

2026 Useful JN0-105 Flexible Learning Mode | JN0-105 100% Free Online Version

P.S. Free & New JN0-105 dumps are available on Google Drive shared by DumpsActual: <https://drive.google.com/open?id=1de707YKX4kpsfs5su16wu6blZLuI0Wn>

Our company made these JN0-105 practice materials with accountability. We understand you can have more chances being accepted by other places and getting higher salary or acceptance. Our Junos, Associate (JNCIA-Junos) training materials are made by our responsible company which means you can gain many other benefits as well. We offer JN0-105 free demos for your reference, and send you the new updates if our experts make them freely. If you fail the exam after using our JN0-105 exam prep unfortunately, we will switch other versions for you or return full refund.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 2	<ul style="list-style-type: none">• Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.
Topic 3	<ul style="list-style-type: none">• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 4	<ul style="list-style-type: none">• Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device
Topic 5	<ul style="list-style-type: none">• Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 6	<ul style="list-style-type: none">• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.

Juniper JN0-105 Exam Questions - Easily Pass The Exam

Those who are ambitious to obtain Junos, Associate (JNCIA-Junos) certification mainly include office workers; they expect to reach a higher position and get handsome salary, moreover, a prosperous future. Through our JN0-105 test torrent, we expect to design such an efficient study plan to help you build a high efficient learning attitude for your further development. Our study materials are cater every candidate no matter you are a student or office worker, a green hand or a staff member of many years' experience, JN0-105 Certification Training is absolutely good choices for you. Therefore, you have no need to worry about whether you can pass the exam, because we guarantee you to succeed with our technology strength.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which command modifier would you use to see all possible completions for a specific command?

- A. extensive
- B. detail
- C. ?
- D. |

Answer: C

Explanation:

In Junos OS, the ? command modifier is used to display all possible completions for a specific command. This helps users understand the available options and syntax for a command they are trying to use.

NEW QUESTION # 59

Which prompt indicates that you are using configuration mode?

- A. %
- B. #
- C. >
- D. \$

Answer: B

Explanation:

