Microsoft MB-335最新資料 & MB-335日本語版対応参考書

Microsoft MB-335認証はIT業界にとっても重要な地位があることがみんなが、たやすくその証本をとることはではありません。いまの市場にとってもよい問題集が探すことは難しいです。でも、JPTestKingにいつでも最新な問題を探すことができ、完璧な解説を楽に勉強することができます。

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert 認定 MB-335 試験問題 (Q197-Q202):

質問 # 197

A manufacturer is implementing Dynamics 365 Supply Chain Management with warehouse management processes (WMS). Warehouse workers use hand-held devices to pick and stage batch-tracked products for production. The warehouse manager requires that products are removed from on-hand inventory and consumed when they are picked and staged for production. You need to remove the products from on-hand inventory. What should you configure?

- A. flushing principle, available at location
- B. manufacturing execution, job card device
- C. mobile device menu item, start production order
- **D. flushing principle, start**

正解: D

解説:

The flushing principle is a setting that determines how and when the raw materials are consumed from inventory and registered as work in progress (WIP) for production orders and batch orders. The flushing principle can be configured at the product level, the bill of materials (BOM) or formula line level, or the production order or batch order line level.

The Start flushing principle indicates that the material will be automatically consumed when the production order is started. The amount of material that is consumed is proportional to the quantity that is started. This principle is relevant if, for example, the variance in the consumption is low, the materials are low-value materials, there are no tracking requirements, or there's a short run time on operations.

In this scenario, the warehouse manager requires that products are removed from on-hand inventory and consumed when they are picked and staged for production. Therefore, the Start flushing principle should be configured for the batch-tracked products. This way, the products will be deducted from inventory and set to WIP as soon as the production order is started on the hand-held device.

質問 # 198

You need to set up the state control for sales of motorcycles.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- **A. Create an inclusive restricted product list for United States and add the motorcycle part to the list.**
- B. Create an exclusive restricted product list for Missouri and add the motorcycle part to the list.
- **C. Create an exclusive restricted product list for California and add the motorcycle part to the list.**
- D. Create an inclusive restricted product list for United States. Do not add the motorcycle part to the list.

正解: A、C

解説:

Topic 2, Fabrikam inc sanitation cleaning solutions

Background

Fabrikam Inc. is a manufacturer of sanitation cleaning solutions and equipment including carpet/floor cleaners, pressure washers, scrubbers and vacuums.

Fabrikam Inc. is a single legal entity based in New York city.

_ Current environment

Products manufactured

* Cleaning equipment

o floor cleaner

o pressure washers

o scrubbers

o vacuums

* Liquid cleaning solutions

o No scent

o Orange scent (subcontracted to a vendor named VendorA)

o Pine scent (subcontracted to a vendor named VendorA)

The production quantity for the finished unscented liquid cleaning solution is 40-liters. IngredientC 'or unscented liquid cleaning solution is stored in inventory in 50-liter barrels and allocated in 50-liter increments. Two barrels of IngredientC are used to produce

a barrel of unscented liquid cleaning solution.

Production sites

- * The Eastern United States facility manufactures equipment.
- * The Western United States facility manufactures liquid cleaning solutions.
- * Raw materials and finished products are stocked at the warehouse and distributed from the warehouse.

Warehouse facilities

The warehouse consists of the following zones:

Zone	Description
1	This zone stores parts and material for manufacturing machine equipment and finished products. It consists of four aisles, five shelves, and 20 bins.
2	This zone stores barrels of liquid raw material and finished products. It consists of five aisles and 20 shelves.

_ Requirements

Cleaning equipment manufacturing

You identify the following requirements for manufacturing cleaning equipment:

- * Production is Make to Stock and must be scheduled at an operational level.
- * Machine equipment is produced on an assembly line. Scheduling must be based on production orders.
- * Finished products must be packaged and shipped directly from the warehouse.
- * To reduce delivery times and excess inventory, equipment must be produced as needed.
- * The ability to schedule production must be based on resource capacity and the availability of required materials.
- * Production order operations must be scheduled to start only when capacity and materials are available at the same time and in the required quantities.

Liquid cleaning solution manufacturing

- * Production is Make to Order and is scheduled at the job level. Products must be manufactured in batches.
- * Finished products must be packaged and shipped directly from the warehouse.
- * You must be able to calculate the estimated consumption of ingredients and ensure that the amount is divisible by the number of units the raw material is available.
- * Formula changes must be reviewed and approved. You must ensure that approved formulas cannot be deleted or edited. Approved formulas may be deactivated.

* An ingredient used to manufacture unscented cleaning solution is defined as a restricted product. You must be able to automatically print a product safety data sheet (PSDS) with the packing slip for any order that includes unscented cleaning solution.

* Production must be scheduled to start by date and time according to the order that is specified by the production route.

* You must implement a scheduled Kanban rule that meets the following requirements:

o Prevent overloading a work cell for scheduled Kanbans.

o Visualize excess inventory in a supermarket.

o Store products in supermarkets before they are consumed or shipped.

* You must link relevant financial dimension data to the inventory transactions at each site to ensure that you can trace profit and loss figures directly to East site and West site respectively.

* You must set up production operations for sub-contracting of Pine scent and Orange scent solution to VendorA to ensure that a purchase order is automatically created based on estimation of a production order.

Costing

* The price of raw materials used for manufacturing unscented cleaning solution must be tracked based upon commodity exchange pricing. The margin and cost multiplier must be set up for commodity traded raw material.

