Quiz 2026 Splunk SPLK-3002: First-grade Valid Braindumps Splunk IT Service Intelligence Certified Admin Ppt

In today's technological world, more and more students are taking the Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam online. While this can be a convenient way to take a Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam dumps, it can also be stressful. Luckily, Free4Dump's best Splunk SPLK-3002 exam questions can help you prepare for your Splunk SPLK-3002 Certification Exam and reduce your stress. If you are preparing for the Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam dumps our SPLK-3002 Questions help you to get high scores in your Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which glass table feature can be used to toggle displaying KPI values from more than one service on a single widget?

- A. Service swapping.
- B. Ad-hoc search.
- C. Service dependencies.
- D. Service templates.

Answer: B

NEW QUESTION # 43

How do you automatically restrict a KPI to only the entities in its service, and generate KPI values for each entity?

- A. Select "No" for both "Split by Entity" and "Filter to Entities in Service".
- B. Select "No" for "Split by Entity" and "Yes" for "Filter to Entities in Service".
- **C. Select "Yes" for both "Split by Entity" and "Filter to Entities in Service".**
- D. Select "Yes" for "Split by Entity" and "No" for "Filter to Entities in Service".

Answer: C

Explanation:

Reference:

A is the correct answer because selecting "Yes" for both "Split by Entity" and "Filter to Entities in Service" allows you to automatically restrict a KPI to only the entities in its service and generate KPI values for each entity. Split by Entity splits the KPI search results by entity alias fields and calculates a separate KPI value for each entity. Filter to Entities in Service filters out any entities that are not part of the service from the KPI search results. This way, you can ensure that your KPI reflects only the relevant entities for your service and provides granular information for each entity. Reference: [Configure KPI settings in ITSI]

NEW QUESTION # 44

Which of the following applies when configuring time policies for KPI thresholds?

- **A. It is possible for multiple time policies to overlap.**
- B. They are great if you expect normal behavior at 1:00 to be different than normal behavior at 5:00
- C. If a person expects a KPI to change significantly through a cycle on a daily basis, don't use it.
- D. A person can only configure 24 policies, one for each hour of the day.

Answer: A

Explanation:

Explanation

If you're creating multiple time policies that require the same threshold values, you can save time by copying the threshold levels and their corresponding values from one policy to another.

NEW QUESTION # 45

ITSI Saved Search Scheduling is configured to use `realtime_schedule = 0`. Which statement is accurate about this configuration?

- A. If this value is set to 0, the scheduler bases its determination of the next scheduled search execution time on the current time.
- B. If this value is set to 0, the scheduler may skip scheduled execution periods.
- C. If this value is set to 0, the scheduler might skip some execution periods to make sure that the scheduler is executing the searches running over the most recent time range.
- **D. If this value is set to 0, the scheduler bases its determination of the next scheduled search on the last search execution time.**

Answer: D

Explanation:

Explanation

If set to 0, the scheduler determines the next scheduled search run time based on the last run time for the search. This is called continuous scheduling.

NEW QUESTION # 46

Which of the following can generate notable events?

- A. Manually selected using the Notable Event Review panel.
- B. When two entity aliases have a matching value.
- **C. Through scheduled correlation searches which link to their respective services.**
- D. Through ad-hoc search results which get processed by adaptive thresholds.

Answer: C

Explanation:

Notable events in Splunk IT Service Intelligence (ITSI) are primarily generated through scheduled correlation searches. These searches are designed to monitor data for specific conditions or patterns defined by the ITSI administrator, and when these conditions are met, a notable event is created. These correlation searches are often linked to specific services or groups of services, allowing for targeted monitoring and alerting based on the operational needs of those services. This mechanism enables ITSI to provide timely and relevant alerts that can be further investigated and managed through the Episode Review dashboard, facilitating efficient incident response and management within the IT environment.

NEW QUESTION # 47

.....

Three versions of SPLK-3002 exam torrent are available. Each version has its own feature, and you can choose the suitable one according to your needs. SPLK-3002 PDF version is printable, and you can print it into the hard one, and if you prefer the paper one.
