## **SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q28-Q33):**

### **NEW QUESTION # 28**

What are the characteristics of the RISE with SAP and GROW with SAP transformation journeys? Note:

There are 2 correct answers to this question.

- A. GROW with SAP is a hero journey for all net-new customers
- B. RISE with SAP is the journey for large new SAP ERP customers leveraging the SAP Business Suite
- **C. RISE with SAP is the journey for existing SAP ERP customers moving to the SAP Business Suite**
- **D. GROW with SAP is the mid-market solution hero journey for all net-new customers**

**Answer: C,D**

Explanation:

RISE with SAP and GROW with SAP are two distinct transformation journeys offered by SAP to facilitate the adoption of cloud-based ERP systems, specifically SAP S/4HANA Cloud, as part of the SAP Business Suite. These journeys cater to different customer segments and transformation needs, with RISE with SAP targeting existing SAP ERP customers and GROW with SAP focusing on new customers, particularly in the mid-market. The question asks for the characteristics of these transformation journeys, with two correct answers. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" narrative.

\* Option A: GROW with SAP is the mid-market solution hero journey for all net-new customers. GROW with SAP is specifically designed for net-new SAP customers, particularly mid-sized businesses, and is often referred to as a "hero journey" for its streamlined, standardized approach to cloud ERP adoption.

It leverages SAP S/4HANA Cloud Public Edition, a SaaS-based solution that enables rapid implementation (as little as four weeks) using preconfigured best practices. The documentation emphasizes GROW with SAP as the ideal solution for mid-market companies or those new to SAP, seeking a fast, cost-effective, and predictable ERP deployment without extensive customization. The term "mid-market solution hero journey" accurately reflects its focus on enabling smaller or newer customers to quickly realize value, making this option correct. Extract: "GROW with SAP is a SAP software solution initiative designed exclusively for mid-size companies and initial SAP customers. ..."

It is a public cloud solution offered as Software-as-a-Service (SaaS), facilitating rapid and standardized ERP implementation."

Extract: "For midsize customers looking for a solution they can immediately adopt, GROW with SAP brings together SAP S/4HANA Cloud, public edition with accelerated adoption services, a global community of experts, and free learning resources that can help customers go live in as little as four weeks with a greenfield deployment in a clean system." Extract: "GROW with SAP is designed for mid-sized businesses and new SAP customers, often referred to as 'greenfield' implementers. ... It is perfect for companies in growth phases, seeking to enhance customer engagement and employee experience." This option is correct.

\* Option B: RISE with SAP is the journey for existing SAP ERP customers moving to the SAP Business Suite. RISE with SAP is a guided transformation journey tailored for existing SAP ERP customers (e.g., those using SAP ECC or on-premises SAP S/4HANA) to modernize their ERP landscape by transitioning to the SAP Business Suite, primarily through SAP S/4HANA Cloud Private Edition. It supports both greenfield (new implementation) and brownfield (system conversion) scenarios, allowing customers to retain customizations and move to the cloud at their own pace. The documentation consistently highlights RISE with SAP as the solution for on-premises SAP customers seeking to leverage the cloud benefits of the SAP Business Suite, making this option accurate. Extract: "RISE with SAP is a guided transformation journey designed for SAP ERP customers to quickly realize the full potential of Business Suite, supported by proven methodologies, advanced tools, and expert guidance."

RISE with SAP is tailored for existing SAP ERP customers, enabling them to transition seamlessly from on-premises ERP to Business Suite while modernizing their processes and infrastructure at their own pace." Extract: "For SAP customers looking to modernize on-premises systems, the RISE with SAP journey is tailored to enable an easy transition to cloud ERP at a pace comfortable for the customer. ... These characteristics align with SAP S/4HANA Cloud Private Edition as the tailored-to-fit cloud ERP that adapts to an organization's unique transformation." Extract: "RISE with SAP is an ERP adoption solution that helps current SAP ecosystem users transition traditional ERP information and processes to a cloud system without compromising or putting your data at risk." This option is correct.