* You must set up cost calculation groups to ensure that indirect costs that originate in the manufacturing of finished goods are recognized and absorbed into the product cost.

* The production manager needs to set up picking list journals and BOM item consumption.

Reporting

* Production control parameters must be setup for reporting of automatic BOM and Route consumption.

* You must create reports that include information about cost records and categories for items, and calculation formulas for indirect costs.

* You must treat manufactured items as purchased items for cost roll-up purposes during BOM calculations and reporting.

* You must configure automatic route consumption in connection with the automatic running of Report as finished.

Inventory control

You must not be required to track the total number for items when you enter inventory information into the system. Lot numbers for items must be entered when items are picked from inventory.

Issues

Users report the following issues:

* The production manager observes that items are being deducted from inventory two times on production jobs. A shop supervisor mistakenly registers the process for assembling batteries for the pressure washers to Registered as prepared. You must reschedule the process for a future date.

* Customer1 orders 20 barrels of unscented solution. The order is confirmed. Production must be scheduled to start on December

21 to meet the customer's delivery deadline.

* User2 reports that costs for manufactured items are twice as high as expected.

* UserD reports that the formula for the liquid cleaning solution sometimes changes during production. You must enforce the policies regarding formula editing for current and future use.

質問 # 199

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean processes. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP 01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

* Create a vendor warehouse for the subcontracting vendor.

* Create a vendor resource and add it to a new work cell for outsource painting.

* Create a production flow transfer activity and specify the vendor warehouse as The target warehouse.

Does the solution meet the goal?

- A. No
- B. Yes

正解: A

解説:

Explanation

The solution does not meet the goal. Here is the explanation:

To create a subcontracting activity for the painting service, you should use the following steps1:

Create a vendor warehouse for the subcontracting vendor. This step is correct, because you need to create a warehouse that is assigned to the vendor account and set it as vendor-managed1. This way, you can track the inventory that is located at the vendor's site.

Create a vendor resource and add it to a new work cell for outsource painting. This step is correct, because you need to create a resource that is assigned to the vendor account and add it to a resource group that represents the subcontracting work cell1. This way, you can assign the subcontracting activity to the vendor resource.

Create a production flow transfer activity and specify the vendor warehouse as the target warehouse. This step is incorrect, because you need to create a production flow process activity, not a transfer activity, for the subcontracting service1. A process activity represents an operation that transforms material into products or semi-finished goods2. A transfer activity represents a movement of material or products from one location to another2. You also need to specify the service item (SP 01) as the product of the process activity, and select the Generate license plate option on the mobile device menu item that is used for reporting as finished1.

質問 # 200

You need to set up the chocolate items.

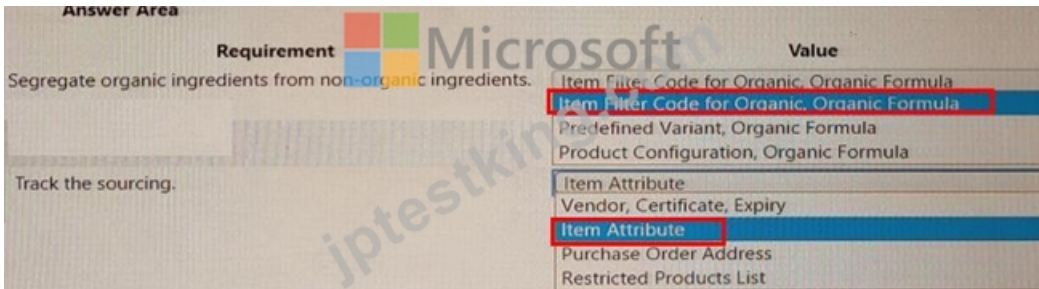

Which values should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Value
Segregate organic ingredients from non-organic ingredients.	<input type="checkbox"/> Item Filter Code for Organic, Organic Formula
	<input checked="" type="checkbox"/> Item Filter Code for Organic, Organic Formula
	<input type="checkbox"/> Predefined Variant, Organic Formula
	<input type="checkbox"/> Product Configuration, Organic Formula
Track the sourcing.	<input checked="" type="checkbox"/> Item Attribute
	<input checked="" type="checkbox"/> Vendor, Certificate, Expiry
	<input checked="" type="checkbox"/> Item Attribute
	<input type="checkbox"/> Purchase Order Address
	<input type="checkbox"/> Restricted Products List

解説:

質問 # 201

An automobile manufacturer leases cars to companies for use as company cars.

A car leased to a company breaks down and requires repairs.

You must open a maintenance request and replace the car with an equivalent model until the original car is repaired and returned to the company. When the manufacture' receives and inspects the car, the replacement car can be released to the company.

You need to select the maintenance request components to use.

Which components should you use? To answer, drag the appropriate components to the correct assets. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

正解:

解説:

Explanation:

To select the maintenance request components to use, you should use the following:

* The leased car that must be repaired: You should use the Inbound asset component. An inbound asset is an asset that is received from a customer or vendor for maintenance or repair¹. You can use the Inbound assets page to create and manage inbound assets in Asset Management². You can also create a maintenance request for an inbound asset and link it to a work order³.

* The replacement car for the leased car: You should use the Outbound asset component. An outbound asset is an asset that is sent to a customer or vendor as a temporary replacement for an asset that is being maintained or repaired¹. You can use the Outbound assets page to create and manage outbound assets in Asset Management. You can also link an outbound asset to an inbound asset or a work order.

1: Inbound and outbound assets 2: Inbound assets 3: Create a maintenance request for an inbound asset :

[Outbound assets]
