## MD-102試験の準備方法 | 最新のMD-102科目対策試験 | 有効的なEndpoint Administrator資格認証攻略

JapancertのMD-102無料デモの合格率に関する記録で実証されているように、Microsoft合格率は設立当初から98%~99%の歴史的記録を維持しています。現時点では、MD-102テストトレントの合格率は他の試験テストの合格率と比較して最高と言えますが、着実に進歩しているという真実を知っているため、専門家全員が現在の

結果に満足することはありません MD-102準備資料は、Endpoint AdministratorのMD-102試験問題作成の分野で永久に勝つことができますか。

## Microsoft Endpoint Administrator 認定 MD-102 試験問題 (Q156-Q161):

### 質問 # 156

Your company has a Microsoft 365 E5 tenant.

All the devices of the company are enrolled in Microsoft Intune.

You need to create advanced reports by using custom queries and visualizations from raw Microsoft Intune data.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Install Microsoft Power BI Desktop.
- Create a Microsoft SharePoint Online site.
- Add a certificate connector to Microsoft Intune.
- Purchase an Azure subscription.
- Create a Log Analytics workspace.
- Add diagnostic settings.

**Answer Area**

Microsoft

japancert.com

正解:

解説:

**Actions**

- Install Microsoft Power BI Desktop.
- Create a Microsoft SharePoint Online site.
- Add a certificate connector to Microsoft Intune.
- Purchase an Azure subscription.
- Create a Log Analytics workspace.
- Add diagnostic settings.

**Answer Area**

- Purchase an Azure subscription.
- Create a Log Analytics workspace.
- Add diagnostic settings.

Microsoft

japancert.com

Explanation:

**Actions**

- Install Microsoft Power BI Desktop.
- Create a Microsoft SharePoint Online site.
- Add a certificate connector to Microsoft Intune.

**Answer Area**

- 1 Purchase an Azure subscription.
- 2 Create a Log Analytics workspace.
- 3 Add diagnostic settings.

Microsoft

japancert.com

Step 1: Purchase an Azure subscription.

Complex reporting functionality require an Azure subscription.

Step 2: Create a Log Analytics workspace.

Each Azure resource requires its own diagnostic setting. The diagnostic setting defines the following for a resource:

- \* One or more destinations to send the logs. Current destinations include Log Analytics workspace, Event Hubs, and Azure Storage.

- \* Categories of logs and metric data sent to the destinations defined in the setting. The available categories will vary for different resource types.

- \* Retention policy for data stored in Azure Storage.

Step 3: Add diagnostic settings.

You can create and view custom reports using the following steps:

1. Sign in to the Microsoft Endpoint Manager admin center.
2. Select Reports > Diagnostic settings add a diagnostic setting.
3. Etc.

### 質問 # 157

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Get-WindowsAutoPilotInfo
- B. Import-AutoPilotCSV
- C. Install-Script Get-WindowsAutoPilotInfo
- D. Install-Module WindowsAutoPilotIntune

正解: C

解説:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

Topic 2, Case Study Contoso, Ltd. Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

Contoso has a Microsoft 365 E5 subscription.

Network Environment

The network contains an on-premises Active domain named Contoso.com. The domain contains the servers shown in the following table.

| Name    | Operating system    | Role              |
|---------|---------------------|-------------------|
| DC1     | Windows Server 2019 | Domain controller |
| Server1 | Windows Server 2016 | Member server     |
| Server2 | Windows Server 2019 | Member server     |

Contoso has a hybrid Azure Active Directory (Azure AD) tenant named Contoso.com.

Contoso has a Microsoft Store for Business instance.

Users and Groups

The Contoso.com tenant contains the users shown in the following table.

| Name  | Azure AD role                              | Microsoft Store for Business role | Member of      |
|-------|--------------------------------------------|-----------------------------------|----------------|
| User1 | Cloud device administrator                 | Basic Purchaser                   | GroupA         |
| User2 | Azure AD joined device local administrator | Device Guard signer               | GroupB         |
| User3 | Global reader                              | Purchaser                         | GroupA, GroupB |
| User4 | Global administrator                       | None                              | Group1         |

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group and Group have a Membership type of Assign

Devices

Contoso has the Windows 10 devices shown in the following table.

| Name    | Type             | Member of      | Scope (Tags) |
|---------|------------------|----------------|--------------|
| Device1 | Corporate-owned  | Group1         | Default      |
| Device2 | Corporate-owned  | Group1, Group2 | Tag2         |
| Device3 | Personally-owned | Group1         | Tag1         |
| Device4 | Personally-owned | Group2         | Tag2         |
| Device5 | Corporate-owned  | Group3         | Default      |

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

| Name    | BitLocker Drive Encryption (BitLocker) | Secure Boot | VPN connection |
|---------|----------------------------------------|-------------|----------------|
| Device1 | Yes                                    | No          | VPN1           |
| Device2 | Yes                                    | Yes         | VPN1, VPN3     |
| Device3 | No                                     | No          | VPN3           |
| Device4 | No                                     | Yes         | None           |
| Device5 | Yes                                    | No          | None           |

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder 1.

Microsoft Endpoint Manager Configuration

Microsoft Endpoint Manager has the compliance policies shown in the following table.

The Compliance policy settings are shown in the following exhibit.

