# 1Z0-182 Latest Test Discount & Realistic Free PDF Quiz 2026 Oracle Oracle Database 23ai Administration Associate Reliable Dumps Ebook

Your dream is very high, so you have to find a lot of material to help you prepare for the exam. ActualTestsQuiz Oracle 1Z0-182 Exam Materials can help you to achieve your ideal. ActualTestsQuiz Oracle 1Z0-182 exam materials is a collection of experience and innovation from highly certified IT professionals in the field. Our products will let you try all the problems that may arise in a really examinations. We can give you a guarantee, to ensure that candidates get a 100% correct answer.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).
Topic 2	• Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.
Topic 3	• Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 4	• Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.

Topic 5	• Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Topic 6	• Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.
Topic 7	• Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.
Topic 8	• Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.
Topic 9	• Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 10	• Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.

1Z0-182 Reliable Dumps Ebook & New Guide 1Z0-182 Files

Countless Oracle Database 23ai Administration Associate 1Z0-182 exam candidates have already passed their 1Z0-182 certification exam and they all got help from top-notch 1Z0-182 pdf questions and practice tests. You should not ignore it and must try real 1Z0-182 exam questions today. The ActualTestsQuiz is committed to making the Oracle Database 23ai Administration Associate 1Z0-182 exam preparation process simple, quick, and smart in all aspects. To avail this objective the ActualTestsQuiz is offering valid, updated, and real 1Z0-182 practice test questions in three easy-to-use and high-in-demand formats. These formats are Oracle PDF Questions files, desktop practice test software, and web-based 1Z0-182 Practice Test software. All these three Oracle Database 23ai Administration Associate 1Z0-182 exam question formats are designed and verified by experienced and qualified Oracle 1Z0-182 certification exam trainers. So you can trust Oracle Database 23ai Administration Associate 1Z0-182 practice test questions and start 1Z0-182 exam preparation without wasting further time.

Oracle Database 23ai Administration Associate Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which two statements are true about the UNLIMITED TABLESPACE system privilege and space quota?

- A. It is overridden by a space quota specified for the user.
- B. It allows a user to have unlimited space only in their default permanent tablespace.
- C. It allows a role to have unlimited space in any tablespace in the database.
- D. By default, users have no quota on their default permanent tablespace.
- E. It allows a user to have unlimited space in any tablespace in the database.

Answer: A,E

Explanation:
A .True. Grants unlimited space across all tablespaces.
B .True. Explicit quotas override the privilege.
C .False. Not limited to default tablespace.

D .False. Roles can't have this privilege directly.
E .False. Default is zero quota unless specified.

NEW QUESTION # 27
What is the result of the following command? ALTER PLUGGABLE DATABASE PDB1 DISCARD STATE;

- A. It is unnecessary if the PDB is in the process of being upgraded.
- B. It should be used whenever PDB1 open mode needs to be changed.
- C. PDB1 is reverted to its default properties, which includes not to automatically open after a CDB restart.
- D. PDB1 is reverted to its default properties, which includes automatic opening after a CDB restart.

Answer: C

Explanation:
A .False. DISCARD STATE isn't tied to upgrades; it resets PDB startup behavior.
B .True. Discards saved state, reverting PDB1 to manual open mode (not auto-open) after CDB restart.
C .False. Default is not auto-open; it's manual unless explicitly saved as OPEN.
D .False. Used for state management, not general mode changes (e.g., OPEN READ WRITE).

NEW QUESTION # 28
Which three statements are true about a dedicated server configuration?

- A. A dedicated server process can be spawned by the listener when using local clients.
- B. A dedicated server process may be reused by a new session after the session using that process terminates.
- C. The DBA configures the maximum number of dedicated server processes that can share the same dispatcher process.
- D. Each dedicated server process has its own dispatcher process.
- E. A dedicated server process communicates directly with a client or middle-tier process once the session is established.
- F. A dedicated server process can be spawned without a listener when using local clients.

Answer: A,E,F

Explanation:
A .False. Dispatchers are for shared servers, not dedicated.
B .False. Dedicated processes die with the session.
C .True. Direct client-server communication occurs.
D .False. No dispatchers in dedicated mode.
E .True. Listener spawns for local/remote clients.
F .True. Local logins (e.g., sqlplus /) bypass the listener.

NEW QUESTION # 29
Which two are true about shrinking a segment online?

