1Z0-1042-25 - Oracle Cloud Infrastructure 2025 Application Integration Professional Latest Dump Check

2025 Latest ExamDiscuss 1Z0-1042-25 PDF Dumps and 1Z0-1042-25 Exam Engine Free Share: https://drive.google.com/open?id=1oFAHPijhg7zpCJYe8X2LYpOWGtH7Y6kD

This is a Oracle 1Z0-1042-25 practice exam software for Windows computers. This 1Z0-1042-25 practice test will be similar to the actual Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) exam. If user wish to test the Oracle 1Z0-1042-25 study material before joining ExamDiscuss, they may do so with a free sample trial. This 1Z0-1042-25 Exam simulation software can be readily installed on Windows-based computers and laptops. Since it is desktop-based Oracle 1Z0-1042-25 practice exam software, it is not necessary to connect to the internet to use it.

The "ExamDiscuss" is one of the top-rated and reliable platforms that offer real, valid, and updated Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) exam questions in three different formats. The names of these formats are ExamDiscuss 1Z0-1042-25 PDF dumps file, desktop practice test software, and web-based practice test software. All these three ExamDiscuss 1Z0-1042-25 Exam Questions formats are easy to use and perfectly work with desktop computers, laptops, tabs, or even on your smartphone devices.

New Dump 1Z0-1042-25 Check | Latest Oracle 1Z0-1042-25: Oracle Cloud Infrastructure 2025 Application Integration Professional 100% Pass

Our 1Z0-1042-25 study materials have enough confidence to provide the best 1Z0-1042-25 exam torrent for your study to pass it. With many years work experience, we have fast reaction speed to market change and need. In this way, we have the latest 1Z0-1042-25 guide torrent. You don't worry about that how to keep up with the market trend, just follow us. We can say that our 1Z0-1042-25 Test Questions are the most suitable for examinee to pass the 1Z0-1042-25 exam, you will never regret to buy it.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
Topic 2	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 3	• Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Topic 4	• Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 5	• Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43
As an integration developer, you are implementing an integration in Oracle Integration (OIC) to transform a payload with multiple orders. You have decided to leverage the For Each action to loop through each order and process them individually. How do you configure the For Each action to support this scenario?

- A. Select the Group By option separating the orders by their order number.
- B. Select the Repeating Element field and map the source element that contains the orders.
- C. Select the Sequential Processing option and set the number of threads to the number of orders.
- D. Select the Parallel Processing option and set the number of threads to the number of orders.

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
For Each:
C:True-map repeating element for iteration.

NEW QUESTION # 44
You have a use case that requires a large data extract, which is more than 10MB, to be processed within an Oracle Integration Cloud (OIC) integration. Which are three valid options?

- A. Send the file as a multipart attachment to an OIC integration using a REST trigger, and make it available for processing using a Stage File action.
- B. Retrieve the file by invoking a SOAP API, which sends Base64 encoded data within the SOAP body, and then decode the data and make it available for processing using a Stage File action.
- C. Retrieve the file from an external endpoint using APIs that support application/blob as content type, and make it available for processing using a Stage File action.
- D. Retrieve the file by invoking a SOAP API, which sends the document as an MTOM attachment, and make it available for

- E. Upload the file to the OIC file server, and then use an FTP adapter Download File operation, which makes it available for processing using a Stage File action.

Answer: A,C,D

Explanation:
Comprehensive and Detailed Explanation:
Handling large files (>10MB) in OIC requires efficient mechanisms to avoid memory issues. Let's analyze each option:
Option A:True-REST trigger with multipart attachments is ideal for inbound large files, processed via Stage File.
Option B:False-Base64 in SOAP body bloats data (33% overhead), risking memory limits for >10MB files.
Option C:True-MTOM optimizes SOAP attachments, suitable for large files, processed with Stage File.
Option D:True-APIs returning application/blob handle binary data efficiently, staged for processing.

NEW QUESTION # 45
You have an Oracle Integration Cloud (OIC) synchronous integration flow that updates external systems with several invocations. However, several of your OIC integration clients are reporting that they are experiencing timeouts waiting for the response confirmation from this processing. Which is a legitimate strategy to mitigate this issue?

- A. Change the design implementation strategy to an asynchronous flow that provides a separate notification to clients when the processing is complete.
- B. Change the implementation logic to invoke multiple fine-grained external API calls within a single loop.
- C. Increase the blocking timeout within the OIC integration settings to allow for extended time.

Answer: A

Explanation:
Comprehensive and Detailed Explanation:
Timeouts in synchronous flows:
Option A:Increasing timeouts might help but doesn't address efficiency and risks longer delays.
Option B:Fine-grained calls in a loop could worsen performance, increasing latency.
Option C:Switching to an asynchronous flow decouples client waits from processing, using callbacks or notifications- a proven mitigation strategy.
C aligns with best practices for responsiveness.

NEW QUESTION # 46
Which two statements are true regarding messaging adapters in Oracle Integration Cloud (OIC)?

- A. The Apache Kafka Adapter can be configured to support Transactions in case of Producers.
- B. It is not mandatory to install a connectivity agent to use the OCI Streaming Adapter for Inbound polling.
- C. The OCI Streaming adapter does not support consuming messages from a specified consumer group.
- D. Both the Apache Kafka and OCI Streaming adapters support XML, JSON, and AVRO message formats.

Answer: A,D

Explanation:
Comprehensive and Detailed Explanation:
Messaging adapters:
A:True-Kafka and OCI Streaming support XML, JSON, and AVRO.
C:True-Kafka adapter supports producer transactions.
B:False-OCI Streaming supports consumer groups.

NEW QUESTION # 47
You can group one or more Oracle Integration Cloud (OIC) integrations into a single structure called a package.
Which statement is NOT true about OIC packages?

- A. New packages can be created by clicking the Create button on the Packages page in the OIC console.
- B. All packages must include at least one integration.

- C. You can import packages directly from the Oracle Marketplace.
- D. Packages cannot be locked to deny other users access to your integrations.
- E. Packages enable you to easily import and export a group of integrations to and from OIC.
- F. Integrations do not need to be part of a package.

Answer: D

Explanation:
Packages cannot be locked to prevent other users from accessing the integrations within them, unlike projects that can be locked.

NEW QUESTION # 48
......

For purchasing the 1Z0-1042-25 study guide, the cndidates may have the concern of the safety of the websites, we provide you a safety network environment for you. We have occupied in this business for years, and the website and the 1Z0-1042-25 Study Guide of our company is of good reputation. We also have professionals offer you the guide and advice. 1Z0-1042-25 study guide will provide you the knowledge point as well as answers, it will help you to pass it.
