, and Huawei's solution focuses on flow-level inspection, not deep per-packet analysis in this context.

NEW QUESTION # 43

In Huawei's data center network solution, which technology is used to implement unified display of physical and logical networks for heterogeneous DCs and multi-vendor co-maintenance based on cross-DC heterogeneous interconnection?

- A. AI-powered topology restoration technology of the network digital map
- B. Telemetry
- C. Lossless
- D. Lossless

Answer: A

Explanation:
Huawei CloudFabric introduces a Network Digital Map (NDM) with AI-powered topology restoration capabilities.
This technology can:
Reconstruct full physical and logical topologies across multi-vendor and multi-cloud data centers.
Provide real-time visibility and mapping for O&M.
Simplify cross-DC operation and troubleshooting using AI and telemetry data.
Option A and B ("Lossless") appear to be repeated distractors and irrelevant in this context.
Telemetry supports the technology but is not the direct implementation of topology visualization.
