Valid Braindumps CSCP Questions | Excellect CSCP Pass Rate

Without bothering to stick to any formality, our CSCP learning quiz can be obtained within five minutes. No need to line up or queue up to get our CSCP practice materials. They are not only efficient on downloading aspect, but can expedite your process of review. No harangue is included within CSCP Training Materials and every page is written by our proficient experts with dedication. Our website experts simplify complex concepts and add examples, simulations, and diagrams to explain anything that might be difficult to understand.

APICS CSCP Certification Exam is designed to test an individual's knowledge and skills in three key areas: supply chain design, planning and execution, and improvement and best practices. CSCP Exam is computer-based and consists of 150 multiple-choice questions. It is a three-and-a-half-hour exam, and individuals are required to score at least 300 out of 400 to pass.

APICS Certified Supply Chain Professional Sample Questions (Q125-Q130):

NEW QUESTION # 125

Which of the following metrics is the most appropriate measure of the availability of products to ship in a make-to-stock environment?

- A. Average customer order lead time
- B. Backlog level
- **C. Fill rate**
- D. Perfect order percentage

Answer: C

NEW QUESTION # 126

A company's cash-to-cash cycle time is 36 days. How many weeks of inventory are on hand if the average collection time from customers is 60 days, and the company pays its vendors in 45 days?

- A. Two
- B. Five
- C. Four
- **D. Three**

Answer: D

Explanation:

The cash-to-cash cycle time is the duration it takes for a company to convert its investments in inventory into cash flows from sales. The formula to calculate the cash-to-cash cycle time is:

$\text{Cash-to-Cash Cycle Time} = \text{Inventory Days} + \text{Receivables Days} / \text{Payables Days}$

Cash-to-Cash Cycle Time = Inventory Days + Receivables Days / Payables Days Given:

* Cash-to-cash cycle time = 36 days

* Receivables Days = 60 days

* Payables Days = 45 days

Rearranging the formula to find the Inventory Days: $\text{Inventory Days} = \text{Cash-to-Cash Cycle Time} \times \text{Payables Days} / \text{Receivables Days}$

Inventory Days = Cash-to-Cash Cycle Time + Payables Days / Receivables Days

Inventory Days = $36 + 45 / 60 = 21$ days

Inventory Days = $36 + 45 / 60 = 21$ days To find the number of weeks of inventory on hand:

Weeks of Inventory = $21 / 7 = 3$ weeks

NEW QUESTION # 127

An advanced planning system differs primarily from enterprise resources planning by:

- A. concentrating on production.
- B. translating plans into action.
- C. linking to the transportation management system
- D. **optimizing operations scheduling**

Answer: D

Explanation:

An advanced planning system (APS) primarily differs from enterprise resources planning (ERP) by focusing on optimizing operations scheduling. Here's the detailed breakdown:

* **ERP Systems:**

* **Functionality:** ERP systems are integrated software platforms used to manage the day-to-day operations of a business, including finance, HR, manufacturing, supply chain, services, procurement, and others.

* **Action Translation:** ERP systems are designed to ensure that plans and schedules created are executed across various business functions.

* **APS Systems:**

* **Functionality:** APS systems are specialized software tools designed to enhance the planning and scheduling capabilities of an ERP system. They are used for detailed planning and optimizing operations, focusing on efficiency and resource utilization.

* **Optimization:** APS uses advanced algorithms and mathematical models to optimize production schedules, taking into account constraints such as capacity, lead times, and material availability.

* **Primary Difference:** While ERP systems provide a broad operational management platform, APS systems concentrate on improving the efficiency of specific scheduling and planning processes through optimization techniques.
