APMG-International ISO-IEC-27001-Foundation Exam Dumps - Reliable Way To Get Success

Someone around you must be using our ISO-IEC-27001-Foundation exam questions. The users of our ISO-IEC-27001-Foundation exam materials are really very extensive. Or, you can consult someone who has participated in the ISO-IEC-27001-Foundation exam. They must know or use our products. We can confidently say that our products are leading in the products of the same industry. The richness and authority of ISO-IEC-27001-Foundation Exam Materials are officially certified.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	<ul style="list-style-type: none"> Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 3	<ul style="list-style-type: none"> Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 4	<ul style="list-style-type: none"> Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 5	<ul style="list-style-type: none"> Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 6	<ul style="list-style-type: none"> Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 7	<ul style="list-style-type: none"> Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Communicating feedback from interested parties to the organization
- B. Ensuring information security objectives are established**
- C. Implementing the actions from internal audits
- D. Producing a risk assessment report

Answer: B

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 21

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. Annually
- B. At planned intervals and if significant changes occur**
- C. According to a schedule defined by the Certification Body

- D. Every six months

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules.

Therefore, the verified correct answer is D.

NEW QUESTION # 22

Which of the following statements about the differences between an internal audit and a certification audit is true?

An internal audit is conducted at planned intervals and a certification audit is conducted annually. An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Only 1 is true
- B. Neither 1 or 2 is true
- **C. Only 2 is true**
- D. Both 1 and 2 are true

Answer: C

Explanation:

ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency. Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually."

This makes statement 1 inaccurate.

Audit types are defined in ISO/IEC 19011:

First-party audits: conducted internally by or on behalf of the organization (internal audits).

Third-party audits: conducted by independent external certification bodies.

Thus, statement 2 is correct. Therefore, the accurate choice is C: Only 2 is true.

NEW QUESTION # 23

Which statement about the conduct of audits is true?

- A. During Stage 1 of a certification audit, evidence is collected by observing activities
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- **C. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- D. Third party audits are conducted by a customer of the organization

Answer: C

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

NEW QUESTION # 24

Which statement about the conduct of audits is true?

- A. During Stage 1 of a certification audit, evidence is collected by observing activities
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- **C. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- D. Third party audits are conducted by a customer of the organization

Answer: C

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.
