

ARA-C01–100% Free Valid Test Notes | High-quality Exam SnowPro Advanced Architect Certification Outline

DOWNLOAD the newest Exams-boost ARA-C01 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1i2jXpeg9WjhpZUj1At6l19Iy5Jgsoclu>

We often regard learning as a torture. Actually, learning also can become a pleasant process. With the development of technology, learning methods also take place great changes. Take our ARA-C01 practice material for example. All of your study can be completed on your computers because we have developed a kind of software which includes all the knowledge of the ARA-C01 exam. The simulated and interactive learning environment of our test engine will greatly arouse your learning interests. You will never feel boring and humdrum. Your strong motivation will help you learn effectively. If you are tired of memorizing the dull knowledge point, our ARA-C01 Test Engine will assist you find the pleasure of learning. Time is priceless. Learn something when you are still young. Then you will not regret when you are growing older.

Can you imagine that use a mobile phone can let you do ARA-C01 exam questions at any time? With our ARA-C01 learning guide, you will find studying for the exam can be so easy and interesting. If you are a student, you can lose a heavy bag with ARA-C01 Study Materials, and you can save more time for making friends, traveling, and broadening your horizons. Please believe that ARA-C01 guide materials will be the best booster for you to learn.

2026 High-quality ARA-C01 – 100% Free Valid Test Notes | Exam SnowPro Advanced Architect Certification Outline

Exams-boost helps you in doing self-assessment so that you reduce your chances of failure in the examination of SnowPro Advanced Architect Certification (ARA-C01) certification. Similarly, this desktop SnowPro Advanced Architect Certification (ARA-C01) practice exam software of Exams-boost is compatible with all Windows-based computers. You need no internet connection for it to function. The Internet is only required at the time of product license validation.

Snowflake SnowPro Advanced Architect Certification Sample Questions (Q42-Q47):

NEW QUESTION # 42

What is a characteristic of loading data into Snowflake using the Snowflake Connector for Kafka?

- **A. The Connector creates and manages its own stage, file format, and pipe objects.**
- B. The Connector only works in Snowflake regions that use AWS infrastructure.
- C. Loads using the Connector will have lower latency than Snowpipe and will ingest data in real time.
- D. The Connector works with all file formats, including text, JSON, Avro, Ore, Parquet, and XML.

Answer: A

Explanation:

According to the SnowPro Advanced: Architect documents and learning resources, a characteristic of loading data into Snowflake using the Snowflake Connector for Kafka is that the Connector creates and manages its own stage, file format, and pipe objects. The stage is an internal stage that is used to store the data files from the Kafka topics. The file format is a JSON or Avro file format that is used to parse the data files. The pipe is a Snowpipe object that is used to load the data files into the Snowflake table. The Connector automatically creates and configures these objects based on the Kafka configuration properties, and handles the cleanup and maintenance of these objects¹.

The other options are incorrect because they are not characteristics of loading data into Snowflake using the Snowflake Connector for Kafka. Option A is incorrect because the Connector works in Snowflake regions that use any cloud infrastructure, not just AWS. The Connector supports AWS, Azure, and Google Cloud platforms, and can load data across different regions and cloud platforms using data replication². Option B is incorrect because the Connector does not work with all file formats, only JSON and Avro. The Connector expects the data in the Kafka topics to be in JSON or Avro format, and parses the data accordingly. Other file formats, such as text, ORC, Parquet, or XML, are not supported by the Connector³. Option D is incorrect because loads using the Connector do not have lower latency than Snowpipe, and do not ingest data in real time. The Connector uses Snowpipe to load data into Snowflake, and inherits the same latency and performance characteristics of Snowpipe. The Connector does not provide real-time ingestion, but near real-time ingestion, depending on the frequency and size of the data files⁴. NEW QUESTION # 43

There are two databases in an account, named `fin_db` and `hr_db` which contain payroll and employee data, respectively. Accountants and Analysts in the company require different permissions on the objects in these databases to perform their jobs. Accountants need read-write access to `fin_db` but only require read-only access to `hr_db` because the database is maintained by human resources personnel.

An Architect needs to create a read-only role for certain employees working in the human resources department.

Which permission sets must be granted to this role?

- **A. USAGE on database `hr_db`, USAGE on all schemas in database `hr_db`, SELECT on all tables in database `hr_db`**
- B. USAGE on database `hr_db`, USAGE on all schemas in database `hr_db`, REFERENCES on all tables in database `hr_db`
- C. USAGE on database `hr_db`, SELECT on all schemas in database `hr_db`, SELECT on all tables in database `hr_db`
- D. MODIFY on database `hr_db`, USAGE on all schemas in database `hr_db`, USAGE on all tables in database `hr_db`

Answer: A

Explanation:

To create a read-only role for certain employees working in the human resources department, the role needs to have the following permissions on the `hr_db` database:

USAGE on the database: This allows the role to access the database and see its schemas and objects.

USAGE on all schemas in the database: This allows the role to access the schemas and see their objects.

