# Pass Your Certified Technology Specialist Exams Fast. All Top CTS Exam Questions Are Covered.

What's more, part of that BraindumpsIT CTS dumps now are free: https://drive.google.com/open?id=1vPp2TO70uNDw2wECKfP4rQk-XHQamLsc

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the CTS study materials are perfect. We can promise that quality first, service upmost. If you buy the CTS study materials from our company, we are glad to provide you with the high quality CTS Study Materials and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system.

AVIXA CTS - General Exam Syllabus Topics:

Topic	Weight
Duty A:Creating AV Solutions	**47%**
Task 1:Gather Customer Information	10%
Task 2:Conduct Initial Site Survey	9%
Task 3: Evaluate Site Environment (acoustics, lighting, seating, finishing, etc.)	9%
Task 4:Develop an AV Project Scope	9%
Task 5: Design AV Solutions	10%

AVIXA CTS Exam Certification Details:

Sample Questions	AVIXA CTS Sample Questions
Number of Questions	110
Duration	150 mins
Passing Score	350 / 500
Non-Member Exam Price	$475(USD)

BraindumpsIT AVIXA CTS Dumps (2026)

BraindumpsIT.com won a good reputation by these candidates that have passed AVIXA CTS certification exam. BraindumpsIT gets approve from the people with its powerful exam dumps. As long as you choose our dumps as review tool before the exam, you will have a happy result in CTS Exam, which is perfectly obvious. Now hurry to download free demo, you will believe your choice can't be wrong.

AVIXA Certified Technology Specialist Sample Questions (Q231-Q236):

NEW QUESTION # 231

In an audiovisual system where a touch panel is to be connected to the control system via the LAN, the designer may choose to use a

- A. static IP address.
- B. host IP address.
- C. shared IP address.
- D. MAC address.

Answer: A

Explanation:
In an audiovisual system where a touch panel is to be connected to the control system via the LAN, the designer typically chooses to use a static IP address. A static IP address ensures that the touch panel always has the same IP address, making it easier to locate and communicate with within the network. This is crucial in a control system where consistent and reliable communication is necessary. Using a static IP address avoids the potential issues that can arise with dynamic IP addresses, which can change and cause disruptions in communication.
Reference: Axis Communications technical documentation and best practices for network device integration recommend the use of static IP addresses for reliable and consistent device management.

NEW QUESTION # 232

Which of the following is the MOST SUITABLE security method for a small portable projector?

- A. adjustable mount
- B. cable lock
- C. Nylock nuts and bolts
- D. security screws

Answer: B

NEW QUESTION # 233

A single panel in a large video wall is flickering. Where should the technician begin troubleshooting?

- A. at the video content source
- B. at the non-responsive panel
- C. at the video wall input
- D. at the media server

Answer: B

Explanation:
When a single panel in a video wall is flickering, the issue is likely isolated to that specific panel or its connections. Starting troubleshooting at the non-responsive panel allows the technician to check for loose cables, faulty connections, or individual panel issues before looking at system-wide components.
CTS Technology Specialist ReferenceCTS troubleshooting protocols recommend starting with the component that is exhibiting the issue, which is efficient for isolating localized problems within AV systems.

NEW QUESTION # 234

If the nominal light output of a projector was measured at 5000 ANSI lumens using an f/1.4 lens, what would happen if the lens was changed to an f/2.8 large zoom?

- A. The screen will need to be changed to 1:1 gain
- B. The projected image will be brighter
- C. The projected image will be darker
- D. The screen will need to be changed to a high contrast screen

Answer: C

Explanation:
The f-number (aperture) of a lens determines how much light passes through. An f/2.8 lens allows less light than an f/1.4 lens, resulting in a dimmer image. Specifically, each full f-stop reduces the light by a factor of four. So switching from f/1.4 to f/2.8 cuts the light significantly.
"The larger the f-number, the smaller the lens opening and the less light is transmitted, which reduces image brightness."

NEW QUESTION # 235

What is defined by a work breakdown structure (WBS)?

- A. Project budget
- B. Project schedule
- C. Project scope
- D. Project resources

Answer: C

Explanation:
A Work Breakdown Structure (WBS) is a hierarchical decomposition of the total scope of work to be carried out by the project team. It breaks down the project into smaller, more manageable components, providing a structured vision of what has to be delivered.
