And obtain this certificate for yourself. TestPassed will help you to get the knowledge and experience that you need and will provide you with a detailed Scrum SAFe-Practitioner exam objective. So with it, you will pass the exam.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Certification Exam is an advanced level certification designed for professionals who are looking to enhance their knowledge and skills in agile methodology. SAFe Practitioner Exam (6.0) certification is based on the Scaled Agile Framework (SAFe) which is a widely recognized framework for implementing agile practices in a large-scale organization. The SAFe 5 Practitioner (SP) certification is an ideal choice for professionals who are working in complex environments and are responsible for leading agile teams.

The SP exam is suitable for professionals who have experience in agile methodologies, such as Scrum, Kanban, and Lean, and are seeking to enhance their knowledge and skills in the SAFe framework. SAFe-Practitioner Exam is also suitable for professionals who are involved in agile transformations and are seeking to implement SAFe practices in their organizations. The SP certification is beneficial for professionals in various roles, including project managers, product owners, business analysts, and agile coaches.

One of the main focuses of the SP certification exam is understanding the principles and practices that form the foundation of SAFe. These include Lean-Agile principles, agile development practices, and team and program level ceremonies. SAFe-Practitioner exam provides a deep understanding of how these principles and practices can be applied in an organization to achieve business agility, improve the speed of delivery, and foster innovation.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q244-Q249):

NEW QUESTION # 244

The Lean Thinking principle, "make value flow without interruptions" means identifying what?

- A. Delays
- B. Activities that lack innovation
- C. Key performance indicators
- D. Predictability issues of the train

Answer: A

Explanation:

The Lean Thinking principle, "make value flow without interruptions" means identifying and eliminating any delays that prevent the smooth and fast movement of work product from step to step in a value stream. Delays are a form of waste that reduce the efficiency and effectiveness of the system, increase the lead time and cost, and lower the customer satisfaction. Delays can be caused by various factors, such as handoffs, queues, bottlenecks, rework, defects, approvals, dependencies, and variability. To make value flow without interruptions, SAFe applies the following eight flow accelerators: Visualize and limit WIP, reduce batch sizes, and manage queue lengths Implement full test automation and continuous integration Take an economic view Apply product development flow principles Understand and exploit variability Implement fast feedback and integrated learning Build quality in Base milestones on objective evaluation of working systems References: Principle #6 - Make Value Flow Without Interruptions - Scaled Agile Framework, Accelerating Flow with SAFe - Scaled Agile Framework

NEW QUESTION # 245

PI System Demo is often led by

- A. All of the above
- B. POs
- C. System Team
- D. Product Management

Answer: A

NEW QUESTION # 246

Which of the below are consequences if there is no Definition of Done?

- A. Lack of Consistency
- B. Faster implementation
- C. More difficult integration and lower maintainability
- D. Unfinished work which leads to technical debt

Answer: A,C,D

NEW QUESTION # 247

What is critical to successfully implementing quality in a Lean-Agile environment?

- A. Separation of Dev and Ops
- B. Component teams
- C. A phased-gate rollout
- D. Making quality everyone's responsibility

Answer: D

Explanation:

= Making quality everyone's responsibility is critical to successfully implementing quality in a Lean-Agile environment. This means that all the people involved in creating and delivering value to the customer, from business functions to software applications, share the same quality standards and practices. Quality is not something that can be delegated or outsourced to a separate team or department. It is embedded in the culture, mindset, and behavior of every individual and team. Making quality everyone's responsibility enables faster feedback, continuous improvement, and higher customer satisfaction¹². References: = 1: Built-In Quality - Scaled Agile Framework²; 2: How to Implement Quality in a Lean-Agile Environment Successfully¹

NEW QUESTION # 248

Who attends the Scrum of Scrum meetings?

- A. Agile Team
- B. Product Owner
- C. Scrum Master
- D. All of the above

Answer: C

NEW QUESTION # 249
