Latest C-S4CPR-2502 Exam Materials, Latest C-S4CPR-2502 Exam Testking

These SAP C-S4CPR-2502 questions will give you an accurate foresight of the SAP C-S4CPR-2502 examination format. This SAP C-S4CPR-2502 is easily downloadable and even printable, this way you can also pursue paper study if that is your preferred method. The portability of this material makes it handier since you can access it on any smart device such as smart phones, laptops, tablets, etc. These SAP C-S4CPR-2502 features make this prep method the most comfortable one.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q33-Q38):

NEW QUESTION # 33

What do you need to create to test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub? Note: There are 2 correct answers to this question.

- A. A communication arrangement
- B. A communication scenario
- C. A communication system
- D. An API

Answer: A,C

Explanation:

To test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub, you need to set up specific configurations. Below are the two correct answers:

* A communication system (Option A): A communication system represents the external system or application that will interact with the SAP S/4HANA Cloud system. It is required to establish connectivity and define the technical details of the external system. The SAP API Management Guide confirms this requirement.

* A communication arrangement (Option B): A communication arrangement links the communication system to a communication scenario, enabling specific API functionalities. It defines how the external system interacts with the SAP S/4HANA Cloud system. The same SAP API Management Guide documents this step.

* C. A communication scenario: While communication scenarios are essential for defining API capabilities, they are not directly created by users. Instead, they are predefined by SAP and selected during the communication arrangement setup.

* D. An API: APIs are provided by SAP and do not need to be created by users. The focus is on configuring the communication system and arrangement to test the APIs.

* SAP API Management Guide: Explains the steps to configure communication systems and arrangements for API testing. <https://help.sap.com>

* SAP Business Accelerator Hub Documentation: Provides guidance on testing APIs and integrating external systems with SAP S/4HANA Cloud.

NEW QUESTION # 34

What does the material type in a material (product) master data control?

- **A. Procurement type that is allowed for a material**
- B. Price unit that is used for a material
- C. Organizational data that is allowed for a material
- D. Automatic creation of a purchase requisition with a material

Answer: A

Explanation:

The material type in the material (product) master data plays a critical role in controlling various aspects of material management in SAP S/4HANA Cloud Public Edition. Specifically, it determines the procurement type that is allowed for a material.

* Procurement type that is allowed for a material (Option B): The material type defines whether a material can be procured externally (from vendors), internally (produced in-house), or both. For example, raw materials typically allow external procurement, while finished goods may allow internal production. The SAP Material Master Data Guide confirms this functionality.

* A. Price unit that is used for a material: The price unit is controlled by pricing conditions and material valuation settings, not by the material type.

* C. Organizational data that is allowed for a material: Organizational data (e.g., plant-specific or storage location-specific data) is defined during the creation of the material master record, not by the material type.

* D. Automatic creation of a purchase requisition with a material: The automatic creation of purchase requisitions is controlled by MRP (Material Requirements Planning) settings and procurement parameters, not directly by the material type.

* SAP Material Master Data Guide: Describes the role of material types in controlling procurement and other material-related settings. <https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide: Provides details on how material types influence procurement processes.

Why Option B is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 35

Through which component do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Cloud ALM for Service
- B. SAP Central Business Configuration
- **C. SAP Cloud ALM for Implementation**
- D. SAP Cloud ALM for Operations

Answer: C

Explanation:

In the context of the SAP Activate Roadmap for SAP S/4HANA Cloud Public Edition (3-system landscape), SAP Cloud ALM for Implementation is the component used to access assigned process tasks. This tool provides a centralized platform for managing implementation activities, including task assignments, progress tracking, and collaboration.

* SAP Cloud ALM for Implementation (Option C): SAP Cloud ALM for Implementation is specifically designed to support the implementation phase of SAP S/4HANA Cloud Public Edition projects. It integrates with the SAP Activate Roadmap and allows users to access and manage tasks related to process implementation. The SAP Cloud ALM Implementation Guide confirms this functionality.

* A. SAP Central Business Configuration: SAP Central Business Configuration is used for configuring business processes during the implementation phase but does not provide access to assigned process tasks from the SAP Activate Roadmap.

* B. SAP Cloud ALM for Service: SAP Cloud ALM for Service focuses on service management and operations, not on implementation tasks.

* D. SAP Cloud ALM for Operations: SAP Cloud ALM for Operations is used for monitoring and managing operational tasks after the system goes live, not for accessing implementation tasks.

* SAP Cloud ALM Implementation Guide: Describes how SAP Cloud ALM for Implementation supports the SAP Activate methodology and task management. <https://help.sap.com>

* SAP Activate Methodology for SAP S/4HANA Cloud Public Edition: Provides an overview of the tools and components used during the implementation phase.

Why Option C is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 36

You need to create purchasing groups in your SAP S/4HANA Cloud Public Edition system that are relevant to your company. Which of the following assignments for purchasing groups is required?

- A. You must assign the purchasing group to the company code
- **B. You must assign the purchasing group to the responsible purchasing organization**
- C. You must assign the purchasing group to the plant
- D. Purchasing group is not assigned to any organizational unit in the company structure

Answer: B

Explanation:

In SAP S/4HANA Cloud Public Edition, purchasing groups are organizational units that represent individuals or teams responsible for procurement activities. To ensure proper integration into the procurement process, purchasing groups must be assigned to the responsible purchasing organization.

* You must assign the purchasing group to the responsible purchasing organization (Option D):

Purchasing groups are linked to purchasing organizations to define which group is responsible for procurement within a specific purchasing organization. This assignment ensures that procurement processes are properly managed and executed. The SAP Organizational Structure Guide confirms this requirement.

* A. Purchasing group is not assigned to any organizational unit in the company structure:

Purchasing groups must be assigned to a purchasing organization to function effectively. Leaving them unassigned would disrupt procurement processes.

* B. You must assign the purchasing group to the plant: Plants are part of the logistics structure and are not directly linked to purchasing groups.

* C. You must assign the purchasing group to the company code: Company codes are financial organizational units and do not have a direct relationship with purchasing groups.

* SAP Organizational Structure Guide: Explains the relationship between purchasing groups and purchasing organizations in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide: Provides details on configuring purchasing groups and their assignments.

Why Option D is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 37

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Create a page and assign it to the launchpad space.
- **B. Use the search function to find the app.**
- C. Assign a different business role that provides access.
- D. Assign a launchpad space to the business role.

Answer: B

NEW QUESTION # 38

.....
