Valid CWSP-208 Exam Pdf - Dump CWSP-208 Check

Exam : CWSP-208

Title : Certified Wireless Security Professional (CWSP)

https://www.passcert.com/CWSP-208.html

DOWNLOAD the newest ITexamReview CWSP-208 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1zeqh81dmY96kgHw4EaGCW_ISki0hOolc

The Certified Wireless Security Professional (CWSP) (CWSP-208) certification exam is a valuable credential that is designed to validate the candidates' skills and knowledge level. The CWSP-208 certification exam is one of the high in demand industrial recognized credentials to prove your skills and knowledge level. With the CWNP CWSP-208 Certification Exam everyone can upgrade their skills and become competitive and updated in the market.

CWNP CWSP-208 Exam Syllabus Topics:

Topic	Details

Topic 1	• WLAN Security Design and Architecture: This part of the exam focuses on the abilities of a Wireless Security Analyst in selecting and deploying appropriate WLAN security solutions in line with established policies. It includes implementing authentication mechanisms like WPA2, WPA3, 802.1X • EAP, and guest access strategies, as well as choosing the right encryption methods, such as AES or VPNs. The section further assesses knowledge of wireless monitoring systems, understanding of AKM processes, and the ability to set up wired security systems like VLANs, firewalls, and ACLs to support wireless infrastructures. Candidates are also tested on their ability to manage secure client onboarding, configure NAC, and implement roaming technologies such as 802.11r. The domain finishes by evaluating practices for protecting public networks, avoiding common configuration errors, and mitigating risks tied to weak security protocols.
Topic 2	• Security Policy: This section of the exam measures the skills of a Wireless Security Analyst and covers how WLAN security requirements are defined and aligned with organizational needs. It emphasizes evaluating regulatory and technical policies, involving stakeholders, and reviewing infrastructure and client devices. It also assesses how well high-level security policies are written, approved, and maintained throughout their lifecycle, including training initiatives to ensure ongoing stakeholder awareness and compliance.
Topic 3	• Vulnerabilities, Threats, and Attacks: This section of the exam evaluates a Network Infrastructure Engineer in identifying and mitigating vulnerabilities and threats within WLAN systems. Candidates are expected to use reliable information sources like CVE databases to assess risks, apply remediations, and implement quarantine protocols. The domain also focuses on detecting and responding to attacks such as eavesdropping and phishing. It includes penetration testing, log analysis, and using monitoring tools like SIEM systems or WIPS • WIDS. Additionally, it covers risk analysis procedures, including asset management, risk ratings, and loss calculations to support the development of informed risk management plans.
Topic 4	• Security Lifecycle Management: This section of the exam assesses the performance of a Network Infrastructure Engineer in overseeing the full security lifecycle—from identifying new technologies to ongoing monitoring and auditing. It examines the ability to assess risks associated with new WLAN implementations, apply suitable protections, and perform compliance checks using tools like SIEM. Candidates must also demonstrate effective change management, maintenance strategies, and the use of audit tools to detect vulnerabilities and generate insightful security reports. The evaluation includes tasks such as conducting user interviews, reviewing access controls, performing scans, and reporting findings in alignment with organizational objectives.

Marvelous Valid CWSP-208 Exam Pdf - Easy and Guaranteed CWSP-208 Exam Success

In order to meet the requirements of our customers, Our CWSP-208 test questions carefully designed the automatic correcting system for customers. It is known to us that practicing the incorrect questions is very important for everyone, so our CWSP-208 exam question provide the automatic correcting system to help customers understand and correct the errors. Our CWSP-208 Guide Torrent will help you establish the error sets. We believe that it must be very useful for you to take your CWSP-208 exam, and it is necessary for you to use our CWSP-208 test questions.

CWNP Certified Wireless Security Professional (CWSP) Sample Questions (Q31-Q36):

NEW QUESTION # 31
Given: Many computer users connect to the Internet at airports, which often have 802.11n access points with a captive portal for authentication.
While using an airport hot-spot with this security solution, to what type of wireless attack is a user susceptible? (Choose 2)

- A. Wi-Fi phishing
- B. Management interface exploits

- C. Man-in-the-Middle
- D. IGMP snooping
- E. UDP port redirection

Answer: A,C

Explanation:
Open networks with captive portals do not provide link-layer encryption, so:
A). Man-in-the-Middle (MitM): Attackers can intercept or modify traffic between the user and the legitimate network (especially before HTTPS negotiation).
B). Wi-Fi phishing: Evil twin APs may mimic the legitimate hotspot and show a fake captive portal, stealing user credentials or prompting malicious downloads.
Incorrect:
C). Management interface exploits target device admin panels, not typical client users.
D). UDP port redirection and
E). IGMP snooping are network-layer behaviors, not common user-targeted attacks.