- A. It is not possible to shrink either indexes or Index Organized Tables (IOTs).
- B. To shrink a table it must have row movement enabled.
- C. To shrink a table it must have a PRIMARY KEY constraint.
- D. To shrink a table it must have a UNIQUE KEY constraint.
- E. It must be in a tablespace that uses Automatic Segment Space Management (ASSM).

Answer: B,E

Explanation:
A .True. ROW MOVEMENT must be enabled for SHRINK SPACE.
B .False. Indexes and IOTs can be shrunk with CASCADE.
C .False. No such constraint requirement.
D .True. ASSM is required for online shrinking.
E .False. No primary key requirement.

NEW QUESTION # 30
Which two statements describe how Optimizer Statistics are collected?

- A. Optimizer Statistics are collected automatically by an automatic maintenance job that runsduring predefined maintenance windows.
- B. Optimizer Statistics can be manually collected at multiple levels using DBMS_STATS.GATHER_*_STATS PL/SQL procedures.
- C. Optimizer Statistics are collected by the Statistics Advisor.
- D. Optimizer Statistics are collected automatically by Automatic Workload Repository (AWR) Snapshot.
- E. Optimizer Statistics are collected in real-time as data is inserted, deleted, or updated.

Answer: A,B

Explanation:
Optimizer Statistics drive the cost-based optimizer's query plans. Let's dissect each option:
A . Optimizer Statistics are collected automatically by an automatic maintenance job that runs during predefined maintenance windows.
True. Oracle 23ai uses the AutoTask framework to gather stats automatically during maintenance windows (e.g., nightly 10 PM-2 AM). The GATHER_STATS_PROG job, managed by DBMS_AUTO_TASK_ADMIN, collects stats for stale or missing objects.
Mechanics:Controlled by STATISTICS_LEVEL=TYPICAL (default) and the DEFAULT_MAINTENANCE_PLAN. It prioritizes objects with >10% changes (stale stats) or no stats.
Practical Use:Ensures stats are current without manual intervention, critical for dynamic workloads.
Edge Case:Disabled if STATISTICS_LEVEL=BASIC or the job is manually disabled via DBMS_AUTO_TASK_ADMIN.DISABLE.
B . Optimizer Statistics are collected in real-time as data is inserted, deleted, or updated.
False. Stats aren't updated in real-time; this would be too resource-intensive. Instead, Oracle tracks changes (e.g., via DBA_TAB_MODIFICATIONS) and updates stats periodically via AutoTask or manually. Real-time stats exist in 23ai for specific cases (e.g., GATHER_TABLE_STATS with REAL_TIME_STATS), but it's not the default.
Why Incorrect:Real-time collection would degrade performance for OLTP systems, contradicting Oracle's batch approach.
C . Optimizer Statistics can be manually collected at multiple levels using DBMS_STATS.GATHER_*_STATS PL/SQL procedures.
True. The DBMS_STATS package offers granular control: GATHER_TABLE_STATS, GATHER_SCHEMA_STATS, GATHER_DATABASE_STATS, etc., allowing stats collection for tables, schemas, or the entire database.
Mechanics:Example: BEGIN DBMS_STATS.GATHER_TABLE_STATS('HR', 'EMPLOYEES'); END;. Options like ESTIMATE_PERCENT and DEGREE fine-tune the process.
Practical Use:Used for immediate stats updates post-DML or for custom schedules outside maintenance windows.
Edge Case:Overuse can lock stats (e.g., FORCE=TRUE), requiring careful management.
D . Optimizer Statistics are collected by the Statistics Advisor.
False. The Statistics Advisor (new in 23ai) analyzes and recommends stats improvements but doesn't collect them. Collection is still via DBMS_STATS or AutoTask.
Why Incorrect:It's a diagnostic tool, not an executor.
E . Optimizer Statistics are collected automatically by Automatic Workload Repository (AWR) Snapshot.
False. AWR snapshots capture performance metrics (e.g., wait times), not optimizer stats. Stats collection is a separate process via AutoTask or manual commands.
Why Incorrect:AWR and stats collection serve distinct purposes-monitoring vs. optimization.

NEW QUESTION # 31
......

In fact, a number of qualifying exams and qualifications will improve your confidence and sense of accomplishment to some extent, so our 1Z0-182 learning materials can be your new target. When we get into the job, our 1Z0-182 learning materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our 1Z0-182 Learning Materials can help you improve your ability to work in the shortest amount of time, thereby surpassing other colleagues in your company, for more promotion opportunities and space for development.
