### Related Certification

The Microsoft PL-200 Exam is directly related to the Microsoft Certified: Power Platform Functional Consultant Associate certification. The prime focus of this role-based certificate is to infuse updated and industry-specific configuration and consulting skills. So, using it as a means of verification, one can easily demonstrate competency in Power Platform and Microsoft apps and services such as Teams, Dynamics 365, Excel, and Word. It denotes that the certification holder is qualified to design and deploy the solutions that involve usages of Power Apps, Power BI, and Power Virtual Agents.

In fact, all three versions contain the same questions and answers.

## Microsoft Power Platform Functional Consultant Sample Questions (Q261-Q266):

### NEW QUESTION # 261

A company deploys several model-driven apps. The company uses shared devices in their warehouse. The devices are always powered on. Users log on to the devices and then launch the apps to perform actions.

Unauthorized users recently uploaded several files after another user failed to log out of a device. The company needs to prevent these incidents from occurring in the future.

You need to configure the solution to prevent the reported security incidents.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: Set a timeout in the Power Platform admin center.

To enforce users to reauthenticate after a pre-determined period of time, admins can set a session timeout for their individual environments. Users can only remain signed in the application for the duration of session. The application signs out the user when the session expires. Users need to sign in with their credentials to return to customer engagement apps.

Note: Configure session timeout

\* In the Power Platform admin center, select an environment.

\* Select Settings > Product > Privacy + Security.

\* Set Session Expiration and Inactivity timeout. These settings apply to all users.

Incorrect:

Configure inactivity timeout

\* In the Power Platform admin center, select an environment.

\* Select Settings > Product > Privacy + Security.

\* Set Session Expiration and Inactivity timeout. These settings apply to all users.

Box 2: Enter the restricted file types in the SharePoint admin center.

To block uploading of specific file types

\* Go to the Settings page of the new SharePoint admin center,

\* Select Sync.

\* Select the Block upload of specific file types check box.

\* Enter the file name extensions you want to block, for example: exe or mp3.

\* Select Save.

### NEW QUESTION # 262

You need to design the resort portal's email registration process.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

### NEW QUESTION # 263

You are creating a business process flow for a Power Apps app.

The business process flow must meet the following requirements:

\* Must be available offline.

\* Send an email to the team when a record is created.  
You need to set up business process flow.  
What should you do? To answer, select the appropriate options in the answer area.  
Each correct selection is worth one point

**Answer:**

Explanation:

**NEW QUESTION # 264**

Drag and Drop Question

You plan to automate several different processes by using Power Automate.

Each process has unique characteristics.

You need to recommend components for each process.

Which components should you recommend? To answer, drag the appropriate components to the correct processes. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

Explanation:

Box 1: Flow that uses a custom connector

Custom connectors are just wrappers around REST APIs. These connectors help define how your users are going to consume the API without the requirement to know how to access your REST service.

Box 2: Unattended UI flow

There is a queue of emails with no human supervision so will take us to unattended flows.

**NEW QUESTION # 265**

A guest asks about the start time of a specific scheduled event and wants to know what the snow conditions will be like during their stay.

You need to determine how to design the chat solution to answer those questions.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

Explanation

Graphical user interface Description automatically generated

Box 1: Load the extracted topic into a variable

Power Virtual Agents uses entities to understand and identify a specific type of information from a user's responses. When saving the identified information to a variable, a variable type will be associated with it. The variable type is analogous with the entity.

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

A topic has trigger phrases - these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue - and conversation nodes - these are what you use to define how a bot should respond and what it should do.

Box 2: Create a custom entity

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.