SELECT on all tables in the database: This allows the role to query the data in the tables.

Option A is the correct answer because it grants the minimum permissions required for a read-only role on the `hr_db` database.

Option B is incorrect because SELECT on schemas is not a valid permission. Schemas only support USAGE and CREATE permissions.

Option C is incorrect because MODIFY on the database is not a valid permission. Databases only support USAGE, CREATE, MONITOR, and OWNERSHIP permissions. Moreover, USAGE on tables is not sufficient for querying the data. Tables support SELECT, INSERT, UPDATE, DELETE, TRUNCATE, REFERENCES, and OWNERSHIP permissions.

Option D is incorrect because REFERENCES on tables is not relevant for querying the data. REFERENCES permission allows the role to create foreign key constraints on the tables.

NEW QUESTION # 44

To increase performance, materialized views can be created on external table without any additional cost

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 45

A company has an inbound share set up with eight tables and five secure views. The company plans to make the share part of its production data pipelines.

Which actions can the company take with the inbound share? (Choose two.)

- A. Grant modify permissions on the share.
- B. Clone a table from a share.
- C. Create a table stream on the shared table.
- D. Create additional views inside the shared database.
- E. Create a table from the shared database.

Answer: B,D

Explanation:

These two actions are possible with an inbound share, according to the Snowflake documentation and the web search results. An inbound share is a share that is created by another Snowflake account (the provider) and imported into your account (the consumer). An inbound share allows you to access the data shared by the provider, but not to modify or delete it. However, you can perform some actions with the inbound share, such as:

* Clone a table from a share. You can create a copy of a table from an inbound share using the CREATE TABLE ... CLONE statement. The clone will contain the same data and metadata as the original table, but it will be independent of the share. You can modify or delete the clone as you wish, but it will not reflect any changes made to the original table by the provider1.

* Create additional views inside the shared database. You can create views on the tables or views from an inbound share using the CREATE VIEW statement. The views will be stored in the shared database, but they will be owned by your account. You can query the views as you would query any other view in your account, but you cannot modify or delete the underlying objects from the share2.

The other actions listed are not possible with an inbound share, because they would require modifying the share or the shared objects, which are read-only for the consumer. You cannot grant modify permissions on the share, create a table from the shared database, or create a table stream on the shared table34.

- * Cloning Objects from a Share | Snowflake Documentation
- * Creating Views on Shared Data | Snowflake Documentation
- * Importing Data from a Share | Snowflake Documentation
- * Streams on Shared Tables | Snowflake Documentation

NEW QUESTION # 46

What is a key consideration when setting up search optimization service for a table?

- A. Search optimization service works best with a column that has a minimum of 100 K distinct values.
- B. The table must be clustered with a key having multiple columns for effective search optimization.
- C. Search optimization service can significantly improve query performance on partitioned external tables.
- D. Search optimization service can help to optimize storage usage by compressing the data into a GZIP format.

Answer: A

Explanation:

A: The Search Optimization Service is designed to accelerate the performance of queries that use filters on large tables. One of the key considerations for its effectiveness is using it with tables where the columns used in the filter conditions have a high number of distinct values, typically in the hundreds of thousands or more.

This is because the service creates a map-reduce-like index on the column to speed up queries that use point lookups or range scans on that column. The more unique values there are, the more effective the index is at narrowing down the search space.

References: Snowflake documentation and best practices on the Search Optimization Service, which would be covered under the SnowPro Advanced: Architect certification materials.

NEW QUESTION # 47

.....

What are you in trouble? Are you worrying about Snowflake ARA-C01 certification test? It is really difficult to pass ARA-C01 exam. But, you don't have to be overly concerned. As long as you choose appropriate methods, 100% pass exam is not impossible. What are the appropriate methods? Choosing Exams-boost Snowflake ARA-C01 Practice Test is the best way. Test questions and test answers provided by Exams-boost and the candidates that have taken Snowflake ARA-C01 exam have been very well received. We assure that the exam dumps will help you to pass ARA-C01 test at the first attempt.

Exam ARA-C01 Outline: <https://www.exams-boost.com/ARA-C01-valid-materials.html>

As the most effective ARA-C01 actual test materials to pass the exam, you can totally trust us, Thus, you will never be afraid the ARA-C01 real test, There are ARA-C01 free download study materials for you before purchased and you can check the accuracy of our ARA-C01 exam answers, If you have any question or request for further assistance about the ARA-C01 study braindumps, you can leave us a message on the web page or email us, In the ARA-C01 exam resources, you will cover every field and category in Snowflake Snowflake SnowPro Advanced Certification helping to ready you for your successful Snowflake Certification.

I discussed it with family members and friends to get Valid ARA-C01 Study Plan their take, Also, clicking the value of a particular property puts you into an edit mode for that property.

As the most effective ARA-C01 Actual Test materials to pass the exam, you can totally trust us, Thus, you will never be afraid the ARA-C01 real test, There are ARA-C01 free download study materials for you before purchased and you can check the accuracy of our ARA-C01 exam answers.
