# 2V0-16.25 Test Voucher & 2V0-16.25 Passleader Review

2026 Latest GuideTorrent 2V0-16.25 PDF Dumps and 2V0-16.25 Exam Engine Free Share: https://drive.google.com/open?id=1C78ld__Uhsb-pzrF4sVhBTqgMBx2r09H

May be there are many materials for VMware practice exam, but the 2V0-16.25 exam dumps provided by our website can ensure you the accuracy and profession. If you decided to choose us as your training tool, you just need to use your spare time preparing 2V0-16.25 Free Download Pdf, and you will be surprised by yourself to get the certification.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
Topic 2	• IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 3	• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.

Topic 4	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 5	• Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

2V0-16.25 Passleader Review, 2V0-16.25 Reliable Test Prep

To keep with such an era, when new knowledge is emerging, you need to pursue latest news and grasp the direction of entire development tendency, our 2V0-16.25 training questions have been constantly improving our performance. Our working staff regards checking update of our 2V0-16.25 preparation exam as a daily routine. After you purchase our 2V0-16.25 Study Materials, we will provide one-year free update for you. Within one year, we will send the latest version to your mailbox with no charge if we have a new version of 2V0-16.25 learning materials.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q44-Q49):

NEW QUESTION # 44
An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.
After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Automation
- B. VCF Fleet Management
- C. vSphere Client
- D. VCF Operations

Answer: C

Explanation:
To deploy the VCF Operations for Logs OVA appliance:
* The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.
* After deployment, the appliance can be configured and integrated with VCF.
Other options:
* A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
* C. VCF Automation# Provides automation workflows, not appliance deployment.
* D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.
References:

NEW QUESTION # 45
How does an administrator configure VMware Cloud Foundation (VCF) Operations for logs to send Notifications and Metrics to

VCF Operations?

- A. Launch the wizard from VCF Operations.
- B. Configure the Integration through VCF Operations for Logs.
- C. Launch the wizard from VCF Operations for Logs.
- D. Configure the Integrations through VCF Operations.

Answer: D

Explanation:
To configure VMware Cloud Foundation (VCF) Operations for logs so that it can send notifications and metrics, administrators must use the Integrations workflow inside VCF Operations.
* You configure integrations centrally from the Administration > Integrations page in VCF Operations.
* Here you add the VCF Operations for Logs data source, configure credentials, and set up Webhooks for alerts.
* Once integration is completed, VCF Operations for Logs data can be consumed in VCF Operations dashboards and used for notifications and metrics.
This process is not launched directly from "VCF Operations for Logs," but rather from VCF Operations itself, where all integrations (vCenter, vSAN, NSX, and Logs) are centrally managed.

NEW QUESTION # 46
An administrator is tasked to configure VMware Cloud Foundation (VCF) Operations alerts to notify only relevant stakeholders when alerts trigger.
Which configuration step will satisfy the requirement?

- A. Configure notification to use generic contact information.
- B. Configure notification to write a file to an output folder.
- C. Configure notification to specific alert recipients.
- D. Configure notification for only critical alerts.

Answer: C

Explanation:
In VCF Operations, alerts can be configured with notification settings. To ensure only relevant stakeholders receive alerts:
* You assign specific recipients to notifications.
* This avoids alert fatigue and ensures teams only see alerts they are responsible for.
Other options:
* A. Write to file# Not for stakeholder notifications.
* B. Only critical alerts# Reduces volume, but still not targeted to relevant recipients.
* D. Generic contact info# Sends to broad groups, not selective.

NEW QUESTION # 47
An administrator has enabled a Supervisor on a vSphere cluster. The DevOps team has requested access to vSphere resources such as virtual machines, storage, and networking using Kubernetes tooling. To meet this request, the administrator must provide secure, policy-based access that sets clear boundaries for compute and storage consumption.
Which function is provided by Supervisor services to support this use case?

- A. Enable vSphere Replication between Supervisor Namespaces.
- B. Grant DevOps users administrator access to the vCenter Server system namespace.
- C. Allow access to vSphere resources through Kubernetes in a configured Supervisor Namespace.
- D. Enable virtual machine backup using native Kubernetes ConfigMaps.

Answer: C

Explanation:

WhenSupervisor is enabled:

* It providesSupervisor Namespaces, which grant DevOps teamssecure, policy-based accessto vSphere resources (VMs, storage, networking) through Kubernetes tooling.

* This enforcesboundaries and quotasfor compute/storage consumption.

Other options:

* B. VM backup via ConfigMaps# Not a feature of Supervisor.

* C. vSphere Replication between namespaces# Not a Supervisor function.

* D. Granting administrator access to vCenter system namespace# Violates least-privilege security.

NEW QUESTION # 48

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- A. Distribution
- B. Trend
- C. Table
- D. Text

Answer: B

Explanation:

InVCF Operations, when monitoring metrics like CPU demand across ESX hosts, includinghistorical usage and forecast data, the best visualization is aTrend view.

* Trend viewsdisplay data over time, showing both past and predicted future behavior.

* This makes them ideal forcapacity planning, performance forecasting, and demand analysis.

* Table (A)# Shows raw values but lacks predictive visualization.

* Distribution (B)# Useful for comparing values across objects but not for time-based or forecasted trends.

* Text (C)# Displays static values or metrics, not historical/forecasting data.
