

# API-571 Latest Braindumps & API-571 Reliable Test Online

P.S. Free 2026 API API-571 dumps are available on Google Drive shared by Lead2Passed: <https://drive.google.com/open?id=1QWmsNkJdOFoYqwtMgKQz3n-PS4ASh9ue>

Our desktop API API-571 practice exam software is designed for all those candidates who want to learn and practice in the actual Corrosion and Materials Professional (API-571) exam environment. This desktop practice exam software completely depicts the API API-571 Exam scenario with proper rules and regulations so you can practice all the hurdles and difficulties.

## What is the duration of the API-571 Exam

- Length of Examination: 3.25 hours
- Number of Questions: 70
- Format: Multiple choices, multiple answers

## API API-571 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Refining Management</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Affecting Fixed Equipment</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Damage Mechanisms</li> </ul>

## API Corrosion and Materials API-571 Exam

API Corrosion and Materials API-571 Exam is related to Advanced Corrosion & Materials Professional Certifications. This exam validates the knowledge and skills of corrosion engineers, corrosion processes among specialized inspectors, chemical engineers and other professionals across the entire petrochemical industry. Highly Specialized Inspectors, Corrosion Engineers and Chemical Engineers usually hold or pursue this certification and you can expect the same job role after completion of this certification.

## API-571: Your Partner in API API-571 Exam Preparation with Free Demos and Updates

Since it is obvious that different people have different preferences, we have prepared three kinds of different versions of our API-571 practice test, namely, PDF version, Online App version and software version. Last but not least, our customers can accumulate exam experience as well as improving their exam skills in the mock exam. There is no limitation on our software version of API-571 practice materials about how many computers our customers used to download it, but it can only be operated under the Windows operation system. I strongly believe that you can find the version you want in multiple choices of our API-571 practice test.

## API Corrosion and Materials Professional Sample Questions (Q143-Q148):

### NEW QUESTION # 143

Amine stress corrosion cracking is a term applied to the cracking of steels under the combined actions of \_\_\_\_\_ and \_\_\_\_\_ in aqueous alkanolamine systems used to remove/absorb H<sub>2</sub>S and/or CO<sub>2</sub> and their mixtures from various gas and liquid hydrocarbon streams.

- A. Tensile stress, corrosion
- B. Temperature, corrosion
- C. Pressure, stress
- D. Temperature, pressure

**Answer: A**

### NEW QUESTION # 144

Internal galvanic corrosion in piping near the joint of two dissimilar metals is best detected by external:

- A. Ultrasonic thickness testing
- B. Liquid-penetrant testing
- C. Metallographic examination
- D. Eddy-current testing

**Answer: A**

Explanation:

API RP 571 states under Galvanic Corrosion:

"Because galvanic corrosion usually manifests as thinning of the more anodic metal, ultrasonic thickness measurements taken near dissimilar metal joints are an effective way to detect this type of internal corrosion."

"Surface NDE techniques like liquid penetrant or magnetic particle testing are not effective for detecting wall loss." Thus, option D (ultrasonic thickness testing) is correct.

#### NEW QUESTION # 145

The loss in strength from spheroidization (Softening) is usually accompanied by a(n) \_\_\_\_\_ in ductility, which allows for deformation at stress concentrations.

- A. Yield
- B. Reduction
- C. Increase
- D. Decrease

**Answer: C**

#### NEW QUESTION # 146

In general, the resistance of iron and nickel based alloys to sulfidation is determined by the \_\_\_\_\_ content of the material.

- A. Alloying
- B. Molybdenum
- C. Carbon
- D. Chromium

**Answer: D**

#### NEW QUESTION # 147

\_\_\_\_\_ is a selective corrosion mechanism in which one or more constituents of an alloy are preferentially attacked leaving a lower density often porous structure.

- A. Phenol corrosion
- B. Preferentially weld attack
- C. Dealloying
- D. Carburization

**Answer: C**

#### NEW QUESTION # 148

.....

The modern API world is changing its dynamics at a fast pace and has become so competitive. To stay updated and competitive in the market you have to learn new in-demand skills. With one API API-571 exam certificate you can do this task nicely. With the API API-571 Certification Exam successful candidates can validate their knowledge, increase marketability, enhance academic performance, improve reputation and increase earning power and other personal and professional benefits, etc.