\* Option C: GROW with SAP is a hero journey for all net-new customers. While GROW with SAP is indeed a "hero journey" for net-new SAP customers, the statement is overly broad as it implies it serves all net-new customers, including large enterprises.

GROW with SAP is specifically designed for mid-sized businesses or those new to SAP with simpler requirements, leveraging SAP S/4HANA Cloud Public Edition for rapid, standardized deployments. Large net-new customers with complex needs may opt for RISE with SAP, which supports SAP S/4HANA Cloud Private Edition for greater customization. The documentation clarifies that GROW with SAP targets mid-market net-new customers, not all net-new customers universally, making this option incorrect. Extract: "GROW with SAP is designed for mid-sized businesses and new SAP customers, often referred to as 'greenfield' implementers. ... It is particularly beneficial for companies transitioning from traditional ERP systems to a modern, cloud-based ERP." Extract: "GROW with SAP, on the other hand, is leaner, more predictable, and targets users with measured budgets and expectations." This option is incorrect.

\* Option D: RISE with SAP is the journey for large new SAP ERP customers leveraging the SAP Business Suite. RISE with SAP is primarily designed for existing SAP ERP customers transitioning from on-premises systems to the cloud, not for large new SAP ERP customers. While RISE with SAP can support net-new customers with complex needs (e.g., large enterprises requiring customization), its core focus is on modernizing the existing SAP customer base. GROW with SAP is the primary journey for net-new customers, particularly mid-sized ones, though RISE may be used for large net-new customers in specific cases. The documentation emphasizes RISE with SAP's role for existing customers, making this option inaccurate. Extract: "RISE with SAP is primarily designed for the introduction of SAP's private cloud. The offer is therefore primarily aimed at existing customers." Extract: "RISE with SAP is tailored for existing SAP ERP customers, enabling them to transition seamlessly from on-premises ERP to Business Suite while modernizing their processes and infrastructure at their own pace." This option is incorrect.

Summary of Correct Answers:

\* A: GROW with SAP is the mid-market solution hero journey for net-new customers, offering a rapid, standardized ERP implementation with SAP S/4HANA Cloud Public Edition.

\* B: RISE with SAP is the journey for existing SAP ERP customers moving to the SAP Business Suite, supporting a tailored transition to SAP S/4HANA Cloud Private Edition with flexibility for customization.

## NEW QUESTION # 29

Which SAP Business Suite modules are essential for supply chain management? There are 2 correct answers to this question.

- A. SAP ERP
- B. SAP BusinessObjects
- C. SAP SCM (Supply Chain Management)
- D. SAP CRM

Answer: A,C

## NEW QUESTION # 30

Which of the following trends are shaping the adoption of AI in modern enterprises? Note: There are 3 correct answers to this question.

- A. To fully automate customer services
- B. To use generative AI to enhance innovation and generate insights
- C. To prioritize responsible, transparent AI practices to minimize bias
- D. To limit AI usage to IT departments only
- E. To integrate AI into business applications for seamless workflow enhancement

Answer: B,C,E

Explanation:

The adoption of AI in modern enterprises is driven by trends that align with business innovation, operational efficiency, and ethical considerations. SAP, as a leader in enterprise software, emphasizes AI integration within its Business AI portfolio, including SAP Business Data Cloud and SAP S/4HANA, to address these trends. The question asks for the trends shaping AI adoption, with three correct answers. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" narrative and broader industry insights on AI adoption.

