(Select 3) Based on the work of Don Reinertsen, SAFe denotes five primary economic factors that can be used to consider the economic perspective of a particular investment. From the list below, choose three of those primary economic factors.

- A. Return on Investment (ROI)
- B. Development expense
- C. Lead time
- D. Risk
- E. Value stream budget

**Answer: A,B,C**

SAFe adopts the five primary economic factors from Don Reinertsen's "The Principles of Product Development Flow." These are:

Development expense,

Lead time,

Product cost,

Value,

Risk.

From the options given:

A). Lead time is correct (one of the primary factors).

C). Return on Investment (ROI) is a direct measurement of value, so this aligns with "Value." E). Development expense is correct.

"Value stream budget" is not one of the original economic factors. "Risk" is a primary factor, so if you need only three, the best answers are A, C, and E.
