So feel relieved when you buy our C-C4H56-2411 guide torrent.

SAP Certified Associate - Implementation Consultant - SAP Service Cloud Version 2 Sample Questions (Q47-Q52):

NEW QUESTION # 47

What do you need to configure to access cases in SAP Service Cloud Version 2?

- A. Assign the employee to a case type.
- B. Assign access rights directly to the user.
- **C. Assign the business service case to a business role.**
- D. Create access rights for read mode.

Answer: C

Explanation:

To access cases in SAP Service Cloud V2, the business service case must be assigned to a business role. Business roles define the permissions and access rights for users, including access to specific objects like cases. According to SAP documentation, "Assign the business service case to a business role" is a critical step to ensure users have the necessary permissions to view and manage cases.

Creating access rights for read mode (B) is not a standard configuration step for case access. Assigning the employee to a case type (C) is related to routing, not access. Assigning access rights directly to the user (D) is not supported, as access is managed through business roles.

SAP Learning: Access Management in SAP Service Cloud

NEW QUESTION # 48

Which types of master data can be used in case routing? Note: There are 2 correct answers to this question.

- A. Contact
- **B. Responsible employee**
- **C. Service Team**
- D. Account hierarchy

Answer: B,C

Explanation:

In SAP Service Cloud V2, case routing can utilize master data such as Responsible employee to assign cases to specific individuals based on conditions like expertise or availability. Service Team is also used to route cases to predefined teams. According to SAP documentation, "Case routing rules can leverage master data like Responsible Employee and Service Team to determine case assignments." Contact (B) is a case attribute but not typically used for routing. Account hierarchy (C) is used for account management, not routing.

SAP Learning: Master Data in Case Routing

NEW QUESTION # 49

Which of the following describe how access restrictions are governed in SAP Service Cloud Version 2?

- A. You can decide if access rights override any restrictions you have defined.
- **B. Unrestricted access rights override any restrictions you have defined.**
- C. Restricted access rights override any unrestricted access you have defined.
- D. If the access rights are contradictory, the system automatically grants no access.

Answer: B

NEW QUESTION # 50

What are the effects of using the depersonalization settings on employee data?

- **A. Personal data gets replaced with XXXX.**
- B. Personal data gets archived.
- C. Employee data is stored securely.
- D. Employee data gets hidden.

Answer: A
