Wir Fast2test machen aufmerksam auf die Studie der Salesforce Plat-Admn-202 Zertifizierungsprüfungen und haben reiche Erfahrungen, sehr starke Dumps, Ihnen helfen, diese Prüfung hocheffektiv zu bestehen. Ob Sie die Salesforce Plat-Admn-202 Prüfung erfolgreich machen, bedeutet es nicht, wie viele Unterlagen Sie finden, aber es bedeutet, ob Sie die richtige Weise finden. Und Fast2test ist die richtige Weise für Sie, Salesforce Plat-Admn-202 Zertifizierungsprüfung zu bestehen.

Salesforce Plat-Admn-202 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Thema 2	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Thema 3	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Thema 4	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Thema 5	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

Plat-Admn-202 Lernressourcen & Plat-Admn-202 Musterprüfungsfragen

Wollen Sie Salesforce Plat-Admn-202 Zertifizierungsprüfung bestehen und auch die Plat-Admn-202 Zertifizierung besitzen? Wir Fast2test können Ihren Erfolg gewährleisten. Es ist sehr wichtig, die entsprechenden Kenntnisse der Plat-Admn-202 Prüfung vorzubereiten. Und es ist auch sehr wichtig, das geeignete hocheffektive Gerät zu benutzen. Salesforce Plat-Admn-202 Dumps von Fast2test sind unbedingt das beste Lerngerät, das geeignet für Sie ist. Sie können auch unglaubliche Ergebnisse von diesen hocheffektiven Dumps gefunden. Fürchten Sie sich Misserfolg der Salesforce Plat-Admn-202 Prüfungen, klicken Sie bitte Fast2test und Informieren Sie sich.

Salesforce Certified Platform App Builder Plat-Admn-202 Prüfungsfragen mit Lösungen (Q157-Q162):

157. Frage

How should an app builder configure access to a contact's Twitter profile for Salesforce mobile app users?

- A. Add a Twitter Quick Action to the mobile navigation.
- B. Add an AppExchange Lightning Component to the mobile app.
- C. Add a formula field to the Contact page layout.
- **D. Add the Twitter component to mobile view Lightning pages.**

Antwort: D

Begründung:

The Twitter component is a standard Lightning component that can be added to mobile view Lightning pages using the Lightning App Builder. It displays a contact's Twitter profile and recent tweets

158. Frage

Universal Containers generates leads from three different sources: web, trade shows, and partners. Some of the information collected is applicable to all sources, there is also information that is unique to each type of lead. What should an app builder configure to meet these requirements?

- A. Create a partner community and a record type for web and trade show leads
- B. Create custom page payouts for each type of lead only containing the relevant fields
- **C. Create three lead record types each with its own page layout containing the relevant fields**
- D. Create three sections on the lead layout and instruct users to collapse the non-relevant fields

Antwort: C

Begründung:

The solution that the app builder should configure to meet these requirements is creating three lead record types each with its own page layout containing the relevant fields. This way, the app builder can customize the fields and sections that appear on each record type based on the source of the lead. Option B is incorrect because creating a partner community and a record type for web and trade show leads does not address the requirement of collecting information that is unique to each type of lead, as partner community users may have different fields and layouts than internal users. Option C is incorrect because creating three sections on the lead layout and instructing users to collapse the non-relevant fields does not address the requirement of collecting information that is unique to each type of lead, as users may still see or enter data in the wrong fields. Option D is incorrect because creating custom page layouts for each type of lead only containing the relevant fields does not address the requirement of collecting information that is applicable to all sources, as users may miss some common fields.

159. Frage

An app builder received a request to extend record access beyond the organization-wide defaults configured. Which two features satisfy this requirement?

Choose 2 answers

- A. Permission Set Groups
- B. Public Groups
- C. Sharing Rules
- D. Manual Sharing Rules

Antwort: C,D

Begründung:

Sharing rules and manual sharing are two features that can extend record access beyond the organization-wide defaults. Sharing rules are automatic rules that grant access to groups of users based on certain criteria, such as role, public group, or territory. Manual sharing is a manual way of granting access to individual users or groups by the record owner or someone above them in the role hierarchy. Option B and C are not features that extend record access.

160. Frage

An app builder created multiple custom fields, page layouts, and reports in the sandbox and added them to a change set was deployed to production, the reports were NOT deployed.

What should the app builder do?

- A. Move the reports from the Unfiled Public Reports folder and add them to a new change set
- B. Add the reports to an unmanaged package and install the unmanaged package into production.
- C. Move the reports to the Untried Public Reports folder and add them to a new change set.
- D. Recreate the reports in production. Reports are not supported in change sets

Antwort: A

Begründung:

Moving the reports from the Unfiled Public Reports folder and adding them to a new change set is what the app builder should do to deploy the reports to production. According to the Salesforce documentation, "Reports in the Unfiled Public Reports folder aren't available for deployment." Moving the reports to the Untried Public Reports folder, recreating the reports in production, and adding the reports to an unmanaged package are not necessary or recommended actions.

161. Frage

Which three standard component types are available in the Lightning App Builder?

Choose 3 answers

- A. Report details
- B. Rich text
- C. Plain text
- D. Filter list
- E. Recent items

Antwort: A,B,E
