## HCL-DOM-AADM-12 Valid Exam Question - HCL-DOM-AADM-12 Reliable Exam Tutorial

In the past few years, our HCL-DOM-AADM-12 study materials have helped countless candidates pass the HCL-DOM-AADM-12 exam. After having a related certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. HCL-DOM-AADM-12 Study Materials have stood the test of time and market and received countless praises. We will transfer our HCL-DOM-AADM-12 test prep to you online immediately, and this service is also the reason why our HCL-DOM-AADM-12 study torrent can win people's heart and mind.

## HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q61-Q66):

NEW QUESTION # 61

Which two factors should be considered when planning the geographical placement of Domino servers in a distributed environment? (Choose two)

- A. Number of mailboxes
- B. Network bandwidth and latency
- C. Operating system kernel version
- D. Time zone differences

**Answer: B,D**

Explanation:

When planning where to physically place servers in a global or distributed domain, two critical factors are Time zone differences and Network bandwidth and latency . Time zones impact the scheduling of replication and maintenance tasks to avoid peak business hours. Bandwidth and latency are vital because they determine how quickly data can be replicated between servers; poor network conditions can lead to data inconsistency and slow mail delivery between locations.

#### NEW QUESTION # 62

Which tab in the Domino Administrator Client provides tools to manage database replication?

- A. Configuration
- B. Files
- C. People & Groups
- D. Messaging

**Answer: B**

Explanation:

The Files tab in the HCL Domino Administrator client is the primary location for managing physical database files and their replicas. Within this tab, an administrator can select one or more databases and use the Tools pane to access Replication utilities. This allows them to create new replicas, manage existing ones, and manually trigger replication between the local server and a destination server.

---

#### NEW QUESTION # 63

Which two elements are required for a Notes client to successfully authenticate to a Domino server? (Choose two)

- A. ID file containing the private key
- B. Matching user name in the Domino Directory
- C. Trusted root certificate from the server
- D. notes.ini file with replication schedule

**Answer: A,B**

Explanation:

Notes authentication is a "challenge-response" process that requires two primary components. First, the user must have an ID file containing their private key to sign the authentication request. Second, the server must have a matching user name in the Domino Directory (names.nsf) that contains the user's corresponding public key to verify the signature. Without both pieces, the secure handshake between the client and server cannot be completed.

---

#### NEW QUESTION # 64

Which two ACL access levels allow users to create documents in a Domino database? (Choose two)

- A. Editor
- B. Depositor
- C. Author
- D. Reader

**Answer: A,C**

Explanation:

In HCL Domino, the Access Control List (ACL) defines the specific permissions for every user or group interacting with a database. The Author access level allows users to read documents and create new ones, though they can typically only edit documents they created themselves. The Editor level provides higher permissions, allowing users to read, create, and edit any document in the database regardless of the original author. While a "Depositor" can also create documents, they cannot read any documents in the database, making Author and Editor the standard levels for users who both contribute and interact with content.

---

#### NEW QUESTION # 65

Which two tasks can an administrator perform from the People & Groups tab of the Domino Administrator Client? (Choose two)

- A. View system resource usage
- B. Register new users
- C. Create groups
- D. View DAOS objects

**Answer: B,C**

Explanation:

The People & Groups tab is the primary management interface for directory objects in HCL Domino. Administrators use this tab to manage the lifecycle of identities, specifically for registering new users into the Domino Directory and creating groups. Groups are essential for defining mail distribution lists and managing security access levels across the domain. System resource monitoring and DAOS management are typically handled in the Server and Files tabs, respectively.

---

#### NEW QUESTION # 66

.....

The candidates can test themselves for the HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 exam day by attempting the HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 HCL-DOM-AADM-12 practice test on the software. There is preparation material available on the HCL-DOM-AADM-12 Practice Exam software by Getcertkey to study for the HCL Software Academy HCL-DOM-AADM-12 test.
