

# NCP-EUC Reliable Test Book | NCP-EUC PDF Guide

What's more, part of that TestInsides NCP-EUC dumps now are free: <https://drive.google.com/open?id=1U1eViGsaXZoHw5iO65E6NbQGS6idou4>

As long as you face problems with the NCP-EUC exam, our company is confident to help you solve. Give our NCP-EUC practice quiz a chance to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for NCP-EUC Exam. And we have three different versions of our NCP-EUC learning materials, you will find that it is so interesting and funny to study with our study guide.

The NCP-EUC certification exam covers a range of topics related to Nutanix end-user computing solutions, including virtual desktop infrastructure (VDI), application delivery, and user profile management. NCP-EUC exam requires candidates to demonstrate their ability to configure and manage Nutanix solutions for end-users, as well as their understanding of key concepts related to end-user computing. The NCP-EUC certification program is designed to help IT professionals stay up-to-date with the latest developments in end-user computing and to demonstrate their expertise to potential employers.

The NCP-EUC certification exam covers various topics such as the Nutanix architecture, installation and configuration of Nutanix components, management of virtual desktops and applications, and troubleshooting of common issues. NCP-EUC Exam is designed to test the candidate's knowledge and skills in these areas and validate their ability to manage and deploy Nutanix end-user computing infrastructure effectively. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is a valuable credential for IT professionals who want to demonstrate their proficiency in the Nutanix environment and advance their careers in end-user computing.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam practice questions & NCP-EUC reliable study & Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam torrent vce

Everybody wants success, but not everyone has a strong mind to persevere in study. If you feel unsatisfied with your present status, our NCP-EUC actual exam can help you out. Our products always boast a pass rate as high as 99%. Using our NCP-EUC study materials can also save your time in the exam preparation. If you choose our NCP-EUC Test Engine, you are going to get the NCP-EUC certification easily. Just make your choice and purchase our study materials and start your study right now!

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q97-Q102):

### NEW QUESTION # 97

The operations team have been tasked with increasing overall datacenter efficiency with a target minimum of 80% CPU, memory, and storage capacity utilization. They are requesting usage data from all application owners be sent on a monthly basis to be ingested into their capacity management software.

An administrator has an implementation of four Nutanix clusters under the management of a single Prism Central Instance.

How should the administrator best provide the data needed to the operations team to ensure adherence to the datacenter utilization

directive?

- A. Create a Metric Chart in Prism Central with CPU, Memory, and Storage usage across all clusters and export the data to be sent to the operations team,
- B. Review the VM Efficiencies widget in Prism Central and export the data to a comma delimited file to be sent to the operations team.
- C. Schedule a monthly email report with CPU, Memory, and Storage Usage data across all clusters under the Reporting facility in Prism Central.
- D. Export the CPU Memory and Storage Usage metrics under Virtual Infrastructure/VMs in Prism Central and FTP the file to the operations team's FTP server.

**Answer: C**

Explanation:

This option allows you to create a custom report with the required metrics for all VMs across all clusters and send it automatically to the operations team via email<sup>4</sup>. This way, you don't have to manually export or FTP the data every month.

#### NEW QUESTION # 98

An administrator needs to configure a license server to be accessible by Frame desktops. Which server should the administrator configure?

- A. utility Server
- B. Azure VM Instance
- C. Sandbox
- D. EC2 VM Instance

**Answer: A**

Explanation:

Frame is a cloud-based desktop-as-a-service platform that allows users to access Windows applications and desktops from any device<sup>1</sup>. A license server is a server that hosts a network licensing manager for software that requires licenses to run<sup>2</sup>. Frame supports using a utility server as a license server for Frame desktops<sup>1</sup>. A utility server is a stand-alone, general purpose Windows server that can be configured and managed from the Frame dashboard<sup>1</sup>.

<https://docs.frame.nutanix.com/platform/admin/utility-servers/>

#### NEW QUESTION # 99

An administrator suspects that Windows desktop VMs are using less than their configured memory, resulting in wasted cluster resources.

How can an administrator verify if this is true?

- A. View the over-provisioned VMs list.
- B. Use Task Manager on each desktop VM.
- C. Run a NCC health check report.
- D. Review the capacity runway summary.

**Answer: A**

Explanation:

Nutanix Prism Central includes Behavioral Learning and Efficiency reporting tools designed to identify inefficient resource usage.<sup>7</sup> To verify if VMs are "using less than their configured memory" (wasted resources), the administrator should view the Over-provisioned VMs list within the Efficiency widget. Nutanix defines an "Over-provisioned VM" as one that is sized with more resources (CPU/Memory) than it actually consumes based on historical performance data.<sup>8</sup> This list explicitly identifies these VMs, allowing the administrator to right-size them and reclaim cluster resources, whereas Task Manager (Option A) is manual/individual, and Capacity Runway (Option D) focuses on global cluster storage/resource exhaustion time rather than individual VM efficiency.

#### NEW QUESTION # 100

A previous administrator provisioned all of the virtual desktops in a virtual desktop Nutanix cluster using the following specifications:

\* 6 vCPU

- \* 8 GB Memory
- \* 300 GB HDD

How can the current administrator best prepare next fiscal year's budget using Prism Central?

- A. Review most recent in Tasks.
- B. Review the most recent in Audits.
- C. Execute a Calm blueprint to add additional desktops.
- **D. Execute Capacity Runway scenario.**

**Answer: D**

Explanation:

In Nutanix Prism Central, the Capacity Runway scenario provides details on the available capacity for the next 12 months based on the current usage pattern. This feature can help the administrator to plan and prepare the budget for the next fiscal year. The administrator can use this information to decide whether more resources need to be added to the Nutanix cluster or if the existing resources are sufficient.

<https://www.nutanix.com/products/prism/prism-central>

Prism Central planning tools can help you estimate the capacity runway of your cluster by considering the storage, CPU, and memory capacity. However, you need to have at least 21 days of data from a cluster to calculate the baseline runway estimates.

### NEW QUESTION # 101

An administrator is required to keep past custom reports. The report runs once daily. Last Friday, when the administrator checked, there were 22 copies saved. On Friday this week, an administrator expects to see 29 saved report copies, but some reports are missing.

What is a probable cause?

- A. The system reached the default retention policy limit.
- **B. The system currently has retained the maximum of 25 copies.**
- C. Time-based retention reached the maximum of 2 months.
- D. PC has migrated to another system and all reports are not visible.

**Answer: B**

Explanation:

In Nutanix Prism Central, the reporting feature allows administrators to schedule and generate custom reports.

To manage storage and database capacity, Prism Central enforces a retention limit on these generated report instances.

According to the Prism Central Guide, "By default, Prism Central retains 25 instances of each report." In the scenario described:

\* The administrator had 22 reports.

\* Over the next week (7 days), 7 new reports were generated (22 + 7 = 29 total potential instances).

\* Because the total (29) exceeds the hard default limit of 25, the system automatically rotated out (deleted) the 4 oldest copies to maintain the count at 25. This explains why reports are missing despite the expectation of seeing 29.

### NEW QUESTION # 102

.....

You are in a quest for high quality practice materials like our NCP-EUC preparation exam. We avail ourselves of this opportunity to approach you to satisfy your needs. In order to acquaint you with our NCP-EUC practice materials, we wish to introduce a responsible company dealing with exclusively in area of NCP-EUC training engine and it is our company which keeps taking care of the readers' requests, desires and feeling about usage of our NCP-EUC study questions in mind.
