Topic	Details
Topic 1	<ul style="list-style-type: none">Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
Topic 2	<ul style="list-style-type: none">Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 3	<ul style="list-style-type: none">Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

Topic 4	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q181-Q186):

NEW QUESTION # 181

After deploying an AI model, what must be documented?

- A. The model's architecture, performance metrics and updates.
- B. Licensing information, the team and business goals.
- C. The data used to train, hyperparameters and stakeholder feedback.
- D. Encountered issues, the monitoring process and risks.

Answer: A

Explanation:

Documentation must include the model's architecture, performance metrics, and updates to ensure transparency, reproducibility, and ongoing maintenance.

NEW QUESTION # 182

In procuring an AI system from a vendor, which of the following would be important to include in a contract to enable proper oversight and auditing of the system?

- A. Liability for mistakes.
- B. Responsibility for improvements.
- C. Ownership of data and outputs.
- D. Appropriate access to data and models.

Answer: D

Explanation:

Ensuring oversight and auditability requires that the organization has sufficient access to data, documentation, and model internal outputs necessary for evaluation.

From the AI Governance in Practice Report 2024:

"Access to technical documentation and system internals is essential to enable effective auditing, conformity checks, and accountability mechanisms." (p. 11, 34)

* A is about liability, not auditability.

* B matters for IP rights, not oversight.

* C relates to lifecycle responsibility but doesn't guarantee audit access.

NEW QUESTION # 183

What is the primary purpose of an AI impact assessment?

- A. To determine whether a conformity assessment is needed.
- B. To identify and measure the benefits of an AI system.
- **C. To anticipate and manage the potential risks and harms of an AI system.**
- D. To escalate the findings to the appropriate owner(s).

Answer: C

Explanation:

The primary purpose of an AI impact assessment is to proactively anticipate, identify, and manage potential risks and harms associated with the deployment of an AI system.

NEW QUESTION # 184

Pursuant to the White House Executive Order of November 2023, who is responsible for creating guidelines to conduct red-teaming tests of AI systems?

- A. Office of Science and Technology Policy (OSTP).
- B. Department of Homeland Security (DHS).
- **C. National Institute of Standards and Technology (NIST).**
- D. National Science and Technology Council (NSTC).

Answer: C

Explanation:

The White House Executive Order of November 2023 designates the National Institute of Standards and Technology (NIST) as the responsible body for creating guidelines to conduct red-teaming tests of AI systems.

NIST is tasked with developing and providing standards and frameworks to ensure the security, reliability, and ethical deployment of AI systems, including conducting rigorous red-teaming exercises to identify vulnerabilities and assess risks in AI systems.

NEW QUESTION # 185

CASE STUDY

Please use the following answer the next question:

XYZ Corp., a premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent.

The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.

It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be susceptible to bias.

Address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.

The organization has a large procurement team that is responsible for the contracting of technology solutions.

One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company are responsible for integrating and deploying technology solutions into the organization's operations in a responsible, cost-effective manner.

The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.

Which of the following measures should XYZ adopt to best mitigate its risk of reputational harm from using the AI tool?

- A. Ensure the vendor assumes responsibility for all damages.
- **B. Test the AI tool pre- and post-deployment.**
- C. Continue to require XYZ's hiring personnel to manually screen all applicants.
- D. Direct the procurement team to select the most economical AI tool.

Answer: B

Explanation:

To mitigate the risk of reputational harm from using an AI hiring tool, XYZ Corp should rigorously test the AI tool both before and after deployment. Pre-deployment testing ensures the tool works correctly and does not introduce bias or other issues. Post-deployment testing ensures the tool continues to operate as intended and adapts to any changes in data or usage patterns. This approach helps to identify and address potential issues proactively, thereby reducing the risk of reputational harm. Ensuring the vendor assumes responsibility for damages (B) does not address the root cause of potential issues, selecting the most economical tool (C) may compromise quality, and continuing manual screening (D) defeats the purpose of using the AI tool.