CWSP-208 Study Guide, Chapter 5 (Hotspot Vulnerabilities)
CWNP Wi-Fi Phishing and Evil Twin Defense Strategies

NEW QUESTION # 32
You are implementing an 802.11ac WLAN and a WIPS at the same time. You must choose between integrated and overlay WIPS solutions. Which of the following statements is true regarding integrated WIPS solutions?

- A. Many integrated WIPS solutions that detect Voice over Wi-Fi traffic will cease scanning altogether to accommodate the latency sensitive client traffic.
- B. Integrated WIPS use special sensors installed alongside the APs to scan for threats.
- C. Integrated WIPS is always more expensive than overlay WIPS.
- D. Integrated WIPS always perform better from a client throughput perspective because the same radio that performs the threat scanning also services the clients.

Answer: A

Explanation:
In integrated WIPS systems, radios are shared between client servicing and security scanning. To maintain quality of service for latency-sensitive applications such as VoWiFi (Voice over Wi-Fi), scanning operations may be temporarily suspended or deprioritized, potentially reducing security monitoring during those periods.

NEW QUESTION # 33
Which one of the following is a valid reason to avoid the use of EAP-MD5 in production WLANs?

- A. It does not support mutual authentication.
- B. It is not a valid EAP type.
- C. It does not support the outer identity.
- D. It does not support a RADIUS server.

Answer: A

Explanation:
EAP-MD5:
Only authenticates the client.
Does not provide mutual authentication, making it vulnerable to man-in-the-middle attacks.
It also does not protect the user's identity or credentials in a secure tunnel.
Incorrect:
A). The outer identity concept is not relevant to EAP-MD5 since it doesn't support tunneling.
B). EAP-MD5 is a valid EAP type, just insecure.

D). It can be used with a RADIUS server, but security is insufficient.

CWSP-208 Study Guide, Chapter 4 (EAP Method Comparison)
CWNP EAP Implementation Considerations

NEW QUESTION # 34
What attack cannot be detected by a Wireless Intrusion Prevention System (WIPS)?

- A. Soft AP
- B. Deauthentication flood
- C. Eavesdropping
- D. Hot-spotter
- E. EAP flood
- F. MAC Spoofing

Answer: C

Explanation:
WIPS (Wireless Intrusion Prevention Systems) monitor the RF environment and detect unauthorized activities. However, eavesdropping involves passive listening to wireless communications without transmitting any signals. Because the attacker is not transmitting or generating any detectable activity, a WIPS has no RF signal to detect and is thus unable to identify or prevent this attack.

NEW QUESTION # 35
What statement accurately describes the functionality of the IEEE 802.1X standard?

- A. Port-based access control, which allows three frame types to traverse the uncontrolled port: EAP, DHCP, and DNS.
- B. Port-based access control with dynamic encryption key management and distribution
- C. Port-based access control with EAP encapsulation over the LAN (EAPoL)
- D. Port-based access control with support for authenticated-user VLANs only
- E. Port-based access control with mandatory support of AES-CCMP encryption

Answer: C

Explanation:
IEEE 802.1X is a port-based Network Access Control (PNAC) protocol that:
Provides authentication at the edge of the LAN (such as a wireless access point or switch port).
Encapsulates EAP messages over the LAN using the EAPoL (EAP over LAN) protocol.
This standard defines how devices are granted or denied access based on authentication status.
Incorrect:
B). Key management is part of 802.11i (not 802.1X directly).
C). VLAN assignment may occur, but it's not limited to authenticated-user VLANs.
D). AES-CCMP is a function of WPA2/802.11i, not 802.1X.
E). Only EAP is allowed over the uncontrolled port; DHCP/DNS pass only after authentication.

NEW QUESTION # 36
......

If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the CWSP-208 exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the CWSP-208 Certification by the little spread time. On the other hand, it is not easy to

gather all of the exam materials by themselves. So our CWSP-208 study questions are their best choice.
