Practice 1Y0-204 Mock, 1Y0-204 Reliable Study Plan

Our product for the 1Y0-204 exam is compiled by the skilled professionals who have studied the exam for years, therefore the quality of the practice materials are quite high, it will help you to pass the exam with ease. Free update for the latest version within one year are available. And the questions and answers of the 1Y0-204 Exam are from the real exam, and the answers are also verified by the experts, and money back guarantee. The payment of the 1Y0-204 exam is also safe for our customers, we apply online payment with credit card, it can ensure the account safety of our customers.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which two options would provide an end-to-end encryption of data, while allowing the Citrix ADC to optimize the responses? (Choose two.)

- A. SSL protocol for the virtual server
- B. HTTP protocol for the services
- C. HTTP protocol for the virtual server
- D. SSL protocol for the services
- E. SSL Bridge protocol for the services
- F. SSL Bridge protocol for the virtual server

Answer: A,B

Explanation:

Explanation

According to the Citrix Virtual Apps and Desktops 7 Deployment and Administration (CWS-215) course, the Citrix ADC can optimize the responses by using HTTP protocol for the services and SSL protocol for the virtual server. This configuration allows the Citrix ADC to terminate the SSL connection from the client and then communicate with the server using HTTP. This way, the data is encrypted between the client and the Citrix ADC, and the Citrix ADC can perform optimization tasks such as compression and caching! Page 95, Module 5: Citrix Gateway and Citrix StoreFront Integration.

NEW QUESTION # 38

Scenario: A Citrix Administrator configured the rewrite policies below:

```
bind lb vserver VPN_http-policyName POL_1-priority 120 -gotoPriorityExpression END -type REQUEST
bind lb vserver VPN_http-policyName POL_2-priority 90 -gotoPriorityExpression NEXT -type REQUEST
bind lb vserver VPN_http-policyName POL_3-priority 100 -gotoPriorityExpression NEXT -type REQUEST
bind lb vserver VPN_http-policyName POL_4-priority 110 -gotoPriorityExpression END -type REQUEST
```

In which order will the policies be evaluated?

- A. POL_2, POL_3
- B. POL_2, POL_3, POL_4
- C. POL_2, POL_3, POL_4, POL_1
- D. POL_2

Answer: C

NEW QUESTION # 39

Scenario: A Citrix Administrator notices an intermittent latency issue within a Citrix Virtual Apps and Desktops environment. The issue only involves external users entering through a Citrix Gateway.

The administrator reviews Citrix ADC logs, identifies the problem as a networking issue, and now wants a more granular view of the data in order to isolate the issue further.

Which Citrix tool can the administrator use to view the network information?

- A. Citrix Scout
- B. Citrix Diagnostic Toolkit
- C. Configuration Logging
- D. HDX Insight

Answer: B

Explanation:

Explanation

The Citrix Diagnostic Toolkit is a rapid deployment platform that delivers a suite of tools and automation options in an easy to use structured format that closely resembles the look and feel of any standard Windows application, even though each tool is an independent standalone application. The easy to use built in menus and shortcuts allow you to quickly and effectively configure multi-

vector data collection and integrate third party tools for more robust and comprehensive debugging sessions1.

NEW QUESTION # 40

A Citrix Administrator needs to perform power management on Virtual Delivery Agent (VDA) machines. Which type of machine supports this feature within a Citrix Virtual Apps and Desktops infrastructure?

- A. Remote PC Access machines
- B. Physical Server OS machines
- C. Virtual Server OS machines
- **D. Virtual Desktop OS machines**

Answer: D

Explanation:

Citrix power management requires:

- * A hypervisor connection (Citrix Hypervisor, Hyper-V, VMware, Nutanix AHV)
- * Machines created or managed by Citrix Studio
- * The ability for Delivery Controllers to send power commands through the hypervisor API Citrix documentation clearly states:
Only virtual machines registered in a hosting connection support power actions such as:

* Power on

* Power off

* Restart

* Suspend / resume (depending on hypervisor)

Virtual Desktop OS VDAs (typically Windows 10/11 or Windows 365-style desktops) support full power management because they run as virtual machines on the hypervisor.

Why the other options are incorrect:

- * Remote PC Access machines (A): Are physical desktops; power actions cannot be controlled via hypervisor APIs.
 - * Virtual Server OS machines (B): Although virtual, they are normally used as multi-session hosts; Citrix power management is not intended for them in standard deployments.
 - * Physical Server OS machines (D): Physical hardware is not managed through hosting connections, so no power control is possible.
- Thus, Virtual Desktop OS machines are the correct answer.

NEW QUESTION # 41

When users log on to Citrix Receiver, they are NOT able to see their line-of-business application by default and are frequently calling the help desk to locate the application.

Which phrase can a Citrix Administrator add to the application properties, so that line-of-business application is added to Favorites and users cannot remove the application from Favorites?

- **A. "KEYWORDS: Mandatory"**
- B. "KEYWORDS: Featured"
- C. "KEYWORDS: Prefer"
- D. "KEYWORDS: Auto"

Answer: A

Explanation:

To ensure the line-of-business application is added to Favorites and users cannot remove it, the Citrix Administrator should add the phrase "KEYWORDS: Mandatory" to the application properties3.

NEW QUESTION # 42

.....

We all know that it is not easy to prepare the 1Y0-204 exam, there are thousands of candidates to compete with you. So it is a fierce competition. If you want to win out in the exam, you need the professional study materials to guide you. Our 1Y0-204 Study Materials are confident to ensure that you will acquire the certificate. And the pass rate of our 1Y0-204 practice guide is high to 98% to 100%.