\* Option A: To use generative AI to enhance innovation and generate insightsGenerative AI is a transformative trend in modern enterprises, enabling innovation by generating insights, automating content creation, and enhancing decision-making. SAP emphasizes generative AI within its Business AI offerings, such as Joule and SAP Business Data Cloud, to drive innovation across business processes like finance, HR, and supply chain management. The documentation highlights how generative AI helps enterprises uncover new opportunities and generate actionable insights, making it a key trend shaping AI adoption.Extract: "Generative AI is poised to unlock innovation across your enterprise, automating processes, generating content, and delivering insights that drive smarter decisions. With SAP Business AI, you can embed generative AI into your SAP applications to transform how your business operates." Extract: "SAP Business Data Cloud is a fully managed SaaS solution that unifies and governs all SAP data and seamlessly connects with third-party data-giving line-of-business leaders context to make even more impactful decisions. ... Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." This option is correct.

\* Option B: To limit AI usage to IT departments onlyLimiting AI usage to IT departments is not a trend shaping AI adoption in modern enterprises. On the contrary, enterprises are democratizing AI across business functions, embedding it into applications used by various departments (e.g., finance, HR, operations) to enhance productivity and decision-making. SAP's approach, through tools like Joule and SAP Business Data Cloud, focuses on making AI accessible to business users, not restricting it to IT.

The documentation and industry sources emphasize broad AI adoption across organizations, making this option incorrect.Extract: "With SAP Business AI, you can empower every employee with AI capabilities embedded in the applications they use every day, from finance to supply chain to human resources." This option is incorrect.

\* Option C: To integrate AI into business applications for seamless workflow enhancementIntegrating AI into business applications is a significant trend shaping enterprise AI adoption. SAP's Business AI strategy focuses on embedding AI into core business processes within SAP applications (e.g., SAP S

/4HANA, SAP SuccessFactors) to enhance workflows, automate tasks, and improve efficiency. This seamless integration ensures that AI enhances existing processes without disrupting user workflows, a trend widely recognized in SAP's documentation and industry analyses.Extract: "SAP Business AI embeds intelligent capabilities directly into your business processes, so you can work faster, smarter, and more efficiently. From automating routine tasks to providing predictive insights, AI is seamlessly integrated into SAP applications to drive better outcomes." Extract: "Enterprises are increasingly integrating AI into their core business applications to streamline workflows, enhance decision-making, and improve operational efficiency. This trend is evident in SAP's approach to embedding AI across its portfolio, ensuring seamless adoption." This option is correct.

\* Option D: To fully automate customer servicesWhile AI is used to enhance customer service (e.g., through chatbots and personalized interactions), fully automating customer services is not a primary trend shaping enterprise AI adoption. Enterprises aim to augment customer service with AI to improve efficiency and personalization, but human interaction remains critical in many scenarios. SAP's AI solutions focus on broader applications, such as process automation and insights generation, rather than complete automation of customer service. The documentation does not highlight this as a key trend.

Extract: "SAP Business AI enhances customer experiences by providing personalized recommendations and predictive insights, but it is designed to augment, not replace, human interactions in customer service processes." This option is incorrect.

\* Option E: To prioritize responsible, transparent AI practices to minimize biasPrioritizing responsible and transparent AI practices is a critical trend shaping enterprise AI adoption. Enterprises, including those using SAP solutions, focus on ethical AI to ensure fairness, transparency, and compliance with regulations. SAP's Business AI emphasizes responsible AI practices, such as minimizing bias and ensuring data governance, to build trust in AI outcomes. This trend is explicitly supported in SAP's documentation and aligns with industry priorities for ethical AI deployment.Extract: "SAP Business AI is built on a foundation of responsible AI, ensuring transparency, fairness, and compliance. Our solutions prioritize ethical AI practices to minimize bias and deliver trusted outcomes for your business." Extract: "Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." This option is correct.

Summary of Correct Answers:

\* A: Using generative AI to enhance innovation and generate insights is a key trend, enabling enterprises to leverage AI for creative solutions and decision-making.

\* C: Integrating AI into business applications for seamless workflow enhancement drives efficiency and adoption across business functions.

\* E: Prioritizing responsible, transparent AI practices to minimize bias ensures ethical AI deployment and builds trust in enterprise AI solutions.