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy," which is reflected in device monitoring.

Mark devices with no compliance policy assigned as ☒ Compliant ☐ Not Compliant

Enhanced jailbreak detection ☐ Enabled ☒ Disabled

Compliance status validity period (days)  ✓

The Automatic Enrollment settings have the following configurations:

- \* MDM user scope: GroupA

- \* MAM user scope: GroupB

You have an Endpoint protection configuration profile that has the following Controlled folder access settings:

- \* Name: Protection1

- \* Folder protection: Enable

- \* List of apps that have access to protected folders: CVAppA.exe

- \* List of additional folders that need to be protected: D:\Folder1

- \* Assignments

Windows Autopilot Configuration

**Create profile** Microsoft Windows PC

✓ Basics ✓ Out-of-box experience (OOBE) ✓ Assignments **Review + create**

**Summary**

**Basics**

|                                           |             |
|-------------------------------------------|-------------|
| Name                                      | Profile1    |
| Description                               | --          |
| Convert all targeted devices to Autopilot | Yes         |
| Device type                               | Windows PCs |

**Out-of-box experience (OOBE)**

|                                      |                          |
|--------------------------------------|--------------------------|
| Deployment mode                      | User-Driven              |
| Join to Azure AD as                  | Azure AD joined          |
| Skip AD connectivity check (preview) | No                       |
| Language (Region)                    | Operating system default |
| Automatically configure keyboard     | Yes                      |
| Microsoft Software License Terms     | Hide                     |
| Privacy settings                     | Hide                     |
| Hide change account options          | Hide                     |
| User account type                    | Standard                 |
| Allow White Glove OOBE               | No                       |
| Apply device name template           | No                       |

Currently, there are no devices deployed by using Window Autopilot

The Intune connector for Active Directory is installed on Server 1.

Planned Changes

Contoso plans to implement the following changes:

- \* Purchase a new Windows 10 device named Device6 and enroll the device in Intune.

- \* New computers will be deployed by using Windows Autopilot and will be hybrid Azure AD joined.

- \* Deploy a network boundary configuration profile that will have the following settings:

- \* Name: Boundary 1

- \* Network boundary: 192.168.1.0/24

- \* Scope tags: Tag 1

- \* Assignments;

- \* included groups: Group 1, Group2

- \* Deploy two VPN configuration profiles named Connection1 and Connection2 that will have the following settings:

- \* Name: Connection 1

- \* Connection name: VPN1

- \* Connection type: L2TP

- \* Assignments:

- \* Included groups: Group1, Group2, GroupA
  - \* Excluded groups: -
  - \* Name: Connection
  - \* Connection name: VPN2
  - \* Connection type: IKEv2 i Assignments:
  - \* included groups: GroupA
  - \* Excluded groups: GroupB
  - \* Purchase an app named App1 that is available in Microsoft Store for Business and to assign the app to all the users.
- Technical Requirements
- Contoso must meet the following technical requirements:
- \* Users in GroupA must be able to deploy new computers.
  - \* Administrative effort must be minimized.

### 質問 # 158

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1.

You need to ensure that MDT1 supports multicast deployments.

What should you install on Server1?

- A. Multipath I/O (MPIO)
- B. Windows Server Update Services (WSUS)
- C. Windows Deployment Services (WDS)
- D. Multipoint Connector

正解: C

解説:

[https://learn.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2012-R2-and-2012/hh831764\(v=ws.11\)](https://learn.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2012-R2-and-2012/hh831764(v=ws.11))

### 質問 # 159

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1 @contoso.com.

You join a Windows 10 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

正解:

解説:

Explanation:

**Answer Area**

net localgroup Administrators /add "CONTOSO AzureAD" \user1@contoso.com"

Microsoft

#### 質問 # 160

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure AD. A user named User1 uses the domain-joined devices shown in the following table.

| Name    | Operating system |
|---------|------------------|
| Device1 | Windows 10 Pro   |
| Device2 | Windows 11 Pro   |

In the Microsoft Entra admin center, you assign a Windows 11 Enterprise E5 license to User1.

You need to identify what will occur when User1 next signs in to the devices.

What should you identify for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Device1: Will activate as Windows 11 Enterprise  
Will activate as Windows 11 Enterprise  
Will not upgrade to Windows 11 Enterprise  
Will perform a clean installation of Windows 11 Enterprise  
Will perform an in-place upgrade to Windows 11 Enterprise

Device2: Will not upgrade to Windows 11 Enterprise  
Will activate as Windows 11 Enterprise  
Will not upgrade to Windows 11 Enterprise  
Will perform a clean installation of Windows 11 Enterprise  
Will perform an in-place upgrade to Windows 11 Enterprise

Microsoft

正解:

解説:

**Answer Area**

Device1: Will activate as Windows 11 Enterprise  
Will activate as Windows 11 Enterprise  
Will not upgrade to Windows 11 Enterprise  
Will perform a clean installation of Windows 11 Enterprise  
Will perform an in-place upgrade to Windows 11 Enterprise

Device2: Will not upgrade to Windows 11 Enterprise  
Will activate as Windows 11 Enterprise  
Will not upgrade to Windows 11 Enterprise  
Will perform a clean installation of Windows 11 Enterprise  
Will perform an in-place upgrade to Windows 11 Enterprise

Microsoft
