Certification Exam Questions
and Answers PDF
SAP C_S4EWM_2023 Exam Guide

www.ERPPrep.com
The SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C_S4EWM_2023) certification is essential for professionals seeking to excel in SAP Extended Warehouse Management. This PDF guide provides a comprehensive preparation strategy for the exam, covering topics like warehouse processing, inbound/outbound processes, system integration, and clean core management. With exam details, syllabus breakdown, sample questions, and expert tips, this resource is designed to help candidates achieve a strong score and master SAP S/4HANA EWM functionalities.

Fast2test是一個優秀的IT認證考試資料網站，在Fast2test您可以找到關於SAP C_S4EWM_2023認證考試的考試心得和考試材料。您也可以Fast2test免費下載部分關於SAP C_S4EWM_2023考試的考題和答案。Fast2test還將及時免費為您提供有關SAP C_S4EWM_2023考試材料的更新。並且我們的銷售的考試考古題資料都提供答案。我們的IT專家團隊將不斷的利用行業經驗來研究出準確詳細的考試練習題來協助您通過考試。總之，我們將為您提供您需要的一切關於SAP C_S4EWM_2023認證考試的一切材料。

SAP C_S4EWM_2023 考試大綱：

主題	簡介
主題 1	Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
主題 2	Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.

主題 3	• Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
主題 4	• Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
主題 5	• Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
主題 6	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
主題 7	• Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
主題 8	• Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.

選擇了Fast2test提供的最新最準確的關於SAP C_S4EWM_2023考試產品，屬於你的成功就在不遠處。

最新的 SAP Certified Associate C_S4EWM_2023 免費考試真題 (Q49-Q54):

問題 #49

Which objects can you add to the warehouse cockpit? Note: There are 2 correct answers to this question.

- A. Tailored measurement services
- B. Alerts from alert management
- C. Calculated measurement services
- D. Basic measurement services

答案: A,D

解題說明:

Comprehensive and Detailed In-Depth Explanation:

The warehouse cockpit in SAP EWM (transaction /SCWM/WCOC) is a customizable dashboard. Option A ("Basic measurement services") is correct as these predefined metrics (e.g., task count) can be added. Option C ("Tailored measurement services") is correct because custom metrics tailored to specific needs can also be included, configured in SPRO: SCM Extended Warehouse Management > Monitoring > Warehouse Cockpit.

Option B ("Alerts") is managed separately in alert management, and option D ("Calculated measurement services") is not a standard cockpit object type.

問題 #50

Which limit values can you use to restrict the size of warehouse orders? Note: There are 2 correct answers to this question.

- A. Resources
- B. Items
- C. Processing time
- D. Products

答案: B,C

問題 #51

Which stocks can be displayed in the SAP Extended Warehouse Management warehouse management monitor? Note: There are 2 correct answers to this question.

- A. Reserved stock
- B. Stock in transit
- C. Stock in transportation units
- D. Stock on resources

答案: A,D

解題說明:

Comprehensive and Detailed In-Depth Explanation:

The warehouse management monitor in SAP EWM provides visibility into various stock types. Option C ("Reserved stock") is correct as it shows stock allocated for specific tasks or orders, viewable under nodes like

"Stock and Bin" in transaction /SCWM/MON. Option D ("Stock on resources") is correct because it displays stock currently handled by resources (e.g., forklifts), also accessible in the monitor. Option A ("Stock in transit") is managed between warehouses and not typically detailed in the EWM monitor, while option B ("Stock in transportation units") relates to transportation management, not warehouse stock visibility.

問題 #52

Which fields in the warehouse process type are used to determine warehouse order creation rules (WOCR)?

Note: There are 2 correct answers to this question.

- A. Activity
- B. Process type determination indicator
- C. Storage process
- D. WOCR activity area

答案: A,D

解題說明:

Fields in Warehouse Process Type for WOCR Determination

* WOCR Activity Area (B): Defines the area of operations within the warehouse for specific tasks.

* Activity (C): Specifies the type of activity (e.g., picking, putaway) to link with the appropriate warehouse order creation rule.

Excluded Options

* A (Storage Process): Relevant for stock movement flows but not directly linked to WOCR determination.

* D (Process Type Determination Indicator): Governs warehouse process type determination but not WOCR rules.

SAP S/4HANA Cloud Private Edition Reference

* Refer to Warehouse Order Creation Rule Fields in SAP EWM for configuration details.

問題 #53

What scenario can be controlled with separate storage locations for sales and for production?

- A. Distinguish material that is supplied for production from material which is available for sales
- B. Distinguish material that is still in inbound processing from material that has reached the final bins
- C. Distinguish material that is in goods receipt from production vs in goods receipt from external vendors
- D. Distinguish material quantities that are assigned to a sales order

答案: A

解題說明:

Comprehensive and Detailed In-Depth Explanation:

Separate storage locations in SAP EWM (mapped from ERP) manage stock purposes. Option D ("Distinguish material that is supplied for production from material which is available for sales") is correct because storage locations can segregate production stock (e.g., "PROD") from sales stock (e.g., "SALE"), configured via warehouse number mapping in SPRO: SCM Extended

Warehouse Management > Interfaces > ERP Integration. Options A, B, and C are managed by stock types or processes, not storage locations.

問題 #54
