Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q129-Q134):

NEW QUESTION # 129

Refer to the exhibit. An engineer must analyze a segmentation policy in Cisco Secure Workload. What is the result of applying the policy?

- A. HR cannot use Telnet to connect to IT by using Rule #2.
- B. The default catch-all rule is applied by using Rule #3.
- C. The explicit deny all rule is applied.
- D. HR can use Telnet to connect to IT by using Rule #1.

Answer: A

Explanation:

The policy includes three rules under the Apps scope. Rule #1 allows HR to communicate with IT on TCP port 23 (Telnet), but it is marked as "Default." Rule #2 denies the same HR-to-IT Telnet traffic and is marked as "Absolute," which takes precedence over any default rule. In Cisco Secure Workload (Tetration), an

"Absolute" rule will override both "Default" and inherited rules. Therefore, even though there's an allow in Rule #1, the deny in Rule #2 prevents HR from using Telnet to connect to IT.