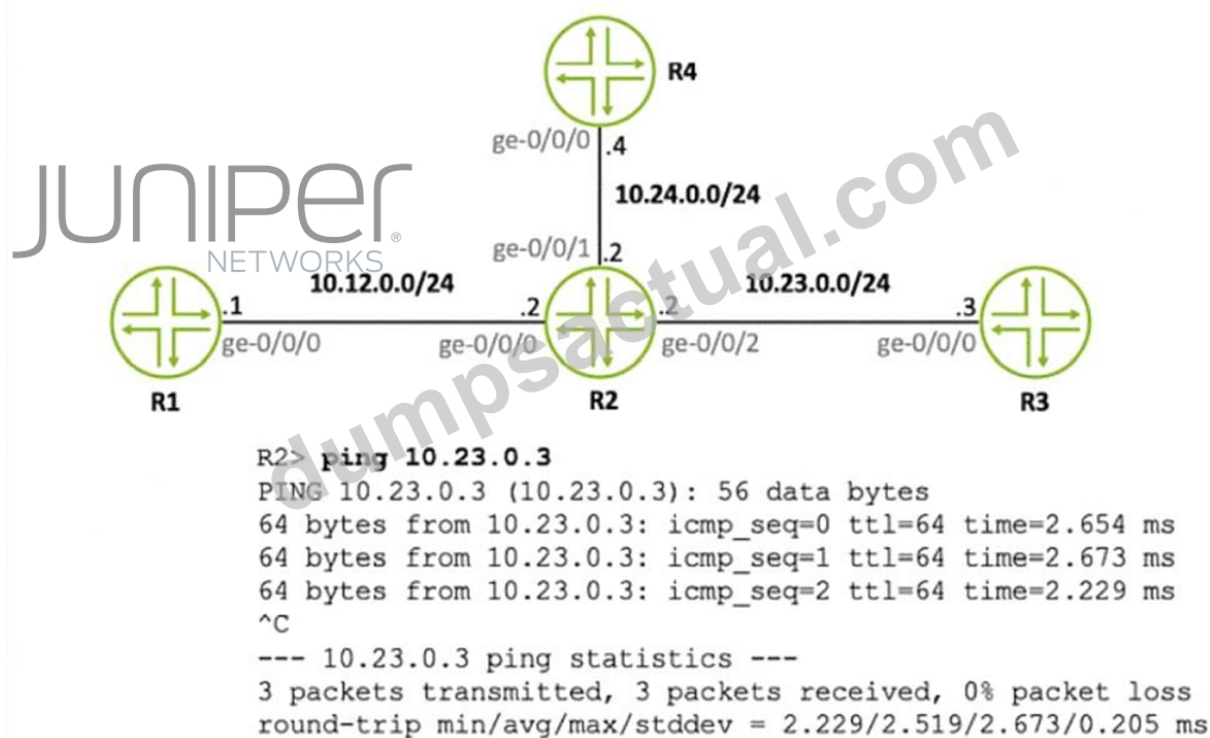

In Junos OS, the # prompt indicates that you are in configuration mode. This mode is used for making changes to the configuration of the device.

Reference: Juniper Networks CLI Modes

"The # prompt indicates that you are in configuration mode."

NEW QUESTION # 60

Click the Exhibit button.

Referring to the exhibit, what is the source IP address of the ping that was executed?

- A. 10.23.0.3
- B. 10.23.0.2
- C. 10.24.0.4
- D. 10.12.0.2

Answer: B

Explanation:

The exhibit shows a ping test being executed from router R2 to the IP address 10.23.0.3. Since the ping command is issued on R2 and we see successful replies from 10.23.0.3, it means the source of the ping must be an interface on R2. Given the network diagram and the IP address scheme, the source IP address of the ping is on the interface ge-0/0/2 of R2, which is in the subnet 10.23.0.0/24. The only logical IP address for R2's interface in this subnet, based on standard networking practices and the given options, would be 10.23.0.2. The other addresses provided in the options belong to different subnets or are the destination of the ping itself.

NEW QUESTION # 61

Your network infrastructure transports data, voice, and video traffic. Users are complaining that voice and video calls are not performing to their expectations.

In this scenario, which technology would you implement to improve voice and video performance on your network?

- A. NAT
- B. STP
- C. CoS
- D. IPv6

Answer: C

Explanation:

In a network that carries diverse types of traffic like data, voice, and video, ensuring the performance of latency-sensitive applications such as voice and video calls is crucial. Class of Service (CoS) is a technology designed to prioritize network traffic, ensuring that critical applications like voice and video receive the necessary bandwidth and minimal latency. CoS mechanisms can

include traffic classification, traffic policing, queue management, and scheduling. By implementing CoS, network administrators can assign higher priority to voice and video traffic, thus improving their performance across the network and addressing the users' complaints about call quality.

NEW QUESTION # 62

You received a new Junos device and are configuring the system-related settings. You must configure this device for the current date and time on the US West coast. You have set the time zone to America/Los_Angeles, however the time and date did not change. In this scenario, which two additional actions would satisfy this requirement? (Choose two.)

- A. Configure a DNS server.
- B. Set the date and time setting manually.
- C. Configure an NTP server.
- D. Reboot the device.

Answer: B,C

Explanation:

When configuring the system-related settings for the current date and time on a Junos device, especially for a specific time zone like America/Los_Angeles, and the time does not automatically adjust, two effective actions can be taken. Firstly, setting the date and time manually allows for immediate correction of the system clock. This can be done via the CLI with the appropriate set date and time command. Secondly, configuring the device to use an NTP server can provide ongoing synchronization with an accurate time source, ensuring that the device maintains the correct time and date automatically in the future, even in the case of restarts or minor drifts in the internal clock.

NEW QUESTION # 63

.....

The cost of registering a Juniper JN0-105 certification is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. DumpsActual provides Juniper JN0-105 preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the certification a second time. For added reassurance, we also provide up to 1 year of free updates. Free demo version of the actual product is also available so that you can verify its validity before purchasing. The key to passing the JN0-105 Exam on the first try is vigorous practice. And that's exactly what you'll get when you prepare from our material. Each format excels in its own way and helps you get success on the first attempt.
